Excerpts from Transcript:

Michael Swinwood

...Here’s an intelligent human being. Criminal law lawyer.

Very, very experienced. Very sharp. Very street smart. In complete fear. And not wanting to investigate because "those people" [Fauci et al.] are intelligent and they're telling the truth.

So, that consciousness is predominant. It's in a lot of places. Where people do not wish to make the investigation. So this is where the danger lies. The danger lies in those who don't want to pay attention to what's happening around them, see what's happening around them, and do something about it.

They are quite content to listen to officialdom lying to them and then follow their instructions. That's what the problem is. 100%.

You can lead a horse to water but you can't make 'em drink. And the horse has to be thirsty.

~~*

So the consciousness of humanity is really what's at play here. And how we're able to influence or raise the consciousness of humanity is really the task.

~~*

The consciousness is stuck. The reason it's stuck is because of brainwashing.

~~*

The idea that we're operating under the rule of law it's not so. We're operating under the rule of covid. And the rule of covid is: There's a pandemic and you should shut up.

By increments we're implementing tyranny... So, why is there a spiritual component to this?... Well, the essence of the spiritual component is, number one – all of us are divine beings having a physical experience, that's the first thing. People don't know, people don't understand that aspect of things because of dogma. **The dogma has been put on people to take away the idea of their own divinity and put it in the hands of someone else. Between you and Spirit. And, therefore, that tyranny started with that idea.**

That laying dogma on people and pulling them away from their own relationship to Spirit. So what we have to come to grips with as human beings, as individuals, is our own connection to Spirit. Because everything that you see everywhere happens because of Spirit. It's the breath of the divine that allows everything to grow and breathe and be. And so within that, that's a very powerful force.

Much more powerful than the tyrannical force of this insane consciousness that is imposed on humanity. It represents the dark force. And what we represent in the end is the light force.

So, therefore, we have an added reservoir in addition to law. And what that added reservoir is our relationship to Spirit that we can connect with every single day. And, therefore, give yourself the ability to have magic, magic, come into your life. And you'll be amazed at how things will change just by virtue of making that connection...

I am a firm believer that if we think that way and act that way that it's going to impact the agenda... I think you've put your finger on it before – they're bound to make mistakes. They're bound to make mistakes. And we have to be alert to the mistakes they make and go where that entry allows us. So I think the combination of and a real understanding of our

connection to Spirit, and enforcing that upon ourselves every day – in other words, making a remembrance...

Reiner Fuellmich

I think we're all in agreement on this. I wouldn't have said a little more than a year ago, but if you look at what's happening it's global insanity and there's no other way to make sense of this than on a different level. And that – what else can it be than spirituality. And the law alone won't suffice this time.

Dominic Desjarlais

I agree it's a combination of both. Do our job as lawyers. But also, our job as lawyers has to be to educate people and raise people's consciousness and awareness about this whole thing.

Michael Swinwood

So that leads me to the second thing is – Do you think we can organize enough lawyers to take an approach together to either in the International Rights Tribunal or some other international forum?

Reiner Fuellmich

*Yes, I do. In fact, Michael, when we started today's session – hours and hours ago – we started with the German portion. And there's a former judge who's advising us and who has been advising us for a while. He's a retired judge. He is a – he and his wife are child activists. Very smart man. Very experienced. **And we, all of us, are beginning to realize that this is about the children. And he – it is about institutionalized child abuse. Probably much worse...***

This group of lawyers plus this group of experts that we have – yes, we are a very powerful group of people and we can even make it to the International Human Rights Court or the International Criminal Court.
