August 23, 2021

The fix is in.

We're racing from "emergency use authorization" of experimental vaccines to "full approval." Boom.

Despite the promise of "transparency" prior to giving full approval to the COVID vaccines, the FDA is set to give its final green light today, or later this week. It's a slam-dunk.

And there is NO public hearing.

This means the vaccine marketing/intimidation/mandate campaigns will ramp up much higher. "Well, now there is NO reason for anyone to refuse the shot. The FDA states it is completely safe and effective."

Obviously, the FDA didn't want to allow even mainstream "experts" to speak in a public hearing before approval; the

agency is running a very tight ship. No slip-ups. No defections.

[An 8/20 article in the BMJ](#) (*"Covid-19: FDA set to grant full approval to Pfizer vaccine without public discussion of data"*) quotes a few of these dissenting mainstream pros. For example:

"Kim Witczak, a drug safety advocate who serves as a consumer representative on the FDA's Psychopharmacologic Drugs Advisory Committee, said the decision removed an important mechanism for scrutinising the data."

"'These [FDA] public meetings are imperative in building trust and confidence especially when the vaccines came to market at lightning speed under emergency use authorisation,' she said. 'The public deserves a transparent process, especially as the call for boosters and mandates are rapidly increasing. These meetings offer a platform where questions can be raised, problems tackled, and data scrutinised in advance of an approval'."

"Witczak is one of the more than 30 signatories of a citizen petition calling on the FDA to refrain from fully approving any covid-19 vaccine this year to gather more data. She warned that without a [public FDA] meeting 'we have no idea what the data looks like'."

"'It is already concerning that full approval is being based on 6 months' worth of data despite the clinical trials designed for two years,' she said. 'There is no control group after Pfizer offered the product to placebo participants before the trials were completed'."

"'Full approval of covid-19 vaccines must be done in an open public forum for all to see. It could set a precedent of lowered standards for future vaccine approvals'."

Understand—this devastating criticism of the FDA is coming from a person who operates WITHIN the public-health

establishment.

Amidst a tsunami of reports of vaccine injuries and deaths from around the world, the FDA is proving it is an agency that will certify maiming and killing without hesitation.
