

A Remarkable Vaccine Research Event Has Occurred: What Is It?

Source: [Activist Post](#)

by Catherine J. Frompovich

December 10, 2018

Ever since the 2004 “CDC DeStefano Autism Study” regarding the MMR vaccine ‘*not causing*’ Autism was published, there’s been a lot of scientific “flack” back and forth. None more riveting than what one of the original CDC epidemiologists, William Thompson, PhD, divulged in recorded phone conversations with Brian Hooker, PhD, father of an autistic son, and as exposed in the documentary [VAXXED, From Cover-up to Catastrophe](#).

Dr. Hooker, upon ‘dissecting’ the original CDC 2004 study, wrote a paper “[Measles-mumps-rubella vaccination timing and autism among young african american boys: a reanalysis of CDC data](#)” explaining his findings, which was published in journal [Translational Neurodegeneration](#) 2014 3:16.

The *Conclusions* of that published paper, which apparently pissed off HHS/CDC/FDA and Big Pharma, stated the following:

Conclusions

The present study provides new epidemiologic evidence showing that African American males receiving the MMR vaccine prior to 24 months of age or 36 months of age are more likely to receive an autism diagnosis.[CJF emphasis]

Wow! All types of scientific-consensus ‘hell’ followed with

the end result being [Retraction Watch](#) published the following:

[Journal takes down autism-vaccine paper pending investigation.](#)

Well, recently Attorney Robert F. Kennedy Jr's ***Children's Health Defense*** published what appears to be a rethinking by the medical profession – *and its journals* – that there is scientific merit in Dr. Hooker's findings, especially since ***they confirm, and IMPACT***, a medical-social, *maybe racist implication*, affecting young black boys under three years of age, who were vaccinated with the MMR vaccine!

A hugely deliberate *collusion and conspiracy effort* by CDC researchers intentionally excluded implicating data sets for young black boys regarding the MMR vaccine, *which Dr. William Thompson confirmed were omitted*, then subsequently turned over substantiating documents (*about 100 thousand files?*) to Florida Rep. Bill Posey, who asked for a congressional investigation over 4 years ago, but nothing has been undertaken to date!

https://youtu.be/8UWPjUSo3_k

However, what has happened could be considered earth-shattering since ***Children's Health Defense*** revealed Dr. Hooker's [Reanalysis of CDC Data on Autism Incidence and Time of First MMR Vaccination](#) was published December 7, 2018 in the [Journal of American Physicians and Surgeons.](#)

Thank you to the editors at the ***Journal of American Physicians and Surgeons*** for bringing an open discussion to the serious issues of **vaccine/vaccination consensus-science, fraud and misrepresentations** by vaccine makers, the HHS, CDC, FDA, and individual 50 states health agencies.

Please let this be the beginning of cooperative efforts regarding vaccine issues.
