Update: October 21, 2021 — We have been advised that the ladies in this video have retracted their statement. If this can be verified, additional information will be posted here and a general retraction will be posted at this site. [Here is one link that refutes the claims made by the ladies.](#) All references to facebook require a login. Many of us have had our accounts deleted by fb long ago, so we can't view anything being shared there. If you find information related to this story at sites other than fb, please send our way.

Truth Comes to Light editor's note:

Reports are coming from Black Lake Denesuline First Nation Territory that women and children are being forcibly taken for vaccination and that military is present there. The unverified reports are saying that many women, desperate to get away from what they know are highly toxic – even deadly – injections, have taken their children and are hiding outdoors in the freezing cold weather. See video below.

Black Lake Denesuline First Nation (Black Lake) is a community located in Northern Saskatchewan's Athabasca Basin region, approximately 1,180 km northwest of Prince Albert. Black Lake is a member of the Prince Albert Grand Council, and is governed by a chief and councillors. Black Lake has a registered membership of 2,151 band members, with 1,315 of those members living on reserve as of April, 2017. – <https://blacklakefirstnation.ca/>
