

Eyewitness Proof That People Were Intentionally Trapped to Prevent Their Escape From the Lahaina Immolation

[Eyewitness Proof That People Were Intentionally Trapped to Prevent Their Escape From the Lahaina Immolation](#)

by [Edward Hendrie](#), *Great Mountain Publishing*

September 20, 2023

Below is the [shocking testimony of Ann Williams](#) before the Disaster, Resilience, International Affairs, Planning Committee of the Maui County Council. Williams once lived at the now-destroyed house at 457 Lahainaluna Road in Lahaina, Hawaii.

She explains how the people fleeing Lahaina were intentionally trapped in the city to prevent them from fleeing the imminent immolation of Lahaina. From what she saw, Williams concluded that **“it’s obvious we were intentionally trapped.”**

The Lahaina immolation was intended to kill as many residents as possible.

The cover story for preventing people from gaining access to roads out of the city was the danger of electrocutions from downed power lines.

There are two problems with that argument.

1) [The power company had shut down power to Lahaina shortly after 9:00 a.m. that morning.](#) The police command knew this. Thus, there was no danger of electrocution in the afternoon

when people were fleeing the city.

And 2) there were no power lines down on the main highway going north out of Lahaina.

Nonetheless, police blocked access to that highway ensuring that people would be trapped and killed in Lahaina. Ann Williams stated, in pertinent part:

We did Escape out the Fleming's Chart House exit to go north. We went North free sailing at that point after Flemings, got out there, they hadn't blockaded us yet.

I was one of the lucky few that got out that way.

No power lines whatsoever. It was a safe exit all the way North and we got to Honokowai that way.

After me though they decided to block it.

And there were still no power lines down because I did come out the next morning and I saw the death trap. It was where there were no power lines still yet the following morning.

Everybody could have gotten out. Everybody could have gotten out. It was free sailing going north.

But the police officer there quote unquote from direct other residents who talked to him were walking, saw all the cars stopped.

They finally walked all the way up to the front at the exit; policemen standing there and the guy said to the policeman there's a fire, the fire is coming, you got to let these people go.

[The policeman responds,] "I've got orders."

We need to investigate that. Who is giving these cops orders? I mean if the police officer might be taking orders. It's not his fault personally. But there's somebody above him that did

this and they need to investigate that.

*And then John said the far end of Front Street was blocked, bringing him in that way, and then blocked this way. **It's obvious we were intentionally trapped.***

And I hope that this gets investigated further. And I have the eyewitnesses who have spoken to that cop directly. Thank you.

~ Testimony of Ann Williams

Ann Williams' testimony is corroborated by another eyewitness, who goes by the nickname, "Fish." He stated that police blocked traffic to prevent residents from fleeing the immolation of Lahaina.

There was no logical reason for the police to block cars fleeing the destruction of the city other than to ensure as many people died as possible. The witness describes the actions of the police as ["a combination of stupid and evil."](#)

The video of that witness' account has since been made [private on YouTube](#). However, [another video](#) of his account of the police blockade can be found below.

Ann Williams' and Fish's testimony sheds light on the experience of Jonathan Herzog. [Herzog's video](#) below reveals how police kept rerouting traffic in a circle through Lahaina in a way that prevented the people from leaving Lahaina as the city was being immolated.

As you watch the video, keep in mind that the police had continuous radio communication with their command center, which is orchestrating the traffic around Lahaina. Although electrical power was down, the police station had backup generators to power the command center.

Nobody knows the streets of the city better than the police department. The command center had the big picture. This was

not a mistake. The command center knew that the rerouting of the drivers in a loop through Lahaina corralled the drivers so that they could not leave Lahaina.

Herzog's video starts on the morning of August 8, 2023, as he is leaving Lahaina to drive north to Napili. But he was prevented from leaving by a police blockade of the road.

The video picks up again at 2:56 p.m. when he decides to travel south to Kihei. At the 2:41 mark in the video, he is driving southbound on Front Street in Lahaina. But at the 2:50 mark in the video, we see him driving northbound, he puts a caption indicating that "THEY KEPT DETOURING US IN CIRCLES AND THEN I START TO SEE SMOKE." At the 3:17 mark in the video, we see that he is back traveling southbound on E 30 passing Dickenson Street.

At the 4:50 mark in the video, we then found him rerouted to drive northbound on Front Street.

At the 5:22 mark in the video, he is once again traveling southbound (probably on E 30) passing the intersection of Papalaua Street.

At the 6:50 mark in the video, he is traveling southbound, he sees the billowing smoke behind him and comments that there is a fire behind him and he is trying to get away from the area.

But at the 7:30 mark in the video, he is rerouted to northbound Front Street for the second time, which is right back into the fire that he saw earlier.

He soon realizes the peril he has been guided into. As the smoke approaches closer and closer he decides to park his car at Kingdom Hall and walk to the boat landing and pier. He eventually walks northbound along Front Street and out of Lahaina to safety.

[How many of the people who got trapped in their cars on Front](#)

[Street did not make it?](#)

Jonathan Herzog's Lahaina Escape

[Expert Forensic Arborist Explains That Unburned Trees Are Clear Evidence Lahaina Was Hit by Directed Energy Weapons](#)

by **[Edward Hendrie](#)**, *[Great Mountain Publishing](#)*

September 3, 2023

Robert Brame is a forensic arborist with more than 38 years of experience. In the [video](#) below, he takes us through the evidence indicating that the Lahaina immolation was not a natural fire. He opines that it was some kind of directed energy weapon using microwaves. Most notably, he points out that the Lahaina trees appear stressed and probably dead or dying, but the branches and leaves did not burn. He points out that the trees have had the moisture sucked out of them, much like a microwave oven does to a piece of bread.

He makes note of the fact that the windows in the cars are all melted. That would be impossible for a wildfire, which burns at 1,447 degrees Fahrenheit. It would take a temperature of at least 2,500 degrees Fahrenheit to melt glass. Many of the cars are nowhere near any source of fuel that could burn at that temperature. Even gasoline would not burn at that temperature.

A hydrocarbon fire in the atmosphere burns at a maximum temperature of 1,517°F; 825°C.

Brame has personally investigated more than one hundred alleged wildfires. He opines from his on-the-scene observations that 35 wildfires he investigated were caused by directed energy weapons, with the primary electromagnetic energy being in the microwave frequency. He offers that opinion due to the nature of the damage, where metals are destroyed, and wood and plastics are not burned unless they are in close proximity to a dense metal.

Directed energy weapons involve a range of focused energy technologies, including, but not limited to, lasers, microwaves, sound beams, and particle beams. [The U.S. Air Force Research Laboratory \(AFLR\) Directed Energy Directorate explains:](#)

The two classes of DE [directed energy] weapons, high-energy lasers and high-powered microwave systems, give the Air Force the capability to engage targets at substantial ranges with precision and reduced collateral damage. In high-energy laser systems, rather than using a kinetic weapon as a bullet or a bomb, a laser beam creates an effect on [a] target. High-powered microwave systems transmit short, extremely high power burst[s] of energy to create a wide range of effects on a target, often electronics.

Directed energy weapons were deployed to destroy the World Trade Center Towers on 9/11. I explain their use in my book, [9/11-Enemies Foreign and Domestic](#). Read [Dr. Judy Wood's](#) analysis of the evidence proving that directed energy weapons were used.

The government is nothing but force. We must look at money powers behind the scenes who really control the force of government. The 9/11 attack using directed energy was the

first salvo in the new war for world dominion. The powerful Zionists who control the U.S. Government are ramping up their attack on the U.S. through directed energy. They are doing so under the cover story of wildfires caused by the mythical "climate change."

The most notable fact is that the palm trees survived the fires. Palm trees are particularly susceptible to ignition. They are like dried grass. A small flame will cause a dried frong to ignite in seconds. Yet we find unburned palms trees that survived an alleged wildfire that immolated houses and cars. The trees are wilted because the microwave directed energy weapon sucked the moisture out of the trees, but they did not burn. Much like how moisture is cooked out of bread in a microwave oven. That is clear evidence that the immolation of Lahaina was from directed energy weapons.

Revisiting Paradise California – Where Are the Chimneys?

[Revisiting Paradise California – Where Are the Chimneys?](#)

by [Edward Hendrie](#), [Great Mountain Publishing](#)

August 29, 2023

In the pictures below, we find that the houses in Paradise,

California destroyed during the alleged wildfire on November 8, 2018. Notice that unburned trees surround the houses razed to the ground.

How could the houses be destroyed by a wildfire fed by burning trees when none of the trees in the forest surrounding the homes burned? The answer is disturbing, but it is the only logical answer: the buildings were immolated through directed energy weapons.

The unburned trees are a clue that directed energy weapons were used. One of the two principal directed energy weapons uses microwaves. Microwaves have little effect on wood and paper because they absorb little of the microwaves. It is similar to putting a paper plate in a microwave oven. It will not burn. But putting aluminum foil into that same microwave oven will spark and catch fire. Another directed energy weapon developed by the military uses lasers, which are able to burn wood and other combustible materials.

Another clue that directed energy weapons were used is the absence of fireplaces or chimneys in the remnants of the immolated houses. Ordinarily, a chimney and fireplace will remain standing after a house is burned down. That is because the fireplaces and chimneys are designed to withstand the heat of fires. But directed energy weapons work on a different principle. They are a form of electromagnetic energy that affects material at the molecular level. Heat results in the process of destruction, and often there will be fire. But the microwave directed energy weapons destroy material by affecting the molecular bonds. Thus, the directed energy weapons can destroy chimneys and fireplaces, where those same chimneys and fireplaces would withstand the heat of an ordinary fire. The absence of chimneys and fireplaces is evidence that directed energy weapons were used to raze the houses to the ground.

Above and below are some of the homes that were destroyed during the alleged November 8, 2018, wildfire in Paradise, California. The problem is that the trees that are supposed to have caused the immolation of the houses are still standing and show no sign of any fire damage.

One notable feature of the house that have been completely razed to the ground is that most houses have no remaining chimneys or fireplaces. In an ordinary house fire, the fireplace and chimney typically remain because they are designed to withstand the heat from a fire.

There is only one way to cause the kind of selective destruction where fireplaces and chimneys are destroyed but combustible trees remain: directed energy weapons. There are two principal kinds of directed energy weapons, microwave and laser. Microwave directed

energy weapons affect dense materials causing destruction at the molecular level, but will not burn trees. Laser directed energy weapons will ignite wood and trees.

Above are the remains of the Brennan House in Wellfleet, Massachusetts, which was believed to have been destroyed by an arsonist in 2017. Notice that the chimney and concrete foundation remained. It is typical in a house fire to find the chimney and fireplace remaining because they are designed to withstand the heat of fires. Compare that to the houses in Paradise, California, that were allegedly razed to the ground by wildfires. But there are no remaining chimneys on any of the immolated homes.

Directed energy weapons decimate around 14,000 homes in Paradise CA

The Dog That Didn't Bark: On Why Lahaina's Disaster Warning Alarms Did Not Sound

[The Dog That Didn't Bark: On Why Lahaina's Disaster Warning Alarms Did Not Sound](#)

by [Edward Hendrie](#), [Great Mountain Publishing](#)

August 21, 2023

In my [August 11, 2023, article](#), I explained the evidence that a directed energy weapon was used to destroy Lahaina, a city on the Island of Maui in Hawaii. The only culprit who could possibly have used such a weapon is the U.S. Military. The

cover story for the destruction of Lahaina was that out-of-control wildfires caused it.

On [August 20, 23, I revealed in an article](#) that within 40 miles of Lahaina on the Island of Maui is located the Air Force Maui Optical and Supercomputing (AMOS) site, which is part of the AFLR Directed Energy Directorate. The AFLR states “the Directorate develops and transitions technologies in four core technical competencies: laser systems, high power electromagnetics, weapons modeling and simulation, and **directed energy** and electro-optics for space superiority.”

The disaster warning alarms did not sound to warn that alleged fires were about to engulf the Maui city of Lahaina. The silent sirens on Maui now speak loudly about who was behind the destruction of Lahaina. In one of Arthur Conan Doyle’s Sherlock Holmes stories, [“Silver Blaze,”](#) the famous fictional detective deduced the murderer’s identity because a guard dog failed to bark at the time of the murder. Sherlock Holmes deduced that the murderer must have been the dog’s master. It is the same with the sirens not sounding in Lahaina. The sirens did not sound because the perpetrators had complete control of the sirens.

[Hawaii Governor Josh Green first claimed that the sirens did not sound because they were immobilized due to the intense heat.](#) If there was an approaching fire as claimed, the very loud 121-decibel sirens would have sounded at the first sign of fire before it would ever reach the sirens which were located along Lahaina’s coast. And so the story by the governor was not believed by anyone. The sirens are tested each month and had just been tested on August 1, 2023, one week before the disaster.

The emergency sirens may have been destroyed, but not in the way the governor claimed. The destruction would not be from fires, as alleged by the governor, but from directed energy weapons. The sirens were along the coast, far from the alleged

path of the fire coming from the inland area. Thus, the fire could not have destroyed them. But a sudden burst from a directed energy weapon certainly could have done the trick.

It was eventually claimed that the alarms did not sound because nobody from either the state or county government activated the alarms. Could it be that it was because they knew that the directed energy weapons had disabled the sirens? Now they had a problem on their hands. They now claim that the sirens were purposely not sounded. And so they had to devise a good reason for not doing so. They had to conceal the use of directed energy. They trotted out The Administrator of the Maui Emergency Management Agency, Herman Andaya, who claimed that the sirens were purposely not sounded because they are primarily used for tsunamis. His concern was that people would hear the sirens and run toward the mountains to flee an imagined tsunami. In doing that, he claimed that the people would have run toward the alleged source of the fires.

When asked, Andaya stated that he does not regret not sounding the alarms. He said:

The public is trained to seek higher ground in the event that the siren is sounded. Had we sounded the siren that night, we're afraid that people would have gone mauka [meaning inland, or toward the mountainside]. And if that was the case, then they would have gone into the fire.

That statement is false. [CNN reported:](#)

Before Andaya's resignation was announced, state Sen. Angus McKelvey – who represents Lahaina and lost his own home in the fires – blasted Andaya's response as “insulting.”

“I've heard the line that ‘people would have panicked and ran up to the mountains because it's a tsunami siren.’ ... It's insulting to think that people would be that clueless, that they wouldn't know that sirens blasting was because of the

fire,” McKelvey told CNN on Thursday.

“These are not tsunami sirens. They’re disaster sirens.”

There’s more! The Deputy Chief, Telecommunications Branch, State of Hawaii Emergency Management Agency, [Ryan Hirae](#), during an interview on or about September 2020, stated the following:

*In the state of Hawaii we have a statewide alert and warning system, which we also call SAWS. That involves not only the siren warning system, but as well as IPAWS. IPAWS is the integrated public alerts and warning system provided by FEMA. And that has the Emergency Alert System, also known as EAS. It also has Wireless Emergency Alerts, which are known as WEA. **We also use sirens for hurricanes, brush fires, flooding, lava, hazmat conditions, or even a terrorist event.** We have over 400 Sirens spread out through four counties. Our Sirens have a rating of 121 decibels. We have to visit each siren minimally once a year for preventive maintenance. Our role in the state of Hawaii in Emergency Management, especially telecommunications, is to prevent loss of life and to minimize property damage.*

[The State of Hawaii Emergency Management Agency website indicates that the sirens are part of a warning system for:](#)

Hurricane

Flooding

Wildland Fire

Tsunami

Earthquake

Volcanic

So we now know that the sirens are, in fact, used to warn of fires. Andaya lied about why the sirens were not used. Indeed, every reason given by government officials for the sirens not

sounding has been proven false. Why would government officials lie about such a thing? Because the real reason the alarms were not sounded was that government officials were behind the disaster. They owned the dog that didn't bark.

The destruction of the city was planned to kill people in a single fell swoop using directed energy weapons. The sirens were not even considered by the perpetrators in planning their attack because there was no slow lumbering fire dancing from house to house for the sirens to warn people about. They activated the directed energy weapon, and the immolation of the city and the sirens immediately ensued. Most of the people were hit by surprise and killed instantly in their houses by the directed energy weapon. Notably, while 114 people have been confirmed dead, 1,000 people are still unaccounted for as of August 19, 2023, eleven days after the disaster. The dog didn't bark because the master was the murderer.

[Lahaina Is Within 40 Miles of a U.S. Government Directed Energy Facility on Maui](#)

[Lahaina Was Destroyed by a Directed Energy Weapon](#)

[Connect with Edward Hendrie](#)

Lahaina Is Within 40 Miles of a U.S. Government Directed

Energy Facility on Maui

Lahaina Is Within 40 Miles of a U.S. Government Directed Energy Facility on Maui

by [Edward Hendrie](#), [Great Mountain Publishing](#)

August 20, 2023

In my [August 11, 2023, article](#), I explained the evidence that a directed energy weapon was used to destroy Lahaina, a city on the Island of Maui in Hawaii. The only culprit who could possibly have used such a weapon is the U.S. Military. The cover story for the destruction of Lahaina was that out-of-control wildfires caused it. Indeed, Major General Kenneth Hara, the commanding general of the Hawaii Army National Guard, gave the world the wildfire cover story during an August 9, 2023, briefing. One would think that the head of the Maui Emergency Management Agency, Herman Andaya, would be the proper source of information about the alleged wildfires.

But, strangely, Herman Andaya was not even present in Maui at the time of the destruction of Lahaina. Administrator Andaya was absent in the days following the conflagration in Lahaina. Where was he? According to local news, Hawaii News Now, [“Andaya was in Waikiki at the Alohilani Resort attending what was scheduled to be a three-day FEMA disaster preparedness seminar called the Pacific Partnership Meeting.”](#) Oddly, the conference did not start until the morning of August 8, 2023, after the destruction of Lahaina was well underway and well known. Yet, Andaya remained at the conference during the first day of the disaster, and records show that he did not check out from his hotel until August 9, 2023.

Another odd thing about the fires was that the emergency alert system of sirens was not implemented after the destruction

began. Someone other than Andaya made the decision not to warn the populace. That failure caused many to die needlessly. [Andaya subsequently resigned on August 17, 2023, after his alleged dereliction became publically known.](#)

Back to General Hara: while he is not an expert in emergency management, he is an expert in military armaments. It just so happens that [Maui is the location for one of two major sites for the Air Force Research Laboratory \(AFLR\) Directed Energy Directorate.](#) The other major location is [Kirkland Air Force Base in New Mexico.](#) You read that correctly; within 40 miles of Lahaina on the Island of Maui is located the Air Force Maui Optical and Supercomputing (AMOS) site, which is part of the AFLR Directed Energy Directorate. The AFLR states “the Directorate develops and transitions technologies in four core technical competencies: laser systems, high power electromagnetics, weapons modeling and simulation, and **directed energy** and electro-optics for space superiority.”

One of the products under study on Maui by the AFLRE uses “laser propagation through the Earth’s atmosphere.” So powerful is the directed energy technology that AMOS states it “has the ability to propagate light into the sodium layer of the atmosphere and create an artificial star.” AMOS further states that the “state-of-the-art electro-optical facility, the MSSS combines research and development with an operational mission; the only one of its kind in the world.”

Also located at the 10,023 foot-summit of Haleakala on the island of Maui, Hawaii, is the [15th Space Surveillance Squadron \(15 SPSS\).](#) “The mission of 15 SPSS is to develop, assess, deliver, and operate cutting-edge SDA [Space Domain Awareness] capabilities to support warfighter needs.” The 15 SPSS also operates the experimental systems under the AFRL “15 SPSS is a component of Space Delta 2 and also operates experimental systems under the Air Force Research Laboratory [AFRL].” The Directed Energy Directorate is a component

department of the AFRL with expertise in directed energy. That means that the 15 SPSS operates the AFRL experimental directed energy weapons. And it does so from the summit of Haleakala overlooking Maui. Haleakala is the perfect location to control directed energy weapons targeting Lahaina.

Picture of the Maui Space Surveillance facility atop Haleakala shooting a sodium guidestar posted on the AFRL website

Apparently, Lahaina became a target of one of the AFRL's directed energy "operational missions" on August 8, 2023. Administrator Andaya took the fall for the death and destruction caused by a U.S. military operation against its citizens. The people are being led to believe that the death and destruction were exacerbated by incompetence. That way, they are kept from the reality that the destruction of Lahaina was premeditated mass genocide orchestrated by its own government.

It is notable that U.S. President Biden, the Commander in

Chief of the U.S. Armed Forces, was utterly silent about the conflagration. [The media did not even have an opportunity to ask him about it until Sunday, August 13, 2023](#), at which time he responded with [“no comment.”](#) Think about that for a moment. An entire city is destroyed, and the media does not even have access to the President of the United States to ask him about it until five days later.

And President Biden’s response is an incriminating “no comment!” Instagram influencer Rogan O’Handley wrote on Twitter that the more we learn about Hawaii, ‘the more we learn why Joe Biden has consistently responded with ‘no comment.’ He stated the obvious: ‘There is something REAL fishy going on here.’”

How did the words “no comment” come out of his mouth? Who, President or not, responds to a tragedy with “no comment?” I will tell you who. A person who is part of the conspiracy that committed the tragedy. That is the kind of statement made by someone guilty of a crime! President Biden repeatedly refused to answer any questions about the Lahaina tragedy. On [August 19, 2023](#), the White House officially announced that the President would visit Maui on Monday, August 21, 2023.

The Lahaina disaster has many parallels with the 9/11 attacks. Notably, Administrator Andaya was attending a three-day FEMA disaster preparedness seminar at the time a real disaster was taking place. In like manner, [on 9/11 there were also several military drills involving hijacked airplanes while the actual 9/11 attacks took place](#). Three of the military exercises were called [Northern Vigilance, Vigilant Warrior, and Vigilant Guardian](#). Rather suspiciously, the scenarios matched almost exactly the story of the alleged highjacked airplane attacks on 9/11.

[9/11 War Games by James Corbett](#)

[Stanley Hilton, former chief of staff to Senator Robert Dole, represents over 400 plaintiffs in a seven billion dollar class](#)

[action lawsuit against President George Bush, Vice President Richard Cheney, National Security Advisor Condoleezza Rice, Secretary of Defense Donald Rumsfeld, FBI Director Robert Mueller, and others in high government office, alleging that they planned and orchestrated the 9/11 attacks.](#) The lawsuit was dismissed in 2004. The federal district judge ruled that the President and his subordinates enjoyed sovereign immunity from what the court described as a “non-justiciable political question.”

Mr. Hilton has documentary proof and eyewitnesses that President George Bush personally ordered the 9/11 attacks. Furthermore, he has eyewitnesses and documentary evidence that the U.S. Air Force and NORAD conducted 35 drills over the two months prior to 9-11-01 rehearsing attacks by airliners against various targets, including specific drills where the World Trade Center was to be the target of attacks by airplanes.

In fact, on 9-11-01 there were five drills being conducted by NORAD and the Air Force involving attacks by commercial airliners. The 35 rehearsals by the U.S. Government for attacks by airliners impeaches the credibility of National Security Advisor Condoleezza Rice, who said during a [May 16, 2002 press briefing](#): “I don’t think anybody could have predicted that these people would take an airplane and slam it into the World Trade Center, take another one and slam it into the Pentagon; that they would try to use an airplane as a missile, a hijacked airplane as a missile.” Why would she say such a thing when it is so clearly false? Because she did not think that anyone would ever find out about the prior rehearsals. Now that the rehearsals have leaked out the conspirators had a problem. But that was all taken care of by the district court judge who ruled that the administrative officials had sovereign immunity.

[Lahaina has all the earmarks of a directed energy attack, just as was done on 9/11.](#) For more information about directed

energy use during the 9/11 attacks read [9/11 – Enemies Foreign and Domestic](#).

Lahaina Was Destroyed by a Directed Energy Weapon

[Lahaina Was Destroyed by a Directed Energy Weapon](#)

by [Edward Hendrie](#), [Great Mountain Publishing](#)

August 11, 2023

There were some strange things about the alleged wildfire at Lahaina, Hawaii. Notably, the spokesman who explained what happened was NOT a fire official or anyone from the local government with any knowledge of fire fighting or emergencies. Instead, we find Major General Kenneth Hara, the commanding

general of the Hawaii Army National Guard. He stated that he did not know what ignited the fires. But he opined that low humidity and high winds [“set the conditions for the wildfires.”](#) He is an army general; what does he know about forest fires?

There is reason to question the general’s claim. The wildfire would only make sense if a forest of trees surrounded the city of Lahaina. That is the first problem with the story. There is no forest near the town. Indeed, the satellite photo below shows that the tallest trees near the city belong to the Maui Kuaia Estate Cacao Farm. Cacao trees are pretty small ranging in height between 13 and 26 feet. But those trees are across a highway several hundred yards from the nearest building.

Notice that Lahaina, Hawaii is NOT surrounded by a forest of trees. The only dense area of trees would be the Maui Kuaia Estate Cacao Farm. Cacao trees are quite small ranging in height between 13 and 26 feet. That small clump of trees on the tree farm separated by a roadway and many hundreds of yards of barren land containing only scrub grass could not cause a massive conflagration alleged to have been caused by

wildfires.

What about the trees within the city itself? There are lots of trees in the town. But when we look at the photos of the city after the alleged fire, we find that the trees in the town are mainly intact. Strangely buildings that have been destroyed allegedly by fire are surrounded by trees untouched by flames.

Something else is going on here. That something else is [directed energy](#). The buildings were destroyed by directed energy weapons. Directed energy weapons use microwaves. They cause molecular destruction of materials that absorb them; wood remains unfazed because wood absorbs very little microwave radiation. It is similar to how you can put a paper plate in a microwave oven without concern that it will catch fire. But if you put aluminum foil into that same microwave oven, it will quickly begin to spark and burst into flames.

Directed energy is not new technology. Directed energy weapons were used during the 9/11 attacks on the World Trade Center. The book [9/11-Enemies Foreign and Domestic](#) details the evidence that directed energy weapons were used on 9/11.

Before ↗ **Select examples where unburned trees are surrounded by destroyed buildings.** ↘ **After**

The pictures above and below are frames from an aerial video of the alleged wildfires that destroyed the city of Lahaina, Hawaii. The authorities do not know how the alleged fires started. Notice that buildings are leveled, but standing trees surround the destroyed buildings. How could the city have been destroyed by wildfires when the trees in the town are untouched by any flames? Notice in the video frame below there are two buildings completely leveled with unburned trees abutting the buildings. Nearby buildings are untouched by any fire. This is telltale evidence of directed energy weapons.

Notice in the video how the buildings are leveled to the ground, but the trees remain standing and unburned.

by [Edward Hendrie](#), [Great Mountain Publishing](#)

January 29, 2022

Peter Duesberg is a molecular biologist and a molecular and cell biology professor at the University of California, Berkeley. At one time, he was an acclaimed scientist who was the world's foremost expert on AIDS. That all changed when he was blackballed by Anthony Fauci and the scientific establishment for the temerity of revealing the truth that HIV does not cause AIDS. Duesberg was slandered as a homophobe for revealing the scientific evidence that AIDS was caused by the use of certain dangerous recreational/pharmaceutical aphrodisiacs by the sodomite community that over time broke down the immune systems of the users who then developed AIDS. He revealed that the prevalence of AIDS in Africa is simply explained by recategorizing as HIV the endemic immune deficiencies that were always understood to be caused by malnutrition, tainted drinking water, and various infections.

Dr. Duesberg reveals how Fauci pushed the toxic drug called AZT (Zidovudine) to people who were found to have antibodies to HIV. Those patients were poisoned by the drug (AZT) that was supposed to treat them. AZT, in actuality, caused AIDS, which eventually killed the patients. That is much like the present regime of treating COVID-19 with unsafe and ineffective mRNA vaccines and toxic therapeutics like Veklury® (remdesivir) while suppressing safe and effective therapeutics like hydroxychloroquine and Ivermectin.

Duesberg's book exposes the incompetence, megalomania, and in

some cases criminality of Anthony Fauci, and other NIH, FDA, and CDC officials. It reveals the genesis of the establishment of what has become a cabal of ruling technocrats in government which has now brought Orwellian oppression across the United States and indeed the world through the COVID-19 scare and mandatory experimental vaccinations.

There were very powerful interests who tried to kill Duesberg's book before it ever saw the light of day. The publisher, Regnery, in its preface to the book explains how Peter Duesberg went through two publishers who backed out of publishing the book at late stages, apparently due to some hidden pressure from an unseen hand.

This book is now out of publication. But there is still robust demand for the book which has driven the price up. While Amazon offers the audible version of the book at a reasonable price, as of January 28, 2022, the hardcover version was priced at \$1,260.00 and the paperback was priced at \$536.00.

[It is now a free PDF download.](#)

Excerpt From the Publisher's Preface:

Regnery is the third publisher to have contracted to publish *Inventing the AIDS Virus*. Addison Wesley initially announced the book in 1993. St. Martin's signed it in January 1994 and subsequently assigned its contract to us in January 1995. We announced it, initially, in the fall of 1995 and finally published it in February 1996. Bryan Ellison, Duesberg's former research assistant and original co-author, became disenchanted with Duesberg's and his publisher's insistence on careful documentation and self-published his own version under the title *Why We Will Never Win the War on AIDS* in 1994. We sued Ellison for breach of contract and copyright violation and, after a two-week federal court jury trial, were awarded a six-figure verdict and an injunction against Ellison's edition. *Inventing the AIDS Virus* has been edited by at least five editors, has been agonized over by the publishers of

three major publishing firms, and concurrently praised and damned by countless critics.

Excerpt from the foreword by Nobel Laureate Kerry Mullis, creator of the PCR test:

We have not been able to discover any good reasons why most of the people on earth believe that AIDS is a disease caused by a virus called HIV. There is simply no scientific evidence demonstrating that this is true.

We have also not been able to discover why doctors prescribe a toxic drug called AZT (Zidovudine) to people who have no other complaint than the presence of antibodies to HIV in their blood. In fact, we cannot understand why humans would take that drug for any reason.

We cannot understand how all this madness came about, and having both lived in Berkeley, we've seen some strange things indeed. We know that to err is human, but the HIV/AIDS hypothesis is one hell of a mistake.

I say this rather strongly as a warning. Duesberg has been saying it for a long time. Read this book.

Kary B. Mullis
Nobel Prize in Chemistry, 1993

Prior to his untimely death on August 7, 2019, Kerry Mullis had this to say about Anthony Fauci and his ilk:

“Guys like Fauci get up there and start talking, you know, he doesn't know anything really about anything and I'd say that to his face. Nothing. The man thinks you can take a blood sample and stick it in an electron microscope and if it's got a virus in there you'll know it. He doesn't understand electron microscopy and **he doesn't understand medicine and he should not be in a position like he's in.** Most of those guys

up there on the top are just total administrative people and they don't know anything about what's going on in the body. You know, those guys have got an agenda, which is not what we would like them to have being that we pay for them to take care of our health in some way. They've got a personal kind of agenda. They make up their own rules as they go. They change them when they want to. **And they smugly, like Tony Fauci does not mind going on television in front of the people who pay his salary and lie directly into the camera."**

Notice the book, [*Inventing the AIDS Virus*](#), on the table in front of Mullis during the interview.
