

# Alberta Government's Own Data Shows Hospital Bed and ICU Utilization at Five-Year Low

## [Alberta Government's Own Data Shows Hospital Bed and ICU Utilization at Five-Year Low](#)

by [Justice Centre for Constitutional Freedoms](#)

May 5, 2021

**CALGARY:** The [Justice Centre for Constitutional Freedoms](#) today released extensive [government data](#) (see links and images throughout) showing that Alberta's hospitals are not overcrowded, are in no immediate danger of being overwhelmed,

- The above chart represents the maximum number of ICU beds required at some point in each month.
  - Dataset does not provide for the number of days the ICU was in this position. It only indicates a minimum of 1 day.
  - For the 5 year period 2016-2020:
    - Lowest maximum utilization was April - July 2020
    - Highest maximum utilization was December 2020

Source: Data from Justice Centre FOIP Request to AHS

Alberta Government data contradicts the assertion of Premier Jason Kenney that further restrictions on *Charter* freedoms of

and haven't been in serious danger of turning away patients for more than a year.

association and peaceful assembly, and the shutdown of personal wellness, bars, restaurants and small businesses, are necessary to protect Alberta's health-care system from being "[overwhelmed](#)." On Tuesday, May 4, 2021 Jason Kenney [announced](#) a fourth wave of extreme lockdown measures including closing hair salons, tattoo shops, personal wellness services, schools, post-secondary institutions and outdoor patios, among other closures.

Evidence uncovered by the Justice Centre through [Freedom of Information](#) (FOI) requests reveal that regular hospital beds as well as Intensive Care Units were in [significantly less demand](#) and [usage during 2020](#) and 2021 than in any year as far back as 2015. In fact, [2020 ICU admissions](#) were at their lowest level since 2015. ([FOI Request](#))

In January 2021, bed utilization was 90.12%, compared to 95.21% bed utilization in January 2020. The same pattern is repeated for February 2021, when Alberta was eleven months into lockdown restrictions. [View the dataset.](#)

In March through May 2020, [bed utilization plummeted](#), likely as a result of lockdown cancellations of more than 22,000 scheduled surgeries, which resulted in the death of Gerry Dunham in Medicine Hat. In early 2021, the 93% utilization rate was below the 96% level recorded in the years [2015 through 2019](#).

The government has not provided further ICU utilization numbers for 2021. However, during the last quarter of 2020, ICU utilization province-wide was comparable to, or less than, previous years. There was a slight rise in December 2020, but ICU spaces in Alberta were still well below full capacity.

On 3rd April 2020, the Alberta government had 1,935 acute care beds available for COVID-19 patients. According to a [modelling document](#) the government posted on its website on April 8, 2020, AHS planned to expand the number of acute care

beds dedicated to COVID-19 patients to [2,250 by the end of April 2020](#). The same document also stated: "AHS plans to be able to increase ICU capacity by 1081 beds for COVID-19 patients by the end of April, if necessary."

"Obviously the Alberta government has failed to follow through on these [commitments made in April of 2020](#). Creating necessary capacity to treat patients would have cost a lot less than the daily damage that lockdowns inflict on Alberta's society and economy, and the physical, mental, emotional and financial well-being of Albertans," states lawyer and Justice Centre President John Carpay.

"We are now in our fourteenth month of *Charter* violations and economic destruction. The government has had ample time to increase hospital and ICU capacity, but instead blames Albertans for trying to live their lives normally," concludes Mr. Carpay.

Month	2020	2021	2020	2021	2020	2021

## Province of Alberta ICU Average Utilization 2020

- Grey area is the number of funded beds available per dataset.
- Yellow area is the average number of ICU beds used per month per dataset.
- Red area is the average number of ICU beds occupied by Covid patients per GOA website.
  - This area is also part of the yellow area and is not separated from it.
- Green line is the actual number of ICU beds occupied by Covid patients per GOA website.
- Other than November/December the average number of Covid beds required in ICU was negligible.

At no point throughout the year was the average number of beds above capacity of "budgeted" beds.

**Source: Data from Justice Centre FOIP Request to AHS**

**Table 1. ICU Admissions by Zone, Site and Calendar Year**

		Calendar Year					
Zone	Site	2015*	2016*	2017	2018	2019	2020
1 - South Zone	Chinook Regional Hospital	75	975	967	1,000	885	629

Note: \* Incomplete data for some ICU units in 2015/2016, before electronic records

### **Province of Alberta Actual ICU Utilization - With Modeling Built In**

On April 8 the Government of Alberta released a model in which they stated the following was being done:

---

## **Building Acute Care Capacity**

- **AHS plans to have 2,250 COVID-19 designated acute care beds by the end of April:**
  - As of April 3, 2020, 1,935 are available for COVID patients; and
  - New COVID dedicated spaces are being brought online.

And;

---

## **Building ICU Capacity**

- **AHS plans to be able to increase ICU capacity by 1081 beds for COVID-19 patients by the end of April, if necessary.**
