December 5, 2022

Speaking at [General Assembly Meeting #68](#) on Monday, December

5, Arthur Firstenberg () gave an eye-opening presentation on the harmful effects of wireless technology.

Who is Arthur Firstenberg?

- Arthur Firstenberg is a scientist, journalist and author who is part of a growing worldwide movement to bring attention to the most ignored threat to life on Earth. His book, [The Invisible Rainbow: A History of Electricity and Life](#), is the first book to tell the history of electricity from an environmental point of view.
- The [Cellular Phone Task Force](#), an organization he co-founded in 1996, provides a global clearinghouse for information about wireless technology's harmful effects, and a support network for the millions of people injured by this tech.
- Firstenberg is the Administrator and Co-author of the [International Appeal to Stop 5G on Earth and in Space](#). To date, the Appeal has more than 300,000 signatures from 214 countries and territories, including 3,000 environmental organizations, 7,000 scientists, 4,300 medical doctors, 13,900 engineers and 1,500

beekeepers.

- After graduating Phi Beta Kappa from Cornell University with a B.A. in mathematics, he attended the University of California, Irvine School of Medicine from 1978 to 1982. Injury by x-ray overdose cut short his medical career.
- For the past 41 years, Arthur Firstenberg has been a researcher, consultant and lecturer on the health and environmental effects of electromagnetic radiation.
