Summary of “The Great Taking”

It is about the taking of collateral (all of it), the end game of the current globally synchronous debt accumulation super cycle.

This scheme is being executed by long-planned, intelligent design, the audacity and scope of which is difficult for the mind to encompass. Included are all financial assets and bank deposits, all stocks and bonds; and hence, all

underlying property of all public corporations, including all inventories, plant and equipment; land, mineral deposits, inventions and intellectual property.

Privately-owned personal and real property financed with any amount of debt will likewise be taken, as will the assets of privately owned businesses which have been financed with debt.

If even partially successful, this will be the greatest conquest and subjugation in world history.

Private, closely held control of ALL central banks, and hence of all money creation, has allowed a very few people to control all political parties and governments; the intelligence agencies and their myriad front organizations; the armed forces and the police; the major corporations and, of course, the media.

These very few people are the prime movers. Their plans are executed over decades. Their control is opaque.

To be clear, it is these very few people, who are hidden from you, who are behind this scheme to confiscate all assets, who are waging a hybrid war against humanity.
