January 30, 2021

In a week where it was reported that the New York State Attorney General admitted that nursing home deaths in New York State for 2020, already recorded as numbering tens of thousands, were [undercounted by as much as 50%](#) with Governor Andrew Cuomo reportedly stating “Who cares?”, and where numerous reports all over the world have recorded hundreds of seniors dying in assisted care facilities this week after the roll out of the experimental COVID mRNA injections, something truly amazing happened in Vancouver, Washington last night.

The people of the community, many members of “People’s Rights Washington,” turned out in mass to rescue a 74-year-old woman at Legacy Salmon Creek Hospital where she had been medically kidnapped, and was being held against her will, and against the will of her daughter who has medical power of attorney for her mother.

This group of 40-50 citizens, 90% of whom were women (mothers) and their children, stared down an army dispatched from the

Clark County Sheriff's department in full riot gear, endured being grabbed by the throat and pepper sprayed, and refused to leave the hospital until 74-year-old Gayle Meyer was released back into the custody of her daughter, Satin.

Satin took her mother to the hospital the night before to get treatment for a urinary tract infection (UTI), and had been with her until 4 a.m. before returning home to get a few hours of sleep before heading back to the hospital the next day.

Their primary care physician had already written a prescription for an antibiotic, and Gayle was supposed to be released and sent home with her daughter, who is also her medical power of attorney.

But when Satin arrived at the hospital, she was told that not only could she not take her mother home, but that she could not even see her mother, because she refused to take a COVID test.

That's when Satin called her friends, who responded by heading to the hospital to find out what was going on. The nursing staff allegedly changed their story a few times, first saying that Gayle had refused to take a COVID test and was therefore being quarantined, but then later allegedly changing their story and stating that Gayle did in fact take a COVID test, and had to remain in the hospital for at least 24 hours until the results of the test came back.

Her daughter Satin, who had been in the hospital with her mother the day before until 4 a.m., had made it clear that her mother did not need nor want a COVID test, since she only had a UTI and was only in the hospital to be put on fluids.

The nurses allegedly also stated to Satin that they had also put her mother on oxygen, which greatly surprised Satin and her friends who were now showing up at the hospital to support her and her mother. Her mother, Gayle, allegedly has never before had to be put on oxygen, and certainly a UTI does not

warrant oxygen.

As we have documented many times since COVID started last year, many deaths blamed on COVID in fact are caused by improper treatment, especially when a patient is intubated and put on a ventilator, where the death rate is over 90%.

Obviously becoming very concerned at this point that her mother who had a simple UTI was now being medically kidnapped and forced to stay in the hospital against her will and receive treatments she did not want, Satin and her friends called the County Sheriff office to come and assist them get Gayle out of the hospital.

The woman who filmed the entire ordeal, Kelli Stewart, explained that she had spoken to the Sheriff dispatcher, and she was told that the Sheriff was not going to respond and get involved.

However, as they were talking, the dispatcher allegedly stated that now the hospital had also called, so they were sending officers to the scene.

As you will see in the video below, the Sheriff deputies and officers were there to protect the hospital and Big Pharma, and NOT to represent their constituents and fulfill their oath of office to protect their constituents, and in this case, to prevent a medical kidnapping.

In fact, at one point Satin attempts to enter the hospital behind another patient who was entering, and an officer grabs her by the throat, and pushes her back.

The officer then used pepper spray on the people who were standing outside, who were all unarmed and primarily women and children.

Everything was captured on video, and I have watched the entire 2 hours of film footage, and condensed it down to under

53 minutes. This is from our [Rumble account](#), and it is also available on our [Bitchute Channel](#).
