

Countries That Have Stopped 5G Now Include New Guinea and Slovenia

Countries That Have Stopped 5G Now Include New Guinea and Slovenia

by [BN Frank](#)

March 16, 2020

In 2017, doctors and scientists [asked for a worldwide moratorium](#) on 5G due to biological and environmental risks. Since 2018 there have been reports of people and animals getting sick where it was turned on (see [1](#), [2](#), [3](#), [4](#)). **In February 2019 the telecom industry gave U.S. congressional testimony that they have [NO scientific evidence](#) that it's safe.** Worldwide opposition continues to increase due to biological and environmental risks and MUCH MORE (see [1](#), [2](#), [3](#), [4](#)). Many cities, countries, and [organizations](#) have taken action including [banning it](#), filing lawsuits and issuing [moratoriums](#).

Thanks to Environmental Health Trust for compiling an international list of where [5G has been halted or delayed](#).

The growing awareness of the health impact of the 4G/5G densification is resulting in action by policymakers worldwide. Cities are issuing resolutions and calls for research before deployment. There are citizen organizations in almost every country working on this and a growing list of public officials speaking out.

March 2020: Slovenia halts 5G

5G has been halted in Slovenia

Official Government of the Republic of Slovenia web site page: [Minister Rudi Medved: Questions regarding 5G are addressed from a health, ethical and safety point of view](#)

[Official public Slovenia Television web-site on Minister decision that negative effects of 5g are legit, also stating possible health effect:](#)

A letter – in Slovenian and unofficial English translation on official Ministry of Public Administration memo and with Minister name on it stating legal basis for further 5g activities in Slovenia were withdrawn from Government meeting also due to possible health effects of 5g.

[“Slovenia stops the introduction of 5G technology: We do not know if it is dangerous to humans”](#)

[...]

Papua New Guinea

[1/2/2020 Post Courier: Minister Masiu halts 5g trials amid health risk debate](#)

5G opposition and warnings continue to increase in the U.S. as well (see [1](#), [2](#), [3](#)). Lawsuits have been filed (see [1](#), [2](#), [3](#), [4](#)). In December 2019, doctors, scientists, engineers, and public advocates asked President Trump for a [moratorium on 5G](#).

More bad news: it's [not just 5G that isn't safe](#). All sources of [cell phone](#) and [wireless WiFi radiation](#) – 1G through 4G – are [harmful too](#). Exposure can increase cancer risk and [much more](#). **In fact, pollution from all sources of Electromagnetic Radiation (“[Electrosmog](#)”) is harmful.** Experts insist we should be [reducing sources of Electrosmog](#) – not increasing it. Despite all of this, the “Race to 5G” continues worldwide

and includes [satellites](#) blasting 5G and WiFi from space.
