Google is so powerful it “hides” other search systems from us. We just don’t know many of them exist

There are still a huge number of excellent searchers in the world who specialize in books, science, other smart information.

Keep a list of sites you never heard of:

www.refseek.com – Academic Resource Search. More than a billion sources: encyclopedia, monographies, magazines.

www.worldcat.org – a search for the contents of 20 thousand worldwide libraries. Find out where lies the nearest rare book you need.

<https://link.springer.com> – access to more than 10 million scientific documents: books, articles, research protocols.

www.bioline.org.br is a library of scientific bioscience journals published in developing countries.

<http://repec.org> – volunteers from 102 countries have collected almost 4 million publications on economics and related science.

www.science.gov is an American state search engine on 2200+ scientific sites. More than 200 million articles are indexed.

www.pdfdrive.com is the largest website for free download of books in PDF format. Claiming over 225 million names.

www.base-search.net is one of the most powerful researches on academic studies texts. More than 100 million scientific documents, 70% of them are free.”
