Is Climate Engineering Real?

by [Dr. Joseph Mercola](#)

July 19, 2023

Story-at-a-Glance

- U.S. presidential candidate Robert F. Kennedy Jr. recently interviewed Dane Wigington, founder of GeoengineeringWatch.org, about climate engineering and its hidden role in climate change
- The White House is considering a plan to block sunlight from hitting the surface of the earth in a bid to halt global warming, a process known as solar radiation modification (SRM)
- A supercomputer called Derecho is analyzing the effects of solar geoengineering to help climate scientists decide whether SRM will be a good idea
- According to Dane Wigington, founder of GeoengineeringWatch.org, geoengineering projects of various kinds are already having severe impacts on weather patterns, our ability to grow food, biodiversity and human health

- Intentional geoengineering – including solar dimming – has been going on for more than 70 years

In the video above, U.S. presidential candidate Robert F. Kennedy Jr. interviews Dane Wigington, founder of GeoengineeringWatch.org, about climate engineering and its hidden role in climate change. Wigington also produced the documentary “The Dimming.”

While Wigington has tried to raise awareness about the reality of climate engineering for the last two decades, his work is now gaining traction after the White House announced it’s backing a plan to block sunlight in a climate engineering effort.

White House Considers Measure to Block Sunlight

As reported by the Daily Mail, July 1, 2023:¹

“The White House has opened the door to an audacious plan to block sunlight from hitting the surface of the Earth in a bid to halt global warming.

Despite some scientists warning the effort could have untold side effects from altering the chemical makeup of the atmosphere, President Joe Biden’s administration has admitted they’re open to the idea, which has never been attempted before.

In a report² released Friday by the White House, officials suggested limiting sunlight to rapidly cool the planet, a process known as solar radiation modification (SRM) ...

The report noted several ways authorities could look to achieve SRM, all of which come with potentially devastating consequences if they backfire ... undertaking the mammoth task could have severe ramifications weather patterns and food

supplies, which would in turn impact biodiversity, geopolitics, and health.”

Policymakers in the European Union recently called for an international assessment of geoengineering risks, noting that:³

“These technologies introduce new risks to people and ecosystems, while they could also increase power imbalances between nations, spark conflicts and raises a myriad of ethical, legal, governance and political issues.”

Supercomputer to Determine Effects

According to Scientific American, a supercomputer called Derecho will help climate scientists decide whether to block the sun:⁴

“A new supercomputer for climate research will help scientists study the effects of solar geoengineering, a controversial idea for cooling the planet by redirecting the sun’s rays.

The machine, named Derecho, began operating this month at the National Center for Atmospheric Research and will allow scientists to run more detailed weather models for research on solar geoengineering, said Kristen Rasmussen, a climate scientist at Colorado State University who is studying how human-made aerosols, which can be used to deflect sunlight, could affect rainfall patterns.

Because Derecho is three and a half times faster than the previous NCAR supercomputer, her team can run more detailed models to show how regional changes to rainfall can be caused by the release of aerosols, adding to scientists’ understanding of the risks from solar geoengineering ... The machine will also be used to study other issues related to

climate change.”

Geoengineering Is the Biggest Contributor to Climate Change

According to Wigington, there's plenty of evidence showing that geoengineering projects of various kinds are already having severe impacts on weather patterns, our ability to grow food, biodiversity and human health.

Geoengineering projects have expanded from some 300 in 2012, to more than 1,700 in 2023.

Intentional geoengineering – including solar dimming – has been going on for more than 70 years and has exponentially expanded in more recent years. A geoengineering map,⁵ created by the ETC Group and the Heinrich Boell Foundation, shows how geoengineering projects have expanded from some 300 in 2012, to more than 1,700 in 2023.

This includes carbon capture/removal, solar radiation reduction and a variety of weather modification projects worldwide. Not surprisingly, Bill Gates has been funding geoengineering for a long time. Broadly, geoengineering programs were initially implemented after World War II, starting in the polar regions.

For years, anyone who said that geoengineering and weather modification was being used was labeled a tinfoil hat-wearing conspiracy theorist. As it turns out, it was true all along, and with the White House report just released, mainstream naysayers are suddenly admitting it as well.

What they're not readily admitting, however, is that a) geoengineering is as dangerous as climate change itself, and b) that geoengineering is responsible for the most catastrophic changes in our climate.

As noted by Wigington, the globalist power structures that now

claim we need to use geoengineering to solve climate change were the ones responsible for creating that climate change in the first place with their geoengineering. According to Wigington, the state of our global climate is “even worse than we’re being told,” and climate engineering is “fueling that process.”

In other words, the globalist cabal is trying to convince us that the cause of the problem is the solution, all while pinning the blame for climate change on regular people who drive cars to work and eat meat.

Are Chemtrails Real?

One geoengineering technique used across the world involves the dispersion of chemicals and metals into the atmosphere, a practice colloquially referred to as chemtrailing.

A key difference between regular condensation trails from aircraft and particulate trails (chemtrails) is that condensation trails evaporate rather quickly. They will not block 80% to 90% of solar uptake and create global dimming like chemtrails do.

The persistent lines you see in the sky that very slowly disperse, creating a muddy, hazy “film” across the entire sky are NOT condensation trails. They are particulate trails, or “chemtrails.” The particles dispersed in the air column are further manipulated via radio frequency transmissions.

The Alaskan installation known as HAARP⁶ is but one facility involved. There are dozens of other large, ground-based facilities just like it around the globe. Smaller networks and NEXRAD radar stations located in urban areas around the world are also employed. All these networks are used to manipulate the particles dispersed via “chemtrails” in the atmosphere.

What Are They Spraying Into the Atmosphere?

One of the key ingredients in these particulate trails is

nanosized aluminum, which is neurotoxic to animals and humans. Aluminum also kills the root systems of plants and trees, as well as the soil microbiome. It also alters soil pH, which makes it harder for some crops to grow. One of the reasons aluminum is used is because it has high reflectivity, so sunlight bounces off it.

According to Wigington, climate engineers have stated they're depositing tens of millions of tons of aluminum nanoparticles into the atmosphere annually as part of ongoing solar radiation management programs – "with no consideration for the consequences whatsoever."

Lab tests conducted by GeoengineeringWatch also shows the presence of barium, strontium, titanium, manganese, polymer fibers, surfactant chemicals, and graphene in these particulate trails, as well as in rain.

While all these ingredients are studied for their effectiveness in geoengineering, no research is being done to ascertain what the health effects might be on populations, vegetation and wildlife below.

Wigington also warns that these aerosol sprays can be used to disperse bioweapons and may have been used for this purpose already. He cites a Washington Post article that noted the U.S. Army conducted 239 open-air germ warfare tests on the U.S. population between 1949 and 1969 alone.⁷

Where Are the Whistleblowers?

According to Wigington, we have evidence that commercial airlines began to be used for particulate release operations in 2002, when restrictions on passenger luggage were implemented. That's not to say that pilots or airline employees know what's going on, but some airliners are equipped with nozzles and tanks for this purpose.

Kennedy points out that thousands of people must have been

read into programs of this magnitude, so how come there are so few whistleblowers? According to Wigington, those in the know are all under gag order.⁸ This includes weathermen. Secrecy is also upheld through massive compartmentalization.

Still, we know weather modification and geoengineering is real. Not only can we see it in the sky and measure the toxic particles in the aerosol and on the ground, but we also have patents describing these processes.

According to Wigington, the U.S. government owns many of the primary ones. Others are held by defense contractors like Raytheon and Lockheed Martin, which also do all the weather modeling for the U.S. national weather service.⁹

He suggests the reason weathermen can predict an area will have partial sun seven days in advance is because we don't have natural weather anymore. We have programmed weather. And the reason Raytheon and Lockheed oversee weather modeling is because they're also neck-deep in weather modification and need to maintain control of the narrative.

We Face Abrupt Climate Collapse

According to Wigington, what we face is far worse than climate change. Due to the geoengineering already conducted, what we're facing is an abrupt climate collapse,^{10,11} due to the many feedback mechanisms triggered. The particulates dispersed during these geoengineering events "shred" the ozone layer. As a result, UV-C rays are now hitting the surface of the planet.

Other ramifications of geoengineering that are currently observable also include global dimming (chemtrails reduce solar radiation by 80% to 90%), global stilling (reduced wind flow), a reduction in precipitation and protracted droughts, a 90% reduction in plankton, and toxic geoengineering elements being found on the ground and in rainwater.

Moreover, while global cooling is the stated aim of most of these geoengineering programs, as the planet warms, the laws of physics state you need more precipitation to cool it, not less, because the atmosphere carries more moisture as the temperature rises.

To cool the planet, you need to create more rain, but these programs have resulted in less rain, and the reason for the reduction in rainfall is due to the particulates in the atmosphere. In addition to deflecting heat from the outside, these particles also trap heat down below, making the overall heating of the planet massively worse.

Is combating global warming really the endgame, or is that just a convenient cover story for a far more reckless goal? And if so, what might that goal be?

One might be that they're trying to hide the severity of the damage that their geoengineering has already done. Another might be to control populations and governments, using weather as a weapon. It might also be for communication enhancement purposes, as the atmosphere is being made more electrically conductive by these particles.

Signs and Symptoms of Geoengineering

At the end of the interview, Kennedy asks Wigington what kinds of things in everyday life that people should look for if they're looking for evidence of geoengineering. One major one is the destruction of forests, as root systems die off due to aluminum loading.

Home gardeners, especially if you've been doing it for a decade or longer, may notice that fruits and vegetables don't grow nearly as well as they used to. Not only are soil microbiomes being decimated and soil pH altered, but the air is also being altered.

The particles in the atmosphere create vapor pressure deficit

(VPD), they lower the rH of the air, which is like the pH of soil. If there's not enough humidity, trees and plants shut down their respiratory system (stomata).

Stomata are involved in the exchange of carbon dioxide and water between plants and the atmosphere. So, when VPD happens, the plants and trees stop taking up carbon dioxide and they no longer release oxygen.

As a result, forests cease being carbon sinks and become carbon sources. Eventually, without respiration, the plants and trees die off. Increased UV radiation also damages plants, causing leaf scorch.

Geoengineering Won't Fix the Climate Crisis

At the end of March 2023, a new study came out debunking the idea that short-term solar dimming might be a viable way to for world governments to meet their climate targets.

Scientific American reported on the study, noting:¹²

"A controversial idea for cooling the earth's climate through artificial means would likely require a much longer global commitment than policymakers and the public understand, according to a recent study¹³ that raises new questions about the potential for using solar geoengineering.

If world leaders decide to use solar geoengineering to meet international climate goals, they could be locked into it for a century or more ...

Geoengineering is 'often communicated as temporary, a stopgap measure – so it implies being relatively short, and short in the sense of a couple of decades,' said lead study author Susanne Baur, a doctoral candidate at the European Centre for Research and Advanced Training in Scientific Computation in France.

'And so when we started looking at these pathways, and we extrapolated them a bit longer, we saw that in many cases, it's actually not that short.'

The public may not realize the scope of a commitment solar geoengineering – or its risks, including the need for long-term international cooperation. 'If we have to keep up a system like this for such a long time, that just increases the possibility of something bad happening,' Baur said."

In a nutshell, the study argues that once you begin solar geoengineering, you can't stop until or unless enough carbon has been eliminated from the atmosphere to lower the earth's temperature below a certain threshold.

If there's too much carbon left, then a sudden halt to the geoengineering could skyrocket, resulting in "termination shock," a concept that describes a sudden, drastic elevation in global temperatures that life on earth doesn't have time to adapt to. In other words, it could result in a global extinction event.

Rogan's Kennedy Interview: Vax Mercury Con Exposed

[Rogan's Kennedy Interview: Vax Mercury Con Exposed](#)

by [Dr. Joseph Mercola](#)

July 1, 2023

[video link](#)

Story-at-a-Glance

- June 15, 2023, podcast host Joe Rogan interviewed Robert F. Kennedy Jr., who is currently running as a Democratic presidential candidate
- In 2005, Kennedy started suing coal-burning powerplants and cement kilns for releasing mercury into waterways. He also pushed legislation to protect children against mercury and gave lectures on its dangers
- During those lectures, mothers started approaching him saying they suspected their children had been injured by mercury-containing vaccines. They told him that if he was really interested in protecting children against mercury, he had to investigate vaccines
- The mother of a vaccine-injured child brought him a thick stack of published research, and after looking through it, Kennedy realized that what health officials told us was very different from what the science showed
- Kennedy is now also legally representing people who claim they've been injured by cellphone radiation, which science shows can cause cancer, degrade mitochondria and make your blood-brain barrier more permeable, allowing toxins in your system to flood into your brain

June 15, 2023, podcast host Joe Rogan interviewed¹ [Robert F. Kennedy Jr., who is currently running as a Democratic presidential candidate](#). Rogan admits being blown away by Kennedy's book, "[The Real Anthony Fauci](#)," in part because the information in that book was not talked about anywhere else, and radically veered from the official narrative.

Still, if anything in that book was false, Kennedy would have been sued to high heaven by now, Rogan reasoned. Reading that book opened Rogan's eyes to the fact that what we're told by public officials and the media isn't necessarily the truth. He also realized just how easy it is to fall for a false narrative – especially when it's all you're ever allowed to

really hear.

For the first several minutes of the interview, Kennedy reviewed his background and how he got to where he is today. He started his legal career as an environmental lawyer in the mid-1960s, suing 500 polluters who had turned the Hudson River into a sewer, on behalf of commercial fishermen whose livelihoods were threatened.

As a result of those lawsuits, the Hudson River was cleaned up and restored. These successes led Kennedy to found Riverkeeper,² which patrols waterways in 46 countries, holds polluters accountable and defends clean drinking water.

How Kennedy Got Involved With Vaccine Safety

I would strongly encourage you to listen to this interview as around the 10-minute mark Rogan asks Kennedy how he got into the vaccine controversy. Although Kennedy had presented some of his comments in the media previously, this is the first time he was ever allowed to give his uninterrupted one-hour fascinating story on major media.

In 2005, Kennedy started suing coal-burning powerplants and cement kilns for releasing mercury into waterways. He launched these lawsuits on behalf of local Riverkeeper chapters after learning that mercury was being found in the flesh of most freshwater fish. Pregnant women were also found to have levels that might put their children at risk of developmental problems.

Kennedy also pushed legislation to protect children against mercury and gave lectures on its dangers. During those lectures, mothers started approaching him saying they suspected that mercury (thimerosal) in the childhood vaccines had injured their children. They told him that if he was really interested in protecting children against mercury, he had to investigate vaccines.

He resisted, as his focus was on environmental pollution and he didn't want to get involved in public health. However, mothers of developmentally challenged children kept coming to his speeches, wanting to talk to him about vaccines.

Their continued pressure eventually changed his mind, and he decided to listen to their concerns. The true turning point came when a psychologist named Sarah Bridges found his home address and delivered an 18-inch thick stack of scientific papers, saying she would not leave until he'd read them.

Bridges was one of the few people who had been awarded \$20 million by the vaccine court, which had concluded that her son's autism had been caused by a vaccine. She just didn't want other parents to go through the same heartache.

Huge Gap Between Public Narrative and Published Science

Kennedy began reading, and by the time he'd gone through a third of the pile, he came to the realization that there was a huge gap between what the public health agencies were saying about vaccine safety and what the published science showed.

Kennedy then started calling high-level public health officials and regulators, asking them about these studies and, to his surprise, he realized none of them had read them. They were all just repeating what they had been told about the science. Stranger still, they told him to take his questions to people in the vaccine industry.

Kennedy did contact Dr. Paul Offit, as suggested, and caught Offit in a blatant lie. He asked Offit, how come pregnant women are told not to eat tuna fish to avoid mercury, but are then told to get flu shots that contain a huge bolus of mercury? Offit told him "there are two kinds of mercury, a good mercury and a bad mercury." According to Offit, fish contain the bad kind, whereas the mercury in vaccines is harmless.

The problem was, Kennedy is an expert on mercury, having spent years suing mercury polluters. He has a deep understanding of the two types of mercury (ethylmercury in vaccines and methylmercury in fish), and there's no such thing as a "good" or harmless mercury.

Kennedy, an excellent storyteller, goes on to review the history of vaccine science and why toxic elements like mercury are used at all. This interview is without doubt one of the most educational "lectures" on vaccines available right now, so I encourage you to listen to at least the first hour, if you don't have time for the whole thing.

Ethylmercury Lodges in the Brain

Importantly, he reviews crucial research that firmly debunks the claim that ethylmercury is excreted from the body within a week. Studies on monkeys, where the animals were sacrificed after vaccination (which you cannot do with children), showed that the reason there was no ethylmercury in the blood after several days was because it had traveled into the brain, where it stayed, causing inflammation.

When Kennedy challenged Offit on this point, Offit insisted that, while this research did show that ethylmercury lodged in the brain, "the mosaic of studies" proved it was harmless and left the body.

Kennedy asked him to share those studies, which Offit promised to do but never did. Kennedy never heard from him again. At that point, Kennedy realized that something was terribly wrong, and he couldn't walk away.

Kennedy also challenged Dr. Anthony Fauci – who is a close friend of the Kennedy family – to show him a single placebo-controlled trial of a vaccine listed on the childhood vaccination schedule. Fauci said he would send him the studies, but, like Offit, never did.

The reality is, none of the mandated vaccines has ever been tested against a true placebo, such as saline. Most are tested against other vaccines, and if you're testing two products that contain a similar toxin, of course, the outcomes will be similar. That doesn't mean you've proven safety. Not even close.

Kennedy eventually sued the Health and Human Services Department to obtain the evidence Fauci claimed to have, and after a year the HHS finally returned a letter saying there were no such safety studies. "So, nobody knows what the risk profiles of these products are," Kennedy says.

The sheer lack of data also means that anyone who claims vaccines have saved more lives by preventing disease than they've destroyed through side effects is simply guessing and making assumptions. There's no scientific data to back that up.

Also, Kennedy points out that while many vaccines are now mercury-free, they're loaded with aluminum adjuvant instead, which is just as bad. So they've just exchanged one neurotoxin for another.

Intentional Suppression of the Autism Signal

Kennedy goes on to tell the story of a secret meeting³ organized by the U.S. Centers for Disease Control and Prevention in 1999 after they conducted an internal study of their database, which contains the medical records, including the vaccination records, of 10 million children from the 10 biggest HMOs.

Specifically, they wanted to know whether mercury-containing vaccines might be causing autism. One of the first comparisons of health outcomes was done on the hepatitis B vaccine.

The data showed that infants who had received the hepatitis B vaccine within 30 days of birth had a 1,135% higher risk of

autism compared to infants who either did not get the hepatitis B vaccine at all or received it after 30 days of age. “At that point, they knew what caused the autism epidemic,” Kennedy told Rogan, because “that’s a relative risk of 11.35, and a relative risk of 2 is proof of causation.”

As panic spread through the industry, the CDC put together this secret meeting at a retreat center in Georgia. It was intentionally held outside the CDC campus to circumvent FOIA laws. The meeting included representatives from all the major vaccine companies, regulatory agencies that administer vaccines, the U.S. Food and Drug Administration, the National Institutes of Health, the Health and Human Services Department and leading academic institutions that conduct clinical trials.

The first day was spent discussing the reality of the problem, and the second day was spent discussing how to hide it. While the meeting was held in secret, someone did record it and, in 2005, Kennedy obtained a copy of it. You can read the [transcript on the Children’s Health Defense website](#).

Early on in that 286-page transcript, we find the following admission by Walter Orenstein, then-director of the National Immunization Program at the CDC:⁴

“Initial concerns were raised last summer that mercury, as methylmercury in vaccines, might exceed safe levels ... Analysis to date raise some concerns of a possible dose-response effect of increasing levels of methylmercury in vaccines and certain neurologic diagnoses.”

What happened to this safety signal? As explained by Kennedy, it was intentionally “vanished” by reworking the study four times, using statistical tricks.⁵ After the fourth iteration, the signal linking thimerosal with autism and a half dozen other neurodevelopmental disorders were no longer detectable.

The CDC published that final version and announced thimerosal had been investigated and found to be safe. And when investigators asked to see the raw data, the CDC claimed the data had been “lost,” so no one was ever able to verify the results. The fabrication stuck and has been peddled ever since.

We Live in a Toxic Soup

Kennedy stresses that vaccines are not the only factor in the epidemics of chronic disease and autism in children. There are many other factors as well. Children are exposed to an enormous amount of toxins from many different sources, including electromagnetic fields (EMF) and wireless radiation.

Kennedy is currently representing people who blame their brain tumors on cellphone radiation, and “we have the science,” he says. “Tens of thousands of studies show the dangers of Wi-Fi radiation.”

Aside from cancer, cellphone radiation degrades your mitochondria and makes your blood-brain barrier more permeable, Kennedy says, allowing all the other toxins in your system to flood in. So, this too, could play a significant role in the neurological dysfunction we now see in so many children. Kennedy also discusses the history behind and toxic influence of glyphosate, especially on your gut. (Incidentally, gut dysfunction is also a hallmark in autism.)

This is an interesting part of the interview as when Kennedy first mentions EMF, Rogan doubts it is true and doesn't believe him. After Kennedy's explanation you see Rogan morph in real time to a believer in EMF dangers and even ask his assistant Jamie to look into getting rid of the Wi-Fi.

Rogan Invites Dr. Hotez to Debate RFK

Yesterday, I [published an article](#) reviewing the online debate that erupted after this interview, when Dr. Peter Hotez took to Twitter, slamming Spotify for not clamping down on Rogan's

“vaccine misinformation.”⁶ Never mind the fact that Hotez, in April 2020, was allowed to argue his own irrational vaccine stance on Rogan’s show.⁷

Rogan replied to Hotez’s tweet, saying, “Peter, if you claim what RFK Jr. is saying is ‘misinformation,’ I am offering you \$100,000.00 to the charity of your choice if you’re willing to debate him on my show with no time limit.” Others further sweetened Rogan’s offer by adding their own donations and, by 9 a.m. EST on June 18, the pot had reached \$1.52 million.

Hotez refused, albeit indirectly. Instead of giving Rogan a direct answer, he went on the MSNBC show “Rising Reacts” and said he wasn’t willing to participate in an event that would get turned into “The Jerry Springer Show” by having Kennedy there.

Once you’ve listened to this interview, you can probably understand why no one is willing to engage in a public debate with Kennedy on this issue, particularly if you also heard Rogan’s interview⁸ with Hotez and compare the two. Kennedy has the data to back his claims and they have none.

On a side note, I find it curious that after Rogan took a beating in the press for discussing how he used ivermectin to treat a bout of COVID-19, he really hasn’t had any hard-hitting health-related truth-tellers on his show – until Kennedy.

In my view, Spotify is hardly a free speech platform, so maybe that shouldn’t be that surprising. Spotify killed our account due to a discussion about EMF, and they didn’t just take that episode down. They removed all of my content.

Rogan has an exclusive contract with Spotify that grants him more freedom than most others, but I doubt he has completely free reign. That said, I’m glad he brought Kennedy on, and allowed him to talk uninterrupted.

In 2021 Interview, RFK Jr. Reveals How Former Pres. Trump, Who Was Very Aware of the Serious Injuries Caused by Vaccines, Asked RFK Jr. to Lead a Commission on Vaccine

Safety. Trump Changed His Mind Following Pfizer's Million Dollar Contribution to His Inauguration

[In 2021 Interview, RFK Jr. Reveals How Former Pres. Trump, Who Was Very Aware of the Serious Injuries Caused by Vaccines, Asked RFK Jr. to Lead a Commission on Vaccine Safety. Trump Changed His Mind Following Pfizer's Million Dollar Contribution to His Inauguration](#)

TCTL editor's note: In 2021, Theo Von interviewed Robert F. Kennedy, Jr. Clips from this interview are found mirrored around the internet. In this interview, RFK Jr. talked about his meetings with Donald Trump wherein Trump asked RFK Jr. to head a vaccine safety commission. Trump was well aware of the serious dangers and great harm caused by vaccines as he personally knew people whose children developed serious health issues following vaccination. However, Trump changed his mind about the vaccine safety commission following a million dollar contribution from Pfizer to Trump's inauguration. RFK Jr. was pushed aside and Scott Gottlieb, who was a Pfizer consultant, was selected by Trump to run the FDA. ~ Kathleen

Partial transcript:

Theo Von:

...Trump almost gave you a position... Wasn't there talk of that? And then it kind of went away...

RFK, Jr.

Well, what happened was he ... over the Christmas vacation... 2016, he's elected right? And obviously the election is in November.

So I was skiing and with my kids in Colorado over Christmas vacation and I got a call from his chief of staff saying the president-elect wants to meet and he wants to talk about vaccines.

So, you know, I've been an activist on trying to get safer vaccines for a long time. And, of course, I agreed to meet with him.

So...immediately after getting home, I went ... to New York and met with him at Trump Tower. It was about a two hour meeting.

Theo Von:

Had you ever met with him before?

RFK Jr.

I had sued him twice before successfully. And I had met him. And, you know, the lawsuit was not something that had hurt our relationship. I stopped him from building two golf courses in the New York City watershed. And those lawsuits were about two or three years apart.

And he knew me, and he knew my family... When my sister ran for governor of Maryland, he made a big contribution to that.

He contributed to my brother, who was then in Congress. And I had a cousin who was a congressman from Rhode Island, and he made a contribution. He was a big democratic donor at that point.

He called me. He asked me to come in. I had, as I said, about a two hour meeting with him. At that meeting, people were coming in and out of that meeting.

So Steve Bannon was there. Reince Priebus. You remember him? Hope Hill was there. Kellyanne Conway. And Jared Kushner. And both the president's sons at various times were in that meeting.

Theo Von:

A lot of people.

RFK Jr.:

I had a lot of time alone with President Trump too.

He said that he believed that vaccines were making people sick. Specifically, he had three women friends who were mothers, one who was in the building that day, who had perfectly healthy kids who had gotten ... their wellness visits. And they were around two years old.

And the children never were the same after those visits. And they all had been subsequently diagnosed with autism. And he believed that it was linked to vaccines.

And... because he had been open about that during the campaign, hundreds of women had – the same thing that happened to me, that got me into this, you know, this career killing advocacy, vaccine safety advocacy...

People start coming up to you and saying... "This happened to me. This happened to my son."

"I had a perfectly healthy child who exceeded all his milestones. And I took him in at 16 months and he, you know, he was speaking, he was toilet trained, he had social interactions. And I took him in and he had a shot or a series of shots usually – could be up to nine – and that night, he's like fever 103."

I mean the stories were usually all identical. They had a seizure. And then over the next three months, they lose all of

their capacity to... their social interactions, their eye contact...

I go in there and he tells me these stories. He wants to do something about it.

Theo Von:

And does he seem serious when he's saying that?...

RFK Jr.:

Yeah, he was dead serious. And he asked... whether I would run a vaccine safety commission. And then he asked what I would do.

And I said, listen, I don't think you have to do a big political lift. All I think you need to do is open up the databases and allow independent scientists in there to actually look at the science. Because the HMOs have all the vaccine data down to batch for every child in America. And they also have the medical records.

So all you have to do – in fact... AI can do machine counting and you can do cluster analysis.

And you can figure out very, very quickly whether all of these epidemics – not just of neurodevelopmental diseases like all the ADD, the ADHD... Tourette's syndrome, narcolepsy... Autism. The allergic diseases, food allergies, peanut allergies... Asthma and then all the autoimmune diseases...

And they're all listed, by the way, on the vaccine inserts, as vaccine side effects.

Because the only way that you can sue – you know, they passed this law in 1986 and made it illegal to sue a vaccine company for injury.

You still can sue them if they know of an injury that's caused by their vaccine and they don't list it on the side effects.

So they list 400 injuries...

But they're not allowed to list it unless there is significant evidence that it is actually being caused by the vaccine.

FDA is not allowed to allow them to list it unless FDA believes it's being caused by the vaccine.

Theo Von:

So you have this meeting with Trump, just to get back to that... Did you leave out of the meeting kind of hopeful about it?

RFK Jr.:

Well, I said to him, what do you want me to do? And he said we want you to announce it. Jared Kushner escorted me to the press scrum...

So then I went down and announced it. Talked to the press.

And then a week later, Pfizer made a million dollar contribution to Trump's inaugural.

And then Trump comes in. And we continue to have some meetings with Fauci – that he had set up, were part of this process and we're rolling, to get this thing started.

Theo Von:

Did Fauci seem legit when you talked to him?...

RFK Jr.:

Oh, he's very, very charming...

Listen, Fauci – I'm about to publish a book on Fauci [see "The Real Anthony Fauci: Bill Gates, Big Pharma, and the Global War on Democracy and Public Health", published by Children's Health Defense in November 2021]... He's been there for 50 years, so he's like J. Edgar Hoover.

And the only way that you last at that agency for 50 years is by carrying water for the pharmaceutical industry.

And under his watch, he's supposed to prevent autoimmune and allergic diseases. Under his watch, chronic disease has gone from affecting 12% of the American population to 54%. And we take more pharmaceutical drugs than anybody in the world. We pay the highest prices.

He's made this country Pharmaceutical Nation.

Theo Von:

My brother is allergic to sesame seeds.

RFK Jr.:

...And the way that you get allergies is from the aluminum adjuvant in the vaccine, which is meant – is put in that vaccine to initiate an allergic response.

So if you have sesame seed oil as an excipient in the vaccine, or if you're eating sesame seeds when you have that aluminum adjuvant in you, it can provoke a permanent allergy...

So anybody who was born after 89 – I think it's one in 12 now. Autism went from one in 10,000, in my generation, to one in every 34 kids. And it's the same with all these chronic diseases that are all listed as side effects.

Theo Von:

So the proof seems to be right there.

RFK Jr.:

Well, that's correlation, which isn't actually proof. But if you actually go into the scientific literature, the proof is there.

Theo Von:

... So whenever you talked to Trump, you said, okay, let's open up this database, right, this information...

RFK Jr.:

Yeah... I said you don't have to do any heavy lifting. You don't have to go to Congress. You don't have to change regulations. All you have to do is open up the vaccine safety data link, which is the medical records for the top nine HMOs, and allow independent scientists to go in there. And just open it up so they can start publishing.

Theo Von:

And did he do it?

RFK Jr.:

No, he didn't. It's still... locked down.

Tony Fauci makes sure nobody can get in there.

And you know, even when Congress ordered these two scientists ... to go in there, and they let them into the place, they gave them one study room. They would not allow them near a copy machine. They allowed them pencils and they had to write down the data. And they cranked the heat in the room up to 105...

So anyway, so Big Pharma stepped in and Trump appoints Pfizer's lobbyist to run FDA (Scott Gottlieb) and Eli Lilly's lobbyist is Alex Azar to run HHS. And as soon as they came and they shut us down.

One in Every 16 Irish Boys has Autism: Crisis Worse than COVID-19 and Nobody Cares

[One in Every 16 Irish Boys has Autism: Crisis Worse than COVID-19 and Nobody Cares](#)

by [Robert F. Kennedy, Jr.](#), Chairman, [Children's Health Defense](#)
May 28, 2020

According to [National Health data released last week](#), autism incidence among Irish children is now at 4.3%, an 82% rise in five years. One in 16 boys is affected. [US rates](#) trail Ireland's slightly only because [CDC lies to minimize the crisis](#).

In 2016, [Judith Pinborough-Zimmerman](#), CDC's Principal Investigator for the Autism Monitoring Network (ADDM) filed a federal whistleblower suit charging that CDC routinely forces its investigators to falsify data to hide the Autism Pandemic. "The autism explosion is an acute embarrassment to CDC so they fix the numbers."

The autism crisis dwarfs COVID-19. Bill Gates' Institute for Health Metrics predicts [81,766 deaths](#) from COVID. The [average age of death](#) is 75. In contrast, autism attacks infants presaging a [lifetime of nightmarish agony](#). Half will never go on a date, write a poem, hit a baseball, join the military, pay taxes, cast a vote, run for office, speak, or use a toilet. Their [cost of care](#) is over 1/4 trillion U.S. dollars annually and rising.

EPA scientists say [the epidemic began in 1989](#), the year the CDC [dramatically expanded the childhood vaccine schedule](#), multiplying infant exposures to neurotoxins like mercury and aluminum. [CDC's massive 1999 study of the VSD](#)—America's largest medical database—showed that children receiving the Hep B vaccine in their first 30 days had an [1135% increased risk for an autism diagnosis](#). CDC and Pharma knew at that moment that vaccines were causing the epidemic.

They hid the VSD study, closed the database to independent scientists and commissioned a sketchy cabal of tobacco scientists, grifters, [felons](#) and Pharma biostitutes to gin up dozens of [fraudulent vaccine studies](#) purporting to “prove that vaccines don't cause autism.” They blocked studies of all vaccines given to children under six months. Tony Fauci played a key role in the cover up. Fauci distributes [\\$5 billion annually in research grants](#) and assured that studies of autism's environmental causes never get funded. When in 2008 NIH's Autism Coordinating Committee voted \$16 million to [study the links between autism and vaccines](#), [Tom Insel killed those studies](#). Fauci and Insel have committed some of the most consequential criminal conspiracies in history. Children's Health Defense will bring these criminals to justice.
