How dire are conditions in our last remaining wilderness areas? What primary factors are fueling the record wildfires that are incinerating formerly thriving forests? What aren't official agencies telling us?

In this first installment of "Into The Wild", I will show film footage evidence of the rapidly deteriorating forest environments in Northern California. If the forests die, we will perish with them.

Forests are dying and burning all over the world, covert climate engineering operations are a core causal factor. All are needed in [the critical battle to wake populations](#) to what is coming, [we must make every day count](#). Share [credible data](#) from a credible source, make your voice heard. Awareness raising efforts can be carried out from your own home computer.
