

5G Experiment in the Netherlands is a Resounding... Failure

Source: [Giza Death Star](#)

November 30, 2018

Many regular readers here have been bringing articles to my attention for several months concerning 5G towers. Admittedly, this is not a subject with which I'm very familiar, save only to know that many people have been raising alarm about it. I've a steep learning curve here, so bear with me. But this article shared by Mr. S.D. caught my attention, largely for its assertion that a 5G test for "environmental harmfulness" was quietly conducted in The Hague, The Netherlands:

[Hundreds Of Birds Dead During 5g Experiment In The Hague, Netherlands](#)

While the article is quite lengthy, and cites a number of sources, the center of my concerns are here:

About a week ago at The Hague, many birds died spontaneously, falling dead in a park. You likely haven't heard a lot about this because it seems keeping it quiet was the plan all along. However, when about 150 more suddenly died – bringing the death toll to 297 – some started to take notice.

*And if you are looking around that park you might have seen what is on the corner of the roof across the street from where they died: a new [5G mast](#), where they had done a test, in connection with the Dutch railway station, to see how large the range was and whether no harmful equipment would occur on and around the station. **And harm happened, indeed.***

Immediately afterward, birds fell dead from the trees. And the nearby ducks that were swimming seemed to react very oddly as well; they were simultaneously putting their heads underwater to escape the radiation while others flew away, landing on the street or in the canal.

Again, almost at the exact same time that those animals died, near the station, Holland Spoor was tested with a 5G transmitter mast.

“If they all got heart-failure with an healthy body, no signs of any virus, no bacterial infection, healthy blood, no poisons found etc. etc. The only reasonable explanation is, that it is from the new 5G Microwaves having an huge effect of all birds hearts! ... It heavily resonates with certain ERRATIC PULSED Microwaves (millions per second!) which can be proven to have biological effects on organs! ... Am not kidding here! ... Some people assume Microwaves at lower wattage “can not harm” because “it does not cook you” ... that very flawed “logic” is what they want you to repeat over and over! ... Search in “Google Scholar Search Site”: Biological Effects of Non-ionizing Microwaves and be ready to be shocked how stupid most sheeple really are in believing blindly the so called “experts” & “authorities” of FCC, Telecom & Wireless Industry propaganda!” – [John Kuhles, founder of Fb.com/groups/Stop5G & Fb.me/Stop5G owner of Stop5G.net](#)

I've written many times on this website about various mind control technologies which use microwaves in interferometry to produce entrainment effects, and even remote “voice of God” technologies for broadcasting thoughts directly into brains. My most recent book, *Microcosm and Medium* discusses some of these technologies and their possible applications at some length, and I've also written on this website about my suspicions that the Cuban embassy attacks were the result of

the use of similar types of technologies.

So herewith some high octane speculation:

It is a short step from that basic concept to a similar use of microwave technologies – perhaps again involving interferometry – to produce beat frequencies which could interfere with, or actually shut down, the electrical functioning of organisms' nervous systems, including organs such as the heart. And that's what is so alarming here: birds might be resonant to certain such frequencies, other organisms to other frequencies. All one needs to do, so to speak, is to "dial in" the right frequency, and one could eradicate a regional population of dogs, cats... or even humans.

So herewith some more high octane speculation:

A few years ago I blogged about the strange deaths of geese and other birds *in midflight* in remote places such as Idaho (see [YOU TELL US: BIRDS "FALL FROM THE SKY" IN IDAHO, STONE ...](#)). There was also an episode a few years ago of a flight of birds that fell dead to the ground in Tennessee, simultaneously. At the time of the strange incident in Idaho, the theory was quickly advanced by the "lamestream" that the birds had contracted a sudden-onset flu of some sort, and came crashing to the ground (again, simultaneously!) because of it. A moment's reflection on this story from The Netherlands reveals the possibility that these earlier incidents may have been similar – and very secret – tests, perhaps of some prototype 5G technology.

If so, then that contains a frightening implication, namely, that the effects of the technology were well known, far in advance of this most recent incident, and that "they" have gone ahead with their plans anyway.

See you on the flip side...
