

Children's Health Defense: Tell Schools, Universities – No COVID Vaccine Mandates for Kids and Teens

[Tell Schools, Universities: No COVID Vaccine Mandates for Kids and Teens!](#)

CHD is asking everyone who supports medical health freedom to contact all colleges and universities in their state and ask them to come down on the side of medical freedom by rejecting COVID vaccine mandates.

Children's Health Defense (CHD) is calling on vaccine safety advocates to reach out to schools and universities with this message: No COVID vaccine mandates for children and young adults!

On June 23, the Centers for Disease Control and Prevention's (CDC) Advisory Committee on Immunization Practices (ACIP) said that there is ['likely' a link](#) between heart inflammation and the [Pfizer](#) and [Moderna](#) COVID Vaccines.

CDC officials acknowledged more than [1,200 cases of myocarditis or pericarditis](#) in 16-to-24-year-olds who received an mRNA COVID vaccine. The U.S. Food and Drug Administration responded by saying warning labels will be added to the vaccines.

Still, CDC officials said the benefits of COVID vaccines

outweigh the risks.

CHD is asking everyone who supports medical health freedom to send letters or emails to all colleges and universities in your state asking them to come down on the side of medical freedom by rejecting COVID vaccine mandates.

CHD has created spreadsheets containing a list of more than 300 universities that are considering mandates. [The first spreadsheet](#) is a listing of university systems with links to mandate policies, etc. [The second spreadsheet](#) provides information for emailing and mailing to more than 300 individual universities. You can also visit [this page on the CHD website](#) to learn more about this campaign.

“School and university officials should not have the ability to mandate any medical procedures including vaccinations,” said Laura Bono, CHD executive director. “In this case, the long-term effects on humans of any age from this experimental vaccine are unknown. The policy is reckless and unwarranted.”

Bono pointed to a recent [op-ed](#) in the Wall Street Journal, written by two physicians, which stated:

“Public-health authorities are making a mistake and risking the public’s trust by not being forthcoming about the possibility of harm from certain vaccine side effects. There will be lasting consequences from mingling political partisanship and science during the management of a public-health crisis.”

There is no time to wait. Colleges and universities are [considering mandates](#) now – now is the time to work for policy change. Please support this effort.
