[“HIV does not cause AIDS” – David Rasnick](#)

by [Jeremy Nell](#), [Jerm Warfare](#)

August 10, 2021

[Dr David Rasnick](#) is an American biochemist with decades of specialisation in AIDS; arthritis; cancer; proteases in emphysema and parasites; drug design; and clinical diagnostics.

He also participated as a member of the Presidential AIDS Advisory Panel Of South Africa, under then-president Thabo Mbeki.

Which, of course, is where it gets interesting.

The president was recalled for being an “AIDS denialist” because he questioned the link between HIV and AIDS. David says that Thabo Mbeki deserves an apology, and that Jacob Zuma’s highly profitable ARV rollout is directly responsible for the deaths of hundreds of thousands of South Africans.

Molecular biologist [Judy Mikovits agrees](#), as do [many other scientists](#).

If you’re interested in refreshing your memory, then [download](#)

[Thabo Mbeki's \(infamous\) AIDS Report from March 2001](#), of which David was a co-author.

David joined me for a conversation about why HIV does not cause AIDS.

he paper to which he refers – *The Tyranny Of Dogma* – can be downloaded [here](#).

And the “missing tapes” David spoke about, have been located and can be watched below.
