

Cosmic Wars, Interplanetary Breakaway Elites & 'Off Planet Origins'

by [Beyond the Obscure](#)

June 7, 2018

"...Physicists are coming to the conclusion ... increasingly it's getting difficult to ignore the physics evidence that suggests that the universe was created for intelligent observers to emerge. "

"...I do think that every tradition that deals with this subject, particularly the Judeo-Christian, does indicate that the fall of man enslaved him to processes of thought, to habits of action, that essentially are not part of the original scheme of things..."

"...The problem now is technology is unifying the world. And so, mister global is in the end game. But the problem is mister global is not a monolithic entity. It's several factions and they all want to be in control and on top..." ~ Joseph P. Farrell

Description of this interview by Mike of [Beyond the Obscure](#)

In this 1st part of a 2 part discussion,

I had the honor and privilege to be able to interview Dr. Joseph Farrell in person.

Join us in this mind-blowing discussion as we delve deep into the many mysteries of our Ancient past all the way up to modern day.

We began the talk in the far ancient past as we try and unravel the mysterious origins of man. Joseph gave us his thoughts on Zacharia Sitchins work as he states his own ideas as to the origins of humanity and how the human race began.

He gave us his thoughts on why the God of the Old Testament in the Bible is a Doom and Gloom kind of God. He also talked about Genesis [1:26](#), "Come let us make man in our image and after our likeness" and he gave a good explanation to that verse.

He explained how Christianity will eventually catch up to terms that its origins are more Egyptian than anything else. He also explained how Mars had a civilization long, long ago and the people there had some type of cataclysmic type event that destroyed all life on the red planet.

I entertained the idea that possibly before the cataclysmic event took place, the rich and powerful got a one way ticket to Earth as a type of Ancient Breakaway Civilization that came and seeded life here on this Blue Planet.

He mentioned how Mars may have been a moon to another planet that exploded which created the Asteroid Belt. While on the Mars topic we discussed how Cairo, Egypt means "Place or Camp of Mars". And that could possibly tie in the connections to the Face and Pyramids on Mars with the Pyramids and Sphinx in Egypt.

TALKING POINTS:

Ancient Cosmic War

Ancient Origins of Man

Were We Created as a Slave Species?

Intervention of the Gods

Creation Epics

Exploding Planet Myths

Mars Flood and Mythology Breakaway Civilization

Tribal Legends

Planetary Seeding

Asteroid Mining
