Christine Massey Interviewed by Prof. Michel Chossudovsky: On FOIA Requests & Responses to the Question — Has SARS-CoV-2 Ever Been Isolated? Does the "Virus" Exist?

Christine Massey Interviewed by Prof. Michel Chossudovsky: On FOIA Requests & Responses to the Question — Has SARS-CoV-2 Ever Been Isolated? Does the "Virus" Exist?

by <u>Christine Massey</u> and <u>Prof Michel Chossudovsky</u> August 18, 2021

The Chinese authorities announced on January 7, 2020 that they had isolated and identified "a new type of virus". Then on the 28th of January 2020, the US Centre for Disease Control and Prevention (CDC) stated that the novela corona virus had been isolated.

Christine Massey, M.Sc conducted an extensive report over a period of more than a year. The central question raised in her study is the following:

"is there reliable evidence that SARS-CoV-2 has been isolated from an "unadulterated sample taken from a diseased patient"?

Christine Massey submitted Freedom of Information (F0I) requests to some 90 Health /Science institutions.

Does the Virus Exist? The responses to these requests confirm

that there is no record of isolation / purification of SARS-CoV-2 "having been performed by anyone, anywhere, ever."

Dear Health Ministers.

I am writing to you on advice from the Australian Department of Health (the Department) to seek clarification on information requested in a Freedom of Information (FOI) request that was sent to the Department.

The Department's initial response on 24th August 2020 (attached: "Initial FOI 1937 Response"), stated: "To obtain the information you are seeking please direct your request to the various State and territory Departments of Health".

After further correspondence between the FOI author and the Department, a more formal response was given (attached: "FOI 1937"), yet the outcome remained the same.

I am therefore writing to you to on initial advice by the Department of Health to confirm whether you do hold the information requested in the original request to the Department, as shown in attachment "FOI 1937" and pasted again below:

"All records in the possession, custody or control of The Department of Health describing the isolation of a SARS-COV-2 virus, directly from a sample taken from a diseased patient, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka vero cells; lung cells from a lung cancer patient). Please note that I am using "isolation" in the every-day sense of the word: the act of separating a thing(s) from everything else. I am not requesting records where "isolation of SARS-COV-2" refers instead to:

the culturing of something,

A or the performance of an amplification test (i.e. a PCR test),

or the sequencing of something.

Please also note that my request is not limited to records that were authored by The Department of Health or that pertain to work done by The Department of Health. My request includes any sort of record, for example (but not limited to) any published peer reviewed study that The Department of Health has downloaded or printed.*

I look forward to your response.
