Truth Comes to Light editor's note:

Excerpts from Transcript

Believe it or not, we are winning the battle. Before Covid-19, vaccine hesitancy in this country was at 10 percent. Now it's up to 30%. Their agenda is backfiring on them. In the United States, it's 52%. In places like Pakistan, Ghana it's 98-99%. And so their total vaccination rate globally now is at a mere 10%.

If you want vaccines, God bless you. I would go to court to support your rights. But what you can not do is force people to engage in something they don't want.

...

The other thing you need to know – they are approaching 12 trillion dollars that they have spent on this agenda. And it's backfiring on them. Twelve trillion dollars is essentially the entire US budget for a year.

...

Understand what they put into this just in terms of money, never mind control and surveillance.

So what have they managed to do?

...

In pitting the vaccinated against the unvaccinated, what have they done? And I see it in the faces in the crowd here. It's a marvelous thing they've done actually. They've created the first human tribe that cuts all racial, ethnic, political...They have created the tribe that all idealists throughout the ages hoped would be created.

The only thing that ties this multi-racial, multi-political, multi-socioeconomic, multi-gender, multi everything – is the sole wish and desire to have their freedom of choice in their physical and psychological autonomy to be up to them. And that's what defines humanity – the freedom to choose how you're physically and psychologically living.

So through their depraved, nasty, tyrannical, fascist methods they've created the human society that we've all dreamt of.

So stick together. Let's get more people in our ranks. If you value freedom, you value your body and your mind, you will resist this ugly, corrupt agenda by these fascist losers.
