An Austrian parliamentary member exposed the defectiveness of the government's COVID-19 tests by demonstrating in the parliament how a glass of [Coca Cola tested positive for COVID-19](#).

In footage from the meeting in Vienna Friday, FPÖ General Secretary Michael Schnedlitz brings a glass of Coca Cola to the podium, from which he proceeds to collect drops to use on an antigen rapid test being used on a mass scale.

After going to the lectern and starting his speech, the politician sprinkled few drops of cola on corona rapid test. Three minutes later the test showed a result: Coca Cola was COVID-19 positive.

After demonstrating a positive result, Schnedlitz goes on to slam the tests as a waste of taxpayer resources.

"Mr. President, we are likely to have a problem now, we have a positive corona test in parliament, namely this cola triggered a positive corona test. I don't know how to deal with it now! With things like this you are throwing tens of millions of euros in tax money out of the window instead of providing real protection for old people's and nursing homes, instead of investing money in our hospitals."

The corona mass tests are worthless! This was also shown by a simple experiment in parliament, in which a cola had a positive result! But this black-green government spends tens of millions in tax money on precisely these tests."

Earlier, the Tanzanian President John Magufuli growing suspicious of the World Health Organization (WHO), decided to investigate the claims of the tests himself. He sent the WHO samples of a [goat, a papaya and a quail for testing, all of which came COVID-19 positive](#).

Because of such [massive COVID-19 false positive](#) cases scandal, the [Australian Government has scrapped a billion dollar coronavirus vaccine agreement](#) with Australian biotech company CSL Limited to supply 51 million doses of a Covid-19 vaccine being developed by the University of Queensland after several trial participants returned false positive HIV test results.

It should be noted that the [Portuguese appeals court has ruled that PCR tests are unreliable](#) and that it is unlawful to quarantine people based solely on a PCR test.
