"Liberty is not for these slaves; I do not advocate inflicting it against their conscience. On the contrary, I am strongly in favor of letting them crawl and grovel all they please before whatever fraud or combination of frauds they choose to venerate...Our whole practical government is grounded in mob psychology and the Boobus Americanus will follow any command that promises to make him safer."

~ H. L. Mencken

We are in the midst of one perceived fake threat after another claimed by the state, and each day seems to bring more and more events best described as fantasy; or to a greater extent, purposely produced and directed theatre. Hollywood could not manage these false flags any better, or maybe the movie design of all these staged events and government are fully coordinated and choreographed.

Regardless of where we begin, all of this could easily be

placed under the heading, "You just can't make this s**t up!" It appears that each and every 'event' is meant for one or another purpose, but lies and cover-ups by this corrupt government and its bought and paid for media, are certainly beyond obvious.

It is interesting to look at time lines to find out the sequence of events, so as to find if one is being used to cover another. The East Palestine train 'derailment' actually happened on February 3rd, which was two weeks ago. This is one of the most devastating toxic releases of deadly poison ever to occur, and was intentionally detonated under the guise of protecting the residents from a possible explosion. In other words, this train full of incredibly deadly chemicals, was intentionally blown up (exploded) to 'protect' the citizens from a possible explosion. Very little if anything was reported about this life-changing event by any major news outlet, and did not become well known until many days later when the uproar reached high levels. The White House and government did not comment for a week. In the meantime, the first so-called Chinese balloon that was recognized on February 3rd, (the same day of the toxic release in Ohio) was shot down over the Atlantic the next day, and the balloon fiasco became the most major story in the mainstream media, while thousands of people's lives were threatened, fish and animals were dying, and lethal poisons were traveling across the country. Coincidence? Not hardly.

Since that time, and still, any number of planted objects have continually been shot down; these stories inundating the mainstream news. As an aside, in 2022, a movie called "White Noise," (I am not linking this) was released, which portrayed a train derailment in a small town in Ohio, that allowed a toxic release of deadly chemical poisons. In addition, the train that derailed recently, was filmed by security cameras 20 miles before it reached East Palestine, and showed the rail car that supposedly caused the derailment was on fire, but the

train was not stopped. Why?

But do not worry, as this evil government has vowed to investigate this tragedy, well after it happened, and only due to exposure, which in effect is like investigating itself; this after the White House and FEMA turned down disaster relief for East Palestine while spending tens of millions to shoot down balloons. This tragedy and environmental disaster has been described by many as the same as a chemical nuclear bomb being dropped on the area.

It just so happens that the two largest shareholders of Norfolk Southern, the rail company in question, and said to not be carrying toxic and deadly chemicals before derailing in East Palestine, are Vanguard and Blackrock. Worry not however, as Norfolk Southern has said it is 'making plans' to create a \$1 million dollar charitable fund to support all the residents of East Palestine. For those with weak math skills, this equates to about \$200 per person. Of course, the millions who will likely be very adversely affected by this across a large swath of this country are just out of luck, as they will not receive their \$200. This is akin to shutting down businesses across the country, many closed for an undetermined amount of time, and many going bankrupt, all for a fake 'pandemic,' and receiving a check from the same government that shut them down, for \$1,200 for their misery.

To add insult to injury, the very evil EPA has announced that all the air and water after this intentional release of deadly toxins in East Palestine, is safe. Of course their track record does not bring confidence, as the toxic waste and poisons in the air in New York after the state-sponsored terror attack of 9/11, was given the same "safe" to breathe label. These past few years have brought much in the area of safe, or "safe and effective." How has that worked out so far?

How many negative events, especially any that could be harmful to government, are covered up? How many cover stories or

plotted secondary 'emergencies' are used as cover for government terror, government policy, or mandates that caused great harm? Think of the Ukraine plot, continuous false flag events, the recent U.S. terror campaign and blowing up of the Nord Stream pipelines, fake pandemics, the made-up China and Russia threat, the bioweapon injection meant to harm hundreds of millions here and billions worldwide, the new and ridiculous current UFO scare, and killer balloons. What about fake cyber threats and cyber false flag scares, what about the slaughter of chickens and farm animals, what about manufactured food shortages, what about energy plant destruction, what about money expansion and debt, and brutal price increases meant to harm all? What about all the state complicity and questions concerning so-called school shootings, and then the inevitable new gun laws enacted immediately after each event?

Consider also that any event that paints an undesirable picture of the state or government, or that indicates state involvement or lies, or that is a coverup meant to cloud the minds of the sheep so that they remain blind to the obvious truth, are hidden due to false media coverage of staged events, just as is now happening with this balloon nonsense. Consider the killer 'earthquakes' in Turkey that are possibly manmade, all at the same time once again happening during the massive balloon threat. It is rarely mentioned in the mainstream, but the Pentagon has been releasing advanced surveillance balloons domestically and internationally for very many years, but this goes unnoticed and unreported in the midst of the current balloon invasion.

Once again, everything in politics and government is planned in advance, is not accidental, any coincidence, natural, or organic, as all is staged in one way or another to either affect a certain outcome, or cover up another. Believe nothing in the mainstream or government, trust nothing, question everything, and never accept any reports unless you can verify

the real facts in order to find the truth.

“All governments are run by liars and nothing they say should be believed.”

~ I. F. Stone
