“If you look at what needs to be done, the problem – we don’t have the power to stop the central bankers from doing what they’re doing, but my prediction is they will fail. It’s too hard. It’s too complicated. And it’s too outside the laws of nature or the laws of divine intelligence.” ~ Catherine Austin Fitts

Transcript:

“I used to say – I used to have a pastor who would say “If we can face it, God can fix it”. And I believe that many things are possible if we can face it.

So again, transparency is very important.

If you look at what needs to be done, the problem – we don't have the power to stop the central bankers from doing what they're doing, but my prediction is they will fail.

It's too hard. It's too complicated. And it's too outside the laws of nature or the laws of divine intelligence.

And the issue then becomes, how do we as a people, pick up and build a human civilization?

So, you know, they decided they couldn't do a human civilization. They're doing something I think will fail. And the question for all of us is, how can we make sure we can take things right if, and when, they fail.

So everybody knows my favorite bible story is the story of Gideon. And that's my prediction for what's going to happen...”

“The story of Gideon is a long story. I won't tell the whole thing. But, essentially an angel of the Lord comes and asks Gideon to throw the Midianites out of Israel and Gideon insists he's too unimportant, and too helpless to do it. And the angel of the Lord says, ‘Well, that's okay we're gonna do it. You're perfect because everybody will know it was us, not you.’

So, in fact, Gideon calls for an army and the angel of the Lord... makes him go through very many tests to make him realize that he doesn't need a big army, he just needs people who are faithful and competent. And, in fact, in this environment my advice to everybody after they come clean is strip your life down to the people who are, you know, faithful and competent. And then, so Gideon comes down the side of the mountains. The

Midianites are sleeping in the valley below. And he comes down with Gideon's army, banging pitchers and lanterns. And the Midianites are so hateful and suspicious of each other, they jump up at the dark and kill each other.

And, in fact, every time I've seen someone bring tremendous transparency to what's happening, that's what happens. The Midianites – fight breaks out and the Midianites start killing each other.

And if you look at what these guys are trying to do, it's so hard and complicated, I think the Midianite thing is going to happen par excellence.

And the question for all of us is, okay, what's our plan, if and when that happens..."

"My plan is to build a human civilization. And, again, first you bring transparency, then you rebuild the economy, bottom up..."

We are now integrating very powerful technology and that means we have to be – we have to grow spiritually. You can't have this kind of advanced technology managed by cavemen. And, to a certain extent, that's what we're watching. We're giving very powerful weaponry and very powerful surveillance technology to people who are using it, behaving like cavemen."

"...I think, first and foremost, what we're dealing with is spiritual. You know, this is part of a ten thousand year old war and the outcome depends on our our ability to spiritually evolve and grow up.

So, you know, I tell everybody death is not the worst thing that can happen... What can happen is, you can lose your immortal soul. That's your danger. So stop worrying about

death and start worrying about, you know, whether you're going to be free or not."
