

An Easter Message of Hope From World Doctors Alliance: “The Tide Has Turned”

[An Easter Message of Hope From World Doctors Alliance:
“The Tide Has Turned”](#)

“Each and every one of us can do something. Each and every one has been given that power by almighty God. I’m not religious but I do believe there’s a higher power. So each and every one of you, tune into what you feel is right for you. Stand up for the truth.

Right now, more and more doctors are coming forward. More and more nurses are coming forward. More and more lawyers are coming forward.

And right now, I think, we’ve got the best legal team we’ve ever had in place to protect you. Doctors and nurses and scientists must blow the whistle. They must whistle blow. And we now have the teams in place to protect you.

Freedom of speech is our God-given right. We must use it. We must. Now’s the time to speak out. We can end this madness right now. I want to wish you all a very happy Easter. God bless you. We can do this. We are winning. The tide has turned.”

~ Dr. Zac Cox, England

###

“The world that we see outside of us is not “out

there". It's within each of us.

What we're seeing right now, before our very own eyes – any injustice, any separation, anything that's not right, that's causing suffering to any one of our brothers and sisters – is because of the consciousness of fear that has led our planet up to this point in time.

In order for us to change what we see outside, we must address the fear within ourselves. We must align to the power within us which is connected to our love and our unity – between one another – and the fact that we all are equal and we were created from a creator, from divinity, from something beyond our understanding. But we do feel it within our hearts.

And right now, I'm asking every one of you to connect to the power of your heart, to not be led by fear, connect to the truth, connect to what you know is right, and act from that love and that truth."

~ Dr. Neda Amani, Canada

###

"The message of hope is to stand in truth, to stand in freedom, to stand in accountability and justice. And that we are already building a fabulous, wonderful new world. So the message of hope is there is prevention and treatment if you are worried..."

"There is absolutely no need for the lockdown... There is also no need for the elderly to be isolated in care homes. There is no need for masks on anyone or social distancing, especially young children and our teenagers. There is no need and no justification or rationale for any injections or vaccinations,

especially the mRNA that are clearly causing more severe adverse events and death..."

"And the message of accountability is that people who may not have been aware now have an opportunity to actually stand up and say they may have been misled, they may have been told not entirely the truth. They have to stand in their duty to their patients or to their students or to the people who have elected them to say: Wrong has happened. We will stand and be held to account and acknowledge the wrong and build a better world..."

"We will walk away from the lies and the fear that has been happening for the past year and into a world where politicians, doctors, teachers and everyone is accountable under the law and for the moral and ethical duties, to do no harm, to provide prevention and treatment. And to build a better world, not just for us in our lives today but for the children that are alive now, the generations to come. And to communicate that all of us have, under the natural law... freedom of speech, freedom of travel, freedom to have autonomy and decide what goes into our body – bodily integrity, and freedom to live in a world where justice is actually upheld by the courts and politicians and the police."

~ Professor Dolores Cahill, Ireland
