

Call to Action: Join RFK, Jr. and Children's Health Defense in Urging the FDA to Slow Down the COVID-19 Vaccine Approval Process

[Call to Action: Join RFK, Jr. and Children's Health Defense in Urging the FDA to Slow Down the COVID-19 Vaccine Approval Process](#)

by [Children's Health Defense](#)

December 7, 2020

On December 4, Robert F. Kennedy, Jr. [sent a letter to Peter Marks](#), Director of the Center for Biologics Evaluation and Research's (CBER), on behalf of Children's Health Defense (CHD) asking the Food and Drug Administration (FDA) to take a cautious approach in approving COVID-19 vaccines that have been developed at "warp speed." Considering that almost [\\$4.5 billion](#) has been paid out to vaccine injured individuals from vaccines developed in traditional timelines, caution, and concern for human safety should be the FDA's top priority in the approval process.

This coming Thursday, December 10, CBER's [Vaccines and Related Biological Products Advisory Committee \(VRBPAC\)](#) will meet in open session to discuss Emergency Use Authorization (EUA) of the Pfizer-BioNTech COVID-19 vaccine for the prevention of COVID-19 in individuals 16 years of age and older. CHD asks that you take the following steps to urge VRBPAC to make safety the chief concern in its considerations:

1. Send RFK, Jr.'s letter to CBER Director Peter Marks to both [Marks](#) and [Senator Ron Johnson](#) of Wisconsin, chair of the [Senate Homeland Security and Governmental Affairs Committee](#) who has expressed similar COVID vaccine safety concerns.
2. Send the letter below to your representatives in the House and Senate letting them know that you support Mr. Kennedy's call for caution in making decisions regarding emergency use authorization of Pfizer's COVID vaccine as well as any other COVID vaccine in development.

With the VRBPAC meeting coming up so quickly, the time to act is now.
