Transcript prepared by [Truth Comes to Light:](#)

Good day, South Africa. My name is Ricardo Maarman and I'm from the Show Us the Virus movement.

Today is the 28th of April, 2022. It is the very day that our Leave to Appeal to High Court to challenge the negative judgment we had, with the cost order against me, was due. And so this is why I am giving you this update today.

Now before we proceed I just want to give you a background on the case and what has been happening so far.

You see, for the past two years (or more than two years) the president of South Africa, and many other presidents around the world as well – but in particular president of South Africa – came forward and made a claim.

He claimed that there was a virus called SARS-CoV-2 and this virus is causing a pandemic. And because of this, he has to take away all of the rights, or a lot of the rights, of the people of South Africa. And he has to impose these draconian lockdown, tyrannical regulations on the people.

And for the past two years, while he has been doing this, people have said many things.

You know, people have said this and that and the other in the showing their disapproval of what is going on and they're opposition of what is going.

We at the Show Us the Virus movement have said one thing – can be summed up in one question that we have asked throughout this whole period. And that question is: Show us the virus. Show us the virus!

You make a claim that there is a virus, so show it to us.

And what we are faced with is controlled opposition who are trying to distract people from this question.

The president decided to fight the legal battle against me –

a long protracted legal battle – and seemingly using all of his influence in the judiciary and his power to win this battle against me, to prevent me from ever being able to have this question answered.

But I think his silence has answered it already. And his actions. His dismissal.

He's maneuvering has shown to us what the answer to the question is. There is no virus here.

The media has chosen to ignore what we're doing, sort of an unofficial ban on this – never covering this court case. Showing anything else but this.

And the controlled opposition has been trying to distract people's attention away from this. 'No, that's not an important question. THIS is more important than that.' This is what has been happening.

And we have stayed consistent. We have said the same thing. Because when you speak the truth, and when you are focused on the truth, you do not have to change your tune every now and again. And that's why you've heard the very same thing from us time and again. Show us the virus.

And that won't change. We won't be deterred. We will grasp onto the truth and we will pursue it no matter what, hell or highwater.

Now, what has happened as far as the case is concerned as I say that on the 28th of April, which is today, 2022, this is when our would Leave to Appeal is due. And we have successfully launched an application to the judge for Leave to Appeal.

But a strange thing has happening again. One week before this, on the 22nd of April 2022, the Constitutional Court dismissed our Rescission Application. Rescission Application

is a sort of appeal to the Constitutional Court. And they have dismissed it.

Now, this is very important because the judge has dismissed our Interdict Application in the High Court because she says there was no case in front of the Constitutional Court, there was no appeal, there was no decision and, therefore, she has dismissed the case. And, therefore, she has ordered that I pay punitive cost of the billionaire president and also the pretty wealthy and rich Minister of CoGTA [Co-Operative Governance and Traditional Affairs]. I must pay their legal cost, based on the fact that there is actually no case in front of the Constitutional Court pending.

The fact that the Constitutional Court – one week before the time – has dismissed my decision application without a hearing, is proof that the judge was wrong in her judgment. There was a case pending. There was an appeal pending in the Constitutional Court.

The fact that the Constitutional Court now has dismissed it a week before, it is supposed to have helped their cause but it doesn't really. I think that is a little bit of miscommunication or there's a miscoordination because it doesn't really help their case. It advances ours. It proves, without a doubt, that when the judge made her decision she was factually mistaken. She was legally mistaken.

And that is why we are – we have launched this Leave to Appeal and we are successful with the merits of our case.

You must remember, at the end of the day, we have gone to the courts and we have said to the courts: The president made a claim. He said there's a virus. We ask him to show the virus.

And the just and legal thing to do would be that he must prove his claim. He who claims must prove it.

The courts have, thus far, been dismissive of this basic and

fundamental legal issue. And, as I've said, the media has tried to basically ban this, hide this very important, very fundamental, issue from the people of South Africa.

The controlled opposition. Now, who are the controlled opposition?

Controlled opposition are all those who say they oppose the government in this tyranny that the government is perpetrating against the people of South Africa, based on the SARS CoV-2 virus, but they agree with the claim of the government. They also promote the idea that there is a virus. And they feel that any lawsuit, or any case, that has to do with the Show Us the Virus question is not important. Other cases are important that focus on other things.

And I say to you, quite frankly Show Us the Virus is the fundamental issue here. Nothing is more fundamental than that.

Without the virus claimed there would be no pandemic and no other thing that anybody has a problem with.

And so anyone who is trying to say that they oppose the government but they agree with this basic premise is, quite frankly, controlled opposition. And the purpose of what they are trying to do is to distract you from what is really important. You'll see this controlled opposition sellouts in politics and everywhere else, trying to distract the South African people, divide the South African people. It's no different here.

And you see it – these kinds of thing pop up every time we release a message or every time that we are in the middle of a case of, there's efforts to try and distract. Go look at the background and history and you will see the same.

As I've told you already, for this simple question Show Us the Virus, the president has chose to fight a legal battle

with me for the past two years. The judiciaries tried to dismiss it. A basic premise of justice, they've tried to dismiss it.

Now, the fact that we have lodged our Leave to Appeal should show you – and the fact that we are still asking the same question for two years – should show you that we don't give up easily and that we will not be easily distracted. And that we will not be easily deterred. And the fight is far, far from over.

Now, unfortunately, this is not the first time that this situation is happening in South Africa. It's not the first time. Previously it was the HIV virus, that supposedly caused the AIDS pandemic. And the media did the same.

Anyone that opposes this is called an AIDS denialist. Anyone who raises any questions is ridiculed and attacked in the media quite viciously.

There was also protected court cases going on. And I'll explain to you those court cases that went on. And, unfortunately, the result is very similar to what we are seeing today.

But first, there was also controlled opposition then. There was the Treatment Action Campaign that was pushing for pregnant women to receive toxic drugs (nevirapine). They were pretending to be on the side of the people and demanding that the people be given this toxic drug, sort of as a mandatory drug from the pharmaceutical industry that were the beneficiaries of this poisonous drug.

We have the same. Those people today who are controlled opposition for the government and for these people pushing this tyranny on us, they're doing the same. They say it's a bioweapon. They say it's not so bad, but the virus is there. They are advocating people use ivermectin which is a toxic drug. They saying people should use other toxins, many other

toxins.

I'm not a doctor. I will not be able to specify all of them. But many, many, many toxins. You can go check it yourself. All of those who claim to be opposing the government but they believe there is a virus or they advocate there's a virus without providing any proof, they are also advocating toxic drugs.

The same that was happening during the time of the HIV issue as the Treatment Action Campaign did then. There was a ... big court case happening then where the government then was challenging and saying no we shouldn't be giving people nevirapine, it's a dangerous, toxic drug. Eventually this matter ended up in the Constitutional Court then. And in the Constitutional Court [Dr. Sam Mhlongo](#), he raised the issue to the court that the HIV virus has never been isolated and purified. Basically, the HIV virus was never shown to exist. So, you know, they were basically in their way asking the same question then: Show us the HIV virus.

And the court decided to dismiss Dr. Sam Mhlongo and say no that will not be entertained. The court will not answer such a question. Again, basic premise of justice. They claim there's an HIV virus. Dr. Sam Mhlongo is asking them – is saying to the court they've never proven it. And therefore they should not be giving people toxic drugs like nevirapine if they haven't proven the virus to exist. And the Constitutional Court dismissed Dr. Sam Mhlongo, as they are now trying to dismiss me again. It's a repeat of history.

Sadly, soon after this whole debacle, Dr. Sam Mhlongo lost his life in mysterious circumstances – car accident and he lost his life. And this is how dangerous it can be to just ask a simple question.

To demand justice can be deadly when you are facing with such force of tyranny and injustice. And sadly, this is the case

with Dr. Sam Mhlongo.

Now, as I've explained to you here – now this is twice in a row – that there has been, every time we go to the High Court, where we are supposed to go to the High Court, we are supposed to appeal, then the Constitutional Court issues orders. issues orders that will seemingly be very convenient for the president's legal team and for the High Court then to to use together to judge against me.

There seems to be ... I can't say very clear. I was not in meetings where I see them discuss, but what I see is that within a week – every time we are going to the High Court, within a week the Constitutional Court comes back with a decision supposedly against us and supposedly in favor of the president. And that can then be used to help the High Court make its decision.

So this is a determined effort to see that the question of Show Us the Virus is never the answered and that I must be, you know, saddled with this legal cost. Because the financial cost would be quite substantial. They haven't issued the bill yet and so this is hanging over my head. But what can happen here quite easily, if my Leave to Appeal is dismissed, my appeal is dismissed, and then I'm saddled with this cost. And then this could mean that they could see sequesterate me. It could render me to lose all of my assets and to be impoverished. So this is the threat that is hanging here – all because of asking a question. Show us the virus.

So, they are very dangerous, you know, in terms of their power that they wield and the threats that they have. As I've said here, Dr. Sam Mhlongo has lost his life... I have the knowledge that he lost his life for asking that question. And I'm asking that question. I'm asking the question for them to show the proof of these virus claims of theirs, including the one that Dr. Sam Mhlongo asked about HIV. And I'm asking in addition to that.

So I'm sure for me asking his question and redoubling that question with another one, with another virus, then I should be very careful about car accidents as well.

And, of course, in addition to this financial threat that they now directing towards me. But I am not deterred. And as I'm sure Dr. Sam Mhlongo was not deterred. That his death, and that if any such similar thing happens to me or loss of property, then my debt, my loss of property – or my death in the event that they do the same kind or try the same kind of thing against me – will be a witness against them, a witness against the tyranny, a witness against their falsehood. It will be a witness against their injustice. Because why should this man lose property? Why should this man lose his life for asking you to show us the virus when you have made this claim. This is the height of injustice.

They are determined to see that I lose these cases.

They are determined to see that I am silenced.

They are determined to ensure, with the help of their controlled opposition, that people's attentions are directed elsewhere.

I'm saying to South Africa, we have been fooled once by these people and their tactics, their intimidation, they're controlled opposition, sellouts, etcetera.

They fooled us in the past. We should not allow them to fool us again.

For them, having fooled us in the past, shame on them. But if we allow them to fool us and divide us again, then shame on us.

It is time for us to redouble our efforts. Here at the Show Us the Virus movement we have no intention to submit ourselves to evil or to falsehood. No intention whatsoever.

We will redouble our efforts as this lodging of this Leave of Appeal application has shown you. There has been many attempts to distract you in the meantime.

From my request, I asked you and I said South Africa please support me, please help me. I am facing these kind of threats, financial threats. And there has come a whirlwind, a whirlwind to try and distract you away from helping me away, from supporting this cause and standing for truth and justice.

I ask you not to allow yourself to be distracted like this I ask you to stand with me as I redouble my efforts to fight against this tyranny and oppression.

I will not surrender. And I want to implore you that, don't think others will come and save you. Our situation will not change unless we change it ourselves.

We have to redouble our efforts. We have to pray and turn to God to help us to defeat this evil. And we have to stand together. And we must ensure that we focus. We stand as one. And we never relented evil. We stop it. We fight it. Whatever stumbling blocks there are, we jump over it. Whatever walls there are, we go through it if we have to.

So please let's stand together. Support me as much as you can. Support our cause. We still have an uphill battle to fight.

We will let you know how the Leave of Appeal application goes. And after, that we'll follow the appeal itself in our efforts to see that justice is done and that an unjust court order be overturned.

God bless you and thank you very much.

Transcript provided by [Truth Comes to Light](#)

Good day South Africa. My name is Ricardo Marmaan and today is the 8th of April 2022, exactly three days after the Western Cape High Court dismissed our '[Show us the virus](#)'

court case application, an application for an urgent interim interdict against the lockdown regulations.

It was dismissed with a punitive cost order against me. This judgment came after a 2-month long delay and exactly one day after Ramaphosa made his speech in which he so-called ended the lockdown. We know he did not end it; he merely escalated it by deceptive means.

This is a very strange coincidence. May be no coincidence all.

We asked the Western Cape High Court to grant the people legal protection against being forced by Ramaphosa and the big businesses into these harmful lockdown regulations – like the wearing of the suffocating masks, the use of these poisonous hand sanitizers, and to be forced into taking these deadly vaccinations.

Ramaphosa and these vaccine producers and big businesses already enjoy such legal protection because they are protected by the regulations. They are acting under the regulations.

We asked the Western Cape High Court, in a reasonable and just application, that the people of South Africa be granted the very selfsame legal protections.

But the court unfortunately dismissed our application with a punitive cost order against me.

South Africa, at the very beginning of this process, we asked Ramaphosa to show us the virus. He failed to do so and, therefore, **he is perpetrating a virusless pandemic** against the people of South Africa.

Parliament, through its silence, is consenting to Ramaphosa and now the judiciary, through its legal – using its legal power and its judgments and rulings protecting and I'm up

also protecting the vaccine producers – are protecting Ramaphosa, protecting the vaccine producers, and protecting the big businesses, and depriving the people of South Africa of the very selfsame legal protection.

South Africa, it is time that we see this for what it is. Our beautiful nation has been completely, or more or less completely subverted.

Subversion means that our beautiful nation has been infiltrated by foreign aggressive actors and their local agents. And they are, through lies and deception, leading us to our own self destruction.

The National Health Act amendments will make this subversive and self destructive measures permanent. But Parliament can stop these amendments. Parliament have taken an oath to represent the interests and protect the interest of the people of South Africa, to represent the people of South Africa, to hold Ramaphosa, the Minister of CoGTA [Co-Operative Governance and Traditional Affairs] , and the Minister of Health accountable.

It is time that we wake Parliament up and instruct them because they are our representatives.

I suggest that you go to the Parliament website, [parliament.gov \[parliament.gov.za\]](http://parliament.gov.za), and find the members of Parliament, identify them, contact them and go to them in droves. They live amongst us.

It is time that we instruct them that we the people of South Africa do not want these amendments because they are subversive and self destructive

– that the members of Parliament have a duty to protect the people of South Africa and to stop Ramaphosa

– that if they fail to obey our lawful instructions then it

is clear that they are agents of subversion.

South Africa, do not let them divide you. Wake everyone you know up and let us act together. South Africa, do not let them distract you.

Parliament has the power to stop these amendments and we have the lawful authority to instruct Parliament to do so.

South Africa, let us all act together and let us go to Parliament, to the members of Parliament. Let us phone them, let us email them and let us go to them.

And let us say to them that we the people of South Africa say no to these amendments.

Thank you and God bless you.

Battle...in the History of This Country."

Ricardo Maarman: Update on South African 'Show Us the Virus' Court Case – “This Is Probably the Most Important Legal Battle...in the History of This Country.”

Ricardo Maarman: Update on South African 'Show Us the Virus' Court Case – “This Is Probably the Most Important Legal Battle...in the History of This Country.”

Truth Comes to Light editor's note:

In the video below, Ricardo Maarman gives an update on the South African 'Show Us the Virus' constitutional court case. The case number for the court case is [CCT 299/21](#). You can download a PDF copy of the court case affidavit [here](#).

See [Ricardo Maarman & Thousands of South Africans File Constitutional Lawsuit Against the President, Speaker of Parliament & Governor of SA Reserve Bank for 'Pandemic'-Related Crimes Against South Africans](#) for background information. To connect with Ricardo Maarman and support their work, see 'Show Us the Virus' website: showusthevirus.info.

Maarman also gives an overview of a linked court case which is currently in front of the Western Cape High Court. In this case, the court is asked to grant the people of South Africa 'urgency' because of the national state of disaster declaration that has caused so much harm. The court is asked to grant the people of South Africa an interim interdict, giving them legal protection against all of the harms that emanate from the national state of disaster declaration and the lockdown measures.

Maarman concludes with this message:

People of the world, people of South Africa, we have started out this matter asking a very simple question: show us the virus.

And here, because of the failure of that question being answered, we have found ourselves in a situation where now the president is alleged of serious violations of the constitution.

That the Parliament is facing serious allegations that they have violated the constitution, their obligations.

The Reserve Bank has violated their obligations to the constitution.

That is what is being alleged in the Constitutional Court.

But, because of this, now what has happened is that now we have found even such wrong-doing related to this matter in the Constitutional Court itself.

This is probably the most important legal battle that is happening at the moment – probably in the history of this country.

And we're asking all of you to spread the message since the mainstream media is not spreading this message at all.

Spread the message because it's very important that as many people as possible come to hear of it.

Secondly we are asking for you to provide us with support and assistance as we are going up against the most powerful respondents and entities in this country, without any doubt.

We are asking you to pray for our success because this is a very serious matter that we are engaged in with huge consequences for everyone.

Thank you for your support so far.

And God bless you.

Transcript prepared by [Truth Comes to Light](#)

Good day, everyone.

My name is Ricardo Maarman and today I would like to give you an update on the 'Show Us the Virus' court case that is currently in front of the Constitutional Court of South Africa.

I would also like to discuss with you the way forward – especially in the face of these looming vaccination mandates that is in front of us.

At the very beginning of this process, we asked the government a very simple question: show us the virus.

And the reason why we asked this question was **because one cannot prove lies**.

And so when we asked the question 'show us the virus', **their failure to do so was proof of their lies and their deceit**.

The lockdown measures made no sense if its intention was to fight and destroy a virus. But the lockdown measures make perfect sense if its intention is to fight and destroy the people of South Africa.

For example, look at the exorbitant food prices, the increases in the fuel prices. And look at this diabolical option that is now placed in front of the people of South Africa: to choose between jabs and jobs.

The intention of this is quite clear – is to drive the people of South Africa into poverty and into desperation and dependency on them.

When Ramaphosa said "thuma mina", "send me", he was volunteering to do the devil's work. Ramaphosa spoke of the "new dawn" in his speech, he was paying tribute to Satan, Lucifer, whom they call the New Dawn.

Ramaphosa is part of an elite that control the entire South African society – a political, economic, social, religious elite. And even the controlled opposition amongst us, they

are all wolves in sheep's clothing.

And now they are waging open war against the people of South Africa. When Ramaphosa couldn't and wouldn't show us the virus, we approached the Constitutional Court of South Africa, asking the court to restore the people's rights and to remove Ramaphosa from power.

The Constitutional Court has been grappling with this matter for almost three months now. What we have done in the meantime, and currently, is to approach the High Court of South Africa, asking them to grant us an urgent interim interdict against the entire lockdown measures, including the vaccinations.

Because these measures cannot be allowed to continue and even to escalate while there is a dispute pending in front of the Constitutional Court.

I will make an example of the grounds upon which we are approaching the court for this urgent interim interdict. If your two children are arguing about a toy and one of them approaches you and says 'please intervene'. Then the first thing that you would do is to stop both of them from playing with the toy until after you have made your final decision.

So too, this is a simple principle of justice that when a matter is in dispute it must be suspended. All things related to it must be suspended until final judgment.

I ask you that we should not pass judgment on the courts in South Africa until after the court has passed its judgment.

That we should oppose chaos with order.

That we should oppose evil with good.

That we should oppose injustice with justice.

I ask you that – evil thrives when good people do nothing. So

it is important for us to do something.

We are doing this. We are approaching the High Court for this urgent interim interdict, to stop these evil measures from further destroying the people of South Africa.

We ask you to give us financial support so that we can have the resources to sustain this hard and tough fight.

We ask you to pray for us.

We ask you to spread the truth amongst each other and to encourage each other to patiently persevere.

Victory will be ours eventually.

And above all, we ask you that you put all your trust in God.

Thank you very much.

Ricardo Maarman and Dr. Faiez Kirsten: Update on South Africa's Constitutional Court Case – “What We Are Fighting for Here Is Nothing Other Than Our Freedom... Here You Have Slaves Being Branded Right Into Their DNA”

[Ricardo Maarman and Dr. Faiez Kirsten: Update on South Africa's Constitutional Court Case – “What We Are Fighting for Here Is Nothing Other Than Our Freedom... Here You Have Slaves Being Branded Right Into Their DNA”](#)

See video below excerpts from Ricardo Maarman's powerful words:

“What we are faced with here – the country and the world – we are faced with a very, very dire situation. What we are fighting for here is nothing other than our freedom. You know, the level of

enslavement that we are talking here is unbelievable.

"I don't think there has been a time in history where slaves were forced to put something in their body... Slaves were branded on the skin.

"Here you have slaves being branded the right into their DNA.

"This is unbelievable. And this is a whole country, a whole nation, that is exposed to this.

"We are exposed to the genetic modification of an entire nation – forever. We are exposed to a situation where your freedoms are going to be taken away and we don't know how we will recover them.

"There is a lot of people that are getting injured, that will die from this. So this is a matter of life and death.

"The looming mandates that are coming – vaccine mandates – are put in a situation where people have to choose between potentially dying of a vaccination, a poisonous vaccination that can kill you all or dying of starvation because of the economic exclusion.

"There is literally no middle ground here. And there is no gray area here.

~~~

"You see, falsehood – falsehood and lies – are the handmaidens of tyranny and murder.

"You see, in order for a murderer to kill his victim, he has to lure him with lies and deception.

*"In order for a tyrant to strip people of power, he has to lie to them about his true intentions.*

*"And that is why narratives are important. Because a certain narrative can either be a handmaiden of tyranny and murder or it can be a handmaiden of freedom and justice. And that's why the narratives are important.*

*~~~*

*"It is completely wrong to put people in a position where they have to choose between feeding their families...and their families starving potentially if they are not in a position to feed them – or putting their families in a position, in order to live they have to be injected with something that might kill, maim them, change their DNA forever. This is diabolical.*

*~~~*

*"I cannot remember in recorded history that we have seen a worse crime than the one that is being perpetrated here against the people of South Africa and against the people of the world.*

*~~~*

*"The person was is spreading the falsehood and he is not aware that he's spreading falsehood, he's also culpable. Because you are not supposed to speak on matters that involve life and death if you're not sure.*

*"If you have not made sure of the facts, if you do not have proof to back it up, then you're not supposed to speak on these matters.*

~~~

"We are talking here that you're exposing entire future generations, the offspring of these people whose genetics have been so modified, we do not even know what kind of harm you are exposing their children. You are taking people's rights away.

"Like I say, we have never seen a form of slavery as totalitarian, as tyrannical, as what we are moving into now.

~~~

*"There's no place here on the sideline... When you are talking about the potential extermination of an entire nation, there's no 'I'm in the middle or I'm neutral.'*

~~~

"In order to murder, you first need to lie to lure the victim.

"And in order to oppress, you need to claim power under false pretenses.

"And that is what's happening. And so we now need to say 'what are those lies, and what those falsehoods, that are being propagated, that is assisting with this murder and that is assisting with this tyranny?"

~ Ricardo Maarman in conversation with Dr. Faiez Kirsten

Transcript:

Good Day, everyone. Today I have a very important message for the people of South Africa. We have filed our case with the Constitutional Court of South Africa, case number CCT 299/21.

Despite the many difficulties that we have faced along the way, we have successfully filed this case.

I would like to thank Dr. Faiez Kirsten for his unwavering commitment to the cause. I would like to thank those more than 8,700 South Africans who have signed our petition, and in so doing, have become co-applicants to the case.

I would like to thank those who have given us

financial support. I would like to thank those who have prayed for our success.

I would like to thank my wife for her loyal partnership, for her wavering commitment to the cause of truth, of justice and her service to God.

Finally, and most importantly, I would like to thank God in whom we put all our trust.

The case that we have brought to the Constitutional Court is against the president of South Africa, the South African Parliament, and the South African Reserve Bank.

Now, what has the president done wrong? Why have we brought a case against hi?

Well, the president heard claims made by the Chinese government that there was a virus that broke out in Wuhan. And subsequently, the World Health Organization has declared an international or global pandemic. He followed suit. He declared a national disaster in South Africa.

What he has done wrong here is he did not confirm the claim that was made by the Chinese government, or the claim that was made by the World Health Organization, as he should have done before he imposed a lockdown on the South African people.

What the president should have done was to send scientists to China and to ask the Chinese government to provide a pure sample of the SARS-CoV-2 virus, separated and isolated from all other contaminants and substances. Once a scientist was in possession of this pure sample of the SARS-CoV-2, he should have instructed them to infect a living,

healthy organism with this pure virus only to see whether it produces the symptoms of Covid-19 – and to see if Covid-19 is indeed as deadly as the Chinese and the World Health Organization claim it to be.

He should have repeated this a few times. After doing so, he should have presented his facts and his information to the people of South Africa, to Parliament. And then he should have declared a national state of disaster.

The president did not do so, therefore he did wrong. The president should have shown the people of South Africa the virus before he declared a national disaster based on the virus. In doing so, the president has contravened the Constitution. He contravened Section 36.1 that says he can only limit the rights of the people of South Africa, the Bill of Rights, if he had reasonable justification and if he shows that reasonable justification to the people of South Africa as in an open and democratic society.

He also failed Section 52.1 of the Constitution that says if you take someone's rights away then you should provide him information that could help him to understand why his rights have been taken away, or to fight for his rights to be restored. The president simply failed to do so.

What is the case that we have brought against the South African parliament?

Well, when the president declared the national state of disaster, Parliament went along without any question. That was wrong.

Parliament should've called a debate. They should have questioned the president. They should have asked the president to show us the virus before they agreed to support these measures of the lockdown and the national disaster declaration. Parliament failed to do so. That is why they did wrong.

They contravened the Constitution Section 37.1. Parliament should have made sure that there is a real threat to the life and property of the people of South Africa before they went along. Parliament should have made sure, according to Section 22.3, that the president has a reasonable justification for taking away the rights of the people of South Africa – before they agreed to go along.

According to Section 55.2, Parliament should have put all measures in place to find out whether the virus exists and whether it's dangerous. And whether it's deadly. Parliament should have asked the president to show us the virus. They had the power to do so, and he would have had no other choice but to answer them.

Parliament has failed the people of South Africa.

The South African Reserve Bank, when they heard the president make a declaration of a national state of disaster, they then funded the president. They instituted financial measures to provide finance for the lockdown measures. That is what the South African Reserve Bank did.

Before they provided such finance, what they should have done was to confirm whether the virus was real, confirm whether the virus was indeed deadly before they agreed to finance the government. They had a

responsibility to do this under Section 224.2 of the Constitution. They have a responsibility to act independently without fear or favor. They have failed to do so.

Now we have great evidence against these responses.

To start with, Christine Massey of Canada and many others went around the world and they asked more than 100 laboratories, health laboratories around the world, to show them the SARS-CoV-2 virus. And the answer they got from these laboratories was, no, they cannot show the virus because they don't have it. More than 100 health laboratories around the world.

The president and the scientists rely on the PCR test in order for them to demonstrate death rates and infection rates. But the inventor of the PCR test method they said that it shouldn't be used for that. Yet they continue to use it for that.

The inventor of the PCR test method, Dr. Mullis [Kary Mullis, PhD], died shortly before the outbreak of the pandemic. But, luckily for us, that those who know him well, and who have the same expertise as him, have given a sworn testimony to verify and to confirm that he indeed has sent them that these tests should not be used for this. We have sworn testimony to this and we have presented this to the court.

The PCR test has been found unreliable by a Portuguese court. And, in this matter, according to Section 39.1 of the Constitution, the Constitutional Court must consider that Portuguese case. But it makes it's ruling here. And the Portuguese case

ruled that the PCR test is unreliable.

The PCR test is not calibrated to find SARS-CoV-2 based on a pure genetic sample that was taken from a pure sample of the SARS-Cov-2 virus. Rather it is based on a computer-generated, genetic sequence.

The NICD [The National Institute for Communicable Diseases] has claimed that it had a photograph of the SARS-CoV-2 virus. Now how did they obtain this photograph?

According to their own version, found on their website, the NICD says that it took samples from patients that tested positive for SARS-CoV-2 using a PCR test. And then it took those samples and mixed it with green monkey kidney cells amongst other things. And then it took a picture of this mixture and claimed that this picture is a photograph of the SARS-CoV-2 virus.

Well, it is wrong. One cannot rely on such a picture because all you have is a picture of a mixture.

According to the [...] high court in Germany, ruled that when you take samples that are supposedly from infected people of a virus and you mix it with green monkey kidney cells or any other thing, then you cannot rely on such identification of the virus. Because how do you discount the green monkey kidney cells?

And this is exactly what the NICD has done in the supposed photograph. We placed this before the court and the court must consider this as per Section 39.1 of the Constitution.

This is overwhelming evidence that is supported by

sworn testimony from scientific experts. Dr. Qureshi from Canada. Dr. [...] from the United States, Dr. Corbett from the UK and, of course, the evidence that I have shown you from Christine Massey.

We thank them greatly for providing such sworn testimony to us. In addition to this sworn testimony, we also have incriminating evidence coming out of the mouths of the president, of the speaker of Parliament, and of the Reserve Bank governor themselves.

The president has admitted under oath at the Zondo commission, that his government has people or officials in high office that are captured. He admitted this.

He also said that members of Parliament from the African National Congress are in Parliament because of the party. And they are there to serve the party and represent the party, not the people of South Africa. This is out of his own mouth – sworn testimony.

The former speaker of Parliament Thandi Modise also delivered sworn testimony at the Zondo commission. And she said at the Zondo commission that sometimes members of parliament don't ask unnecessary questions because they have ambitions of becoming ministers in future.

Thandi Modise did not ask the president to show us the virus. And now Thandi Modise is the Minister of Defense.

The South African Reserve Bank Governor, when he was helping, at the same time that South Africa incurred billions of dollars of debt with the IMF

[International Monetary Fund], the South African Reserve Bank Governor was helping the government put together the budget in which this loan was decided upon. And at the same time, he was an advisor to the IMF, the entity to which the South African people would be eventually sold into debt slavery.

He was working for the IMF and he was working with the South African government the same time – benefitting the IMF with this loan and it was eventually taken up. This was a clear conflict of interest. Highly unacceptable. How can we expect that the Reserve Bank would have acted independently without fear or favor in such circumstances, as it should have done, when its governor was so highly conflicted.

As you can see, we have a very, very strong case here against these respondents. And we are asking the court to grant the South African people relief.

And the relief that we are asking from the court is: Number one, for the national state of disaster and all its measures including the lockdown etc. to be declared invalid and to be set aside immediately.

We are asking the court that the Covid-19 budget, or the budget that was decided upon on the 24th of June 2020, in which the South African people incurred, indirectly, a good deal of debt, to fund the lockdown and the national disaster – that that budget must be declared invalid and set aside. And that the South African people must not be responsible for any debt incurred as a result of this unproven pandemic.

We are asking the Constitutional Court that all the

respondents be held financially liable personally for all the financial losses suffered by South African people – because of their actions or their failures to act in the correct manner.

Asking the court to hold the South African Reserve Bank liable as an institution, as an organization, because the South African Reserve Bank is the financial authority of the country. So as the financial authority, who acted wrongly in this instance, that the South African Reserve Bank should be held liable financially for all losses suffered by the South African people.

We are asking that all these respondents must resign voluntarily in an orderly manner. We are asking the court to grant the people of South Africa a referendum in which the people of South Africa can have a vote of no confidence in all of these respondents.

We are asking the court that the South African people be granted a referendum where they can decide whether to have a direct presidential election with individual candidates instead of party-based system that we have now, so that we can remedy this conflict of interest and this confusion that ANC party members have – whether they should represent the people or whether they should represent their party. We should have a referendum to solve this matter once and for all.

We are asking the court to grant the people of South Africa a referendum to decide whether we should liquidate the South African Reserve Bank in order to finance all of the financial losses suffered by the people of South Africa because of the failures of

the South African Reserve Bank.

We are asking the court to grant the people a referendum so that the people can decide on a metal-based currency and the abolition of interest, to ensure that in future our financial system cannot be manipulated by anyone.

As you have seen here in my explanation for you, that our case is simple, clear and just.

We have faced many difficulties. Some of our witnesses that were supposed to give sworn testimony pulled out under threat, under coercion, under fear.

But we have labored on and we are here. This is a serious time in the history of South Africa and in the history of the world.

I ask all of you who are listening to this video that – should something happen to me – that all those co-applicants have the right to have this case continue to the end, until justice is done.

Please support our efforts. Please support our case. Please pray to God for our success.

As I have said, our case is simple, our case is clear, and our case is just. Thank you very much.

Shining a Light on Botswana: Mandated Toxic Vaccinations as Part of the Dark Globalist Agenda to Destroy the People & Dominate the Land

[Shining a Light on Botswana: Mandated Toxic
Vaccinations as Part of the Dark Globalist Agenda to
Destroy the People & Dominate the Land](#)

by Kathleen Stilwell, editor, [Truth Comes to Light](#)
with PaintedWolf, contributor to Truth Comes to Light
February 24, 2022

I recently received an email from PaintedWolf (pseudonym), who lives in Botswana, in the northern Chobe region, and has travelled extensively throughout all of Africa. PaintedWolf is actively working to alert the people of Botswana (known as [Batswana](#)) to the dangers of the covid vaccines. As we shared back and forth, it felt imperative to help bring light to

their situation.

Botswana has a population of slightly over 2.3 million people and is one of the most sparsely populated countries in the world, with 70% of its territory being the Kalahari Desert. The majority of the population is rural.

Here's a glimpse of life in the town of Kasane:

Internet cafe – Kasane, Botswana in the Chobe region

Tourist, safari center – Kasane, Botswana in the Chobe region

Department of Tourism – Kasane, Botswana in the Chobe region

Kasane Hospital – Kasane, Botswana in the Chobe region

Covid Mandates in Botswana

PaintedWolf's words, shared throughout this article with his permission, paint a clear picture of the way the Botswana government is responding to this global covid psyop. He also shares his personal knowledge of the region. PaintedWolf's love of the Batswana is evident. I have added some additional images and links.

"Kathleen, the people of Botswana are such innocent and gullible people. I have guided expeditions through Africa for 20 years,

I know the countries, their people, cultures and traditions. Botswana is the only African country I find totally at peace.

They are honest and pure hearted people. Its hard to keep the tears back when I think of this mandate to basically force them into being vaxxed, many against their will.

Some might say no, others will get it against their will simply because they cant afford the fine, and have the fear of being put in prison. The people have no idea about their

rights. It's a crime."

Image credit: [hbieber](#)

Trauma at the Borders

The situation at Botswana's borders is dire at this time. The "vaccinated only" policy not only stops unvaccinated foreigners from entering the country but also prevents unvaccinated Batswana from returning to their homeland.

"I want to share this press release with you in an effort to make you aware of what's happening in Botswana. Unless news is safari related, or a huge diamond being found here, this kind of news, or corruption related news, don't really make it mainstream."

MHW 1/13/1 I (237)

12 FEBRUARY 2022

PRESS RELEASE

BOTSWANA INTRODUCES NEW COVID-19 REQUIREMENTS AT PORTS OF ENTRY

The Ministry of Health and Wellness informs members of the public and the international community that effective 14th February 2022, there will be some changes at all ports of entry in Botswana, for purposes of reducing the risk of imported COVID-19 cases into the country. The new changes include:

- a. **That all persons entering Botswana should show proof that they have been fully vaccinated.** Fully vaccinated means having taken two doses of a two dose vaccine regimen or single dose of the Johnson and Johnson vaccine. If one has taken any of the two and is overdue for booster shots, they are no longer regarded as fully vaccinated, until they have taken the booster shot.
- b. When a person is not fully vaccinated, they will be required to present a 72 hour negative PCR COVID-19 test result and undergo COVID-19 vaccination at the port of entry, which will be facilitated by the ministry for free. After vaccination, they will be allowed into the country.
- c. Alternatively, if one has no proof of being fully vaccinated and has no 72 hour negative PCR test result, they will be required to undergo PCR testing at ports of entry, at their own cost and where necessary quarantine at own cost, while waiting for results. If results are negative they will be allowed into the country. If results are positive, they will be allowed to isolate within the district of port of entry, at own cost.
- d. If one has no proof of being fully vaccinated, is not willing to be vaccinated at the port of entry, has no 72 hour negative PCR test result and is not willing to be tested at own cost, they will not be allowed entry into Botswana, if they are foreigners. If they are citizens, they will be liable to a fine of P5 000.00 or imprisonment not exceeding one year or both.

In short, proof of being fully vaccinated is now the most important requirement for entry into Botswana.

Thank you.

Yours faithfully

Dr Christopher Nyanga
For Permanent Secretary

Vision: A Healthy Nation by 2023

Values: Botho, Equity, Timeliness, Customer Focus, Teamwork, Accountability

“Basically, they won’t allow any visitors into the country unless they are fully vaxxed (fully means all shots and boosters).

Those who don’t have all the shots, they want to vax at the border of entry.

Fully vaxxed are the only ones allowed to enter without PCR test. Without extra shots and boosters you are not considered fully vaxxed, so they offer to give you this at port of entry if you don’t have them.

If you read the press release, you can clearly see their criminal intentions. It doesn’t stop there though, they are imposing a serious crime against the citizens of Botswana. On the press release it also states that citizens who are not fully vaxxed must pay a fine of P5000 (Pula), approx. USD 430, or spend up to a year in prison, or both.

The interesting part is that the local news reported that they bought too many vaccines (not as many getting vax as they bargained on) and now they pull this stunt to try and vaccinate even the visitors that come in to get rid of vaccines before the first batch expires in April.”

In general, the people are confused and frightened about the change in restrictions (forced vaccination) at the borders.

“A woman and her mom came back to Botswana from South Africa, driving through the borders. They are citizens. They were both denied entry unless they get vaxxed. The woman said she does not want to get vaxxed, she is 7 months pregnant.

Her mom also has some complications, and is an elderly woman, so she also said no, she does not feel comfortable getting the vaxx. From the voicenotes [recorded audio messages] I can feel they are scared and confused. Many people are not aware of the truth, so these sudden changes really frightens them, makes them so confused, to a level that its traumatic I feel.”

Masks, Sanitizer & Distancing

Within the country itself, masking and social distancing is

required in all shops. The use of (toxic) hand sanitizer is required upon entry of all businesses. All schoolchildren wear masks.

“You cannot enter ANYWHERE without a mask. They sanitise at the entrance. It’s actually someone’s job at the entrance of each and every shop, bank, building, whatever to stand there with a spray bottle and spray those who enter.

Not so long ago the rule fell away where everyone had to enter name, phone number and address whenever entering any shop or building.

Children are forced to wear masks. The entire population are forced. Children walk around with masks the entire day, also most people, even outside.”

Like all of the world’s people, the Batswana have been deceived by the tale of a deadly virus (that doesn’t actually exist), a testing system (PCR) that sees all sorts of things but can’t see the virus that doesn’t exist, and a “cure” that involves injecting toxic sludge (with secret ingredients including [micro-circuitry](#) and strange [hydra-like biological things](#)) directly into the body.

Targeting the Children & the Vulnerable

And, as seen everywhere, the children are now a key target for this disable-and-murder globalist agenda.

“They are going for the kids, Kathleen. A big part of the Botswana population live rural without Internet or decent access to information, so they have NO clue about the dangers of the gene therapies, and happily comply, misinformed.

The attached form is the consent form the government to get kids jabbed.”

REPUBLIC OF BOTSWANA

Ministry of Health and Wellness

**CONSENT FOR COVID-19 (Pfizer-BioNTech) VACCINATION BY
PARENTS/GUARDIANS**

The COVID-19 vaccine is being offered to your child. You are encouraged to give consent for your child's vaccination. Vaccination has been shown to be beneficial in several ways including in reducing likelihood of severe infection if COVID-19 is contracted. The leaflet sent with this form includes more information about the vaccines currently in use. Please discuss the vaccination with your child and then complete this form. Information about the vaccinations will be put on your child's health records and a COVID 19 vaccination card will be provided.

Child's full name (first name and surname):	Date of birth:
Home Physical address:	Contact telephone number for parent/ guardian:
School:	Class:

Guardian relationship to client: ☐ Father ☐ Mother ☐ Legal Guardian ☐ Other

I understand that the COVID-19 vaccine is a vaccine currently being given under the Emergency Use Authorization status and only a parent or legal guardian has the authority to consent to a minor receiving this vaccine. By signing this form, I certify that I have the legal authority to do so on behalf of the minor identified above.

I understand that should I have any questions about the COVID-19 vaccine, need assistance filling out this form, or need any other information regarding COVID-19, I can contact the Ministry of Health and Wellness COVID 19 Call Centre 16649 or the nearest health facility.

CONSENT FOR COVID-19 VACCINATION (Please complete one box only)

I CONSENT that my child should receive the COVID-19 vaccination	I DO NOT CONSENT that my child should have the COVID-19 vaccine
Name & ID/Passport no:	Name & ID/Passport no:
Signature: Parent/Guardian	Signature: Parent/Guardian
Date:	Date:

"This morning I went to the primary school in the village. The kids were just getting out of school. I found one of the teachers inside and asked if I can quickly have a word.

I asked him if he was aware of the parent consent form, he kind of just nodded, so I'm not sure if he knows. Anyway, I told him that I only want to mention to them I feel the schools should also list the dangers, side effects and ingredients so that parents can give informed consent.

I told him there are hours of evidence and facts he can see in his own time, so I wrote down the grand-jury.net address so he can have a look.

I told him its not safe, have a look at the evidence. He asked me If I'm vaxxed, I said no. Then he asked how do I protect myself from Covid? I said I build my immune system by regarding food as medicine, I get sunshine on my face, I exercise, I focus on a healthy lifestyle.

I also said it's a personal choice, I choose to only put things in my body that the creator of this planet created. I also said I did deep research into the ingredients, as I am someone that will never put anything in my body if I don't know the ingredients, or origin.

I said those ingredients are not from God, so I won't put it in my body.

He had no response, so I then asked him if he knows what mRNA is? He had no idea.

I also asked him if he studied the ingredients, or asked about it before getting the shots? He said no because he trusts the government.

I ranted a little about the governments and their lies, couldn't stop myself. I showed him a page I printed where Dr. Malone states the dangers for kids such as heart, brain, reproductive and nervous system damage.

I said this is serious and its my responsibility as an informed human being to share these facts with the schools

that the government and local news don't mention."

This harm-yourself-for-your-own-good mandate follows closely on the heels of operation [Omicron](#), an imaginary variant of an imaginary virus.

PaintedWolf describes the Batswana as gentle, gullible people. Historically, they have been targeted by the parasitic humans of the planet to force them off their lands (so that these lands can be exploited for their resources), destroy their culture, and vaccinate them into poor health and/or death.

The Globalist Theft of Land and Resources

The attacks from globalists on the indigenous population is relentless. The rich resources of this peaceful country include [diamonds](#) and [oil](#). As the foreigners seek to strip the land of its resources, the disruption to the Batswana way of life, and the damage done to wildlife and natural terrain, is incalculable.

"They are on a path to destroy one of Africa's most unique Edens. I know there are very corrupt government officials involved in this saga as well. There has been an infiltration in Botswana, a very sacred land."

Image credit: [hbieser](#)

Image credit: [designerpoint](#)

image credit: [designerpoint](#)

image credit: [tonyo_au](#)

Death by Medicine

A visit to the Botswana [Ministry of Health & Wellness](#) website leads us to the usual fear-based advice and recommendations

(which have morphed into mandates) for dealing with a virus that has never been shown to actually exist. The foundations for this deception have been long established, with the usual suspects guiding the narrative. They've done this before with the [HIV narrative](#). And currently there is the [malaria vaccine](#) push, targeting the children.

As always, Big Pharma's fingerprints are all over this agenda, with the mandate that all Batswana submit to self-abuse by allowing themselves and their children (child abuse) to be injected with extremely toxic formulas disguised as cures.

However, outside of the deceptive and cruel enforcement by Big Pharma, Bill Gates et al., UNICEF and greedy globalists, the "mind virus" of self-harm exists in Africa and throughout the world in many forms. I found it surreal that the Botswana Ministry of Health & Wellness recommends [male circumcision](#) as a precaution against HIV. I asked PaintedWolf about this circumcision recommendation. He replied:

"It's not only here that they recommend male circumcision, but I have noticed it all over Southern and East Africa on billboards and advertising. They tell people this slows down the spread of HIV."

Circumcision is also embedded in African cultures. Many cultures have the circumcision ceremony that can last several days. When the boys return to village they are seen as adult men. I know in SA they encourage boys to do it at a clinic as the traditional way at a ceremony can cause serious infection."

It blows my mind that they advertise that circumcision can prevent spread of AIDS. They use slogans such as 'Be wise, circumcise'."

Globalist Destruction of the Sacred & Ancient

PaintedWolf speaks about the [Bushmen](#) people, native to southern African countries, who were forced out of their

ancient culture as nomadic hunter-gathers into restricted community areas.

image credit: [hbieser](#)

"Here the indigenous Bushman people, oldest living tribe on earth, have also undergone the same crimes on them as the indigenous tribes around the world.

In South Africa they are the first nation peoples, but their language is not even listed among the official languages. They literally have no voice in the land that birthed them.

In Botswana they were forcefully removed from their home, the Kalahari Desert. They are semi nomadic Earth Shamans, it's a belief of them to not stay in one place too long to reduce the impact they have on the land, thus semi-nomadic.

Image credit: [AinoTuominen](#)

When they have been forcefully removed from their land as hunter-gatherers, they were put into communities that are not aligned with their way of life, and are being exploited to the max by the tourism industry.

Here in Botswana there are countless safari lodges that exploit them by using them as part of their activity offerings. As they have been forcefully removed from their home ranges, put into western towns and villages, they have also lost their traditional way of dress.

Many of the lodges make them dress up traditionally, creating the idea that they still live like this.

It's a human safari."

Botswana Rise Up

In spite of the best efforts of the hidden dark agenda, the Botswana have not been defeated. Slowly people are removing the veils of cognitive dissonance and facing the truth about those who control them.

There are some legal challenges beginning to happen in Botswana with a group organizing in opposition to the

mandates. PaintedWolf will share more about these situations and the results as things unfold.

“I feel the warriors are slowly rising here. The mandates have made people ask questions and they are starting to demand answers.”

In our conversations, PaintedWolf spoke often about his love for, and communication with, animals and all of nature. About his beloved elephants, he said:

“They will lead humanity into the New World where humans will start to learn to communicate with the suppressed intelligence of the heart.”

Truth Comes to Light editor's note:

In this video, Dr. Reiner Fuellmich and Viviane Fischer of the Berlin Corona Investigative Committee share in conversation with a group of international lawyers and activists. This is part 2 of a 2 part session.

Below you'll find approximate time markers to help you locate speakers you are interested in listening to. All speakers shared testimony regarding the anti-covid mandates in their countries as well as updates on any current legal action being taken.

Of note was conversation between Reiner Fuellmich and Pastor Dr. John Mosepele of South Africa regarding the unfolding court cases as well as strong grassroots pushback via the churches.

See related update from [Ricardo Maarman on their legal challenge in South African constitutional court about whether or not the co-called COVID-19 virus has ever been isolated – whether the virus actually exists](#). This legal challenge is briefly mentioned by Pastor Mosepele.

Reiner Fuellmich: “I looks as though, really John, it

looks as though Africa will be key to all of this.”

Pastor Mosepele: “Especially South Africa...It’s the gateway to Africa. We win this lawsuit in South Africa we finish the lie in the whole continent. And then we lay a base for the whole world to rise up.”

Viviane Fischer’s Opening Statement:

Hello. And welcome to the 2nd International Legal Offensive Session of the German Corona Investigative Committee. The Corona Investigative Committee has been – was founded in June of last year and ever since then we’ve been investigating and analyzing the corona virus and lockdown crisis. And, in the meantime, we’ve been expanding our connection with the legal activities from outside of Germany. So we’ve been talking to lawyers from the U.S. and England and other places in the world in order to find out what’s going on on the legal side in these countries – and what the status of the legal system is. And we’ve been rather shocked last time. Last week we had the first session – how devastated the legal system is in the meantime, or has become in the meantime, in quite a few other places. And today we’re back to talk to lawyers and activists from other places in the world...

00:03:00 – **Antonios Papantoniou**, Lawyer, Greece

00:28:00 – **Nikolaos Karvelos**, Lawyer, Greece

00:45:00 – **Jean-Pierre Joseph**, Lawyer, France

Jean-Pierre Joseph shares about a class-action against abusive confinement based on PCR tests. The case will be presented on the 6th of May in the civil court of Paris. They have approximately 1,300 applicants. They are

addressing the fact that the government banned the use of safe, alternative medications for treatment of "covid".

01:02:00 – **Pastor Dr. John Mosepele**, Pastor, South Africa

Brief excerpts:

Pastor Mosepele: "It looks like corona is not in any lab anywhere in the world. It's not isolated. It's not purified. So, the PCR tests, what are they for?"

He spoke about how they are working through the churches to share correct information, to establish communication channels and to wake people up.

Pastor Mosepele: "I'm told that at the end of June in South Africa we will be receiving Pfizer's – 88 million vaccines of Pfizer. We want to move to the constitutional court before that. We want to stop it. We want to move fast."

Reiner Fuellmich: "We understand that South Africa, and probably the entire continent of Africa, is going to be key to what is going on...Because unlike in any other country where the churches are a complete disaster, in South Africa the churches are still capable of talking to the people and giving them the real information. "

Pastor Mosepele: "We need to move quickly, with proof, and go before the courts, like I said. Challenging regulations is a waste of time. They keep changing them. We have to go to the core of the issues. We have to attack the real issues. Where is corona? Why the PCR testing? What is in the vaccines? What are the contents of the vaccines that you are vaccinating? Because we are told that it's not even a vaccination against corona, it's trials... We want those things to be spoken and opposed in the highest court in the country so that they can be held responsible..."

Reiner Fuellmich: "It looks as though, really John, it looks

as though Africa will be key to all of this.”

Pastor Mosepele: “Especially South Africa...It’s the gateway to Africa. We win this lawsuit in South Africa we finish the lie in the whole continent. And then we lay a base for the whole world to rise up.”

01:27:00 – **Uriel Cohen**, Israel People’s Committee, Israel

01:35:00 – **Rolem Brown**, Lawyer, Israel

Brief excerpt:

Rolem Brown: “The additional problem that they’re facing is that once you’ve gotten vaccinated it’s going to be almost impossible to listen to the other side – because what is the other side going to tell you? You may die.. No one wants to hear this. However, they’re not all going to die. That’s what Pastor John told us. There is hope even for those people. But they’re in grave danger. “

01:54:00 – **Tamir Turgal**, Lawyer, Israel

Brief excerpt:

Tamir Turgal: “My people have a vow. It’s ‘never again’. And we’re the grandsons. And we will fulfill this commitment. It will never happen again. And what they’re trying to do right now, we will not let it happen.”

02:12:00 – **Tom Renz**, Lawyer, Ohio, USA

Brief excerpt:

Tom Renz: “What I’ve done is, I’ve very slowly and very carefully developed a team of people that I trust who are helping me with litigation. So we have litigation going in a number of states against the federal government. We’re getting ready to launch another wave of litigation and it will be absolutely massive. We’re working right now – and I

can't discuss the details – but we're working right now with some funders who may allow us to do some things that we wouldn't have imagined possible..."
