March 31, 2021

Yesterday I had the privilege and the honor to speak with Alec Zeck, John Blaid, Mike Donio, and Jacob Diaz about the claims made regarding the isolation and existence of "SARS-COV-2" by Dr.'s Malone, McCullough, and Cole. In this video, we address specific points they made such as whether or not:

1. Cultivation in cell culture is "isolation" of a "virus?"
2. Koch's Postulates had been satisfied for "SARS-COV-2?"
3. The effect a drug has can be considered proof of the existence of a "virus?"
4. The electron microscopy images taken from unpurified cell cultures are proof of "virus" particles?
5. The particles assumed to be "viruses" are purified and isolated directly from the samples of a sick patient?

It was a pleasure to be a part of this conversation! I hope

that you are able to come away with a better understanding as to why the evidence for the existence of “SARS-CoV-2,” or any “virus” for the matter, is entirely lacking and unscientific.

Addressing Dr. McCullough, Dr. Malone, and Dr. Cole's SARS-CoV-2 Claims: Where's The Evidence?

Video available at The Truth Seeker (John Blaid) [BitChute](#) and [Odysee](#) channels.

Mike Donio, John Blaid, Jacob Diaz, Mike Stone, and Alec Zeck filmed a response to claims made by Dr. Peter McCullough, Dr. Robert Malone, and Dr. Ryan Cole regarding virus isolation and the existence of SARS-CoV-2 during an episode of The StreetMD Show hosted by Dr. Jo Yi on the Ickonic platform. The overall stance held by the speakers is simple: the claims made by these three gentlemen lack both in context and in substantial evidence to support the notion that SARS-CoV-2 exists as a pathogenic disease causing agent.
