

Disclosure & The Metaverse

[Disclosure & The Metaverse](#)

by [Rosanne Lindsay](#), Traditional Naturopath, [Nature of Healing](#)
October 17, 2024

Since 'hindsight is 20/20,' what happened in 2020?

In 2020, the new, experimental mRNA injections rolled out as a premeditated response to Coronavirus. What was on the package inserts of the products?

Nothing.

The inserts were blank. This way, companies could not be held liable for any ill effects following injection. It's called [indemnity](#), an exemption from penalties.

Fast forward to 2024. Eureka! Suddenly scientists know what was in those Emergency Use Authorized (EUA), FDA-unapproved COVID injections!

Nanotechnology Through a Needle

According to an Argentinian study, scientists discovered 55 undeclared chemicals and metals not listed on package inserts. The study published last week in the [International Journal of Vaccine Theory, Practice, and Research](#) discloses:

Among the undeclared chemical elements were detected 11 of the 15 cytotoxic lanthanides used in electronic devices and optogenetics. In addition, among the undeclared elements were all 11 of the heavy metals: chromium was found in 100% of the samples; arsenic 82%; nickel 59%; cobalt and copper 47%; tin 35%; cadmium, lead and manganese in 18%; and mercury in 6%. A total of 55 undeclared chemical elements were found and quantified...

James Lyons-Weiler, Ph.D., a member of the journal's editorial board [said](#), "*Individually*, these chemicals are known to cause neurological, cardiovascular and immunological damage."

What is not disclosed? [Metals and chemicals are required for nanopolymers](#). Delivered through a needle, they target specific areas of the body for 'connectivity' to the [Internet of Things](#).

Disclosure & Implied Consent

No matter where the information is found in the media, whether in [an article](#), [social media](#), [cinema](#), [documentary](#), or hidden in a [medical journal study](#), the architects who create toxic products must disclose the information somewhere, whether perceived [positively](#) or [negatively](#). Of course how *you* perceive the information is up to you.

In 2020, social media tracking of information suggests [43% of content retrieved on Google was antivaccination in nature](#). However, today, it is nearly impossible to find a negative campaign against the jab.

As long as the deed is visible, it has been exposed, even if it is *after the fact*. This is called *implied consent*.

No response is considered to be *silent acquiescence*. This means that by your non response, you have agreed to the methods used.

When hindsight is 20/20, it means "too little, too late." The deed is done.

Biodigital Convergence

There is another purpose to the disclosing information after the fact; that is to misdirect an investigation. Four years later, mRNA is *old* information since, in the Information Age, old news happens yesterday, not four years ago.

For at least [two decades](#), scientists and governments have been

paving the way toward Transhumanism, the merging of humans and machines. The way to Transhumanism is through Biodigital Convergence. Read more [here](#).

In the coming years, biodigital technologies could be woven into our lives in the way that digital technologies are now. Biological and digital systems are converging, and could change the way we work, live, and even evolve as a species. More than a technological change, this biodigital convergence may transform the way we understand ourselves and cause us to redefine what we consider human or natural.

In the Covidian Age, "CORONA" represents the addition of metamaterials, to augment humans and [upgrade the system with faster speeds to run more applications](#). According to a 2021 study in the [American Journal of Bioinformatics Research](#), "corona is a non-communicable disease spread worldwide through wireless sensor technology...

To The Metaverse!

The positive side of Hindsight is Foresight. Instead of looking to the past, we can focus on what is unfolding now, and into the near future.

Biodigital Convergence leads to Smart cities, Cognitive(C40) cities, Blockchain, Reverse engineering, Digital Twin, Self-assembly nanotechnologies, the [Internet of Bodies](#), and more... in the connected future of the Metaverse.

If Biodigital Convergence sound like a Virtual Reality, then you are one step closer to your Avatar. Will you become an Avatar in the Metaverse? Watch the feature film, [Avatar](#) for disclosure.

The architects of converging technologies want everyone to live a Metaverse of *their* construction.

Of course, disclosure is found openly, in Sci-fi movies, and fiction. However, for a drier presentation, it is also found

in a slideshow from the 2022 [International Electrotechnical Commission](#). For current and future standards that will run The Convergence, read the [480-page report on the National Nanotech Initiative \(NNI\)](#).

The [NNI recently celebrated its 20th birthday](#). This proves that mRNA nanotechnology is *old* news. It does not discriminate against gender, sex, race, or religion. This global initiative seeks to incorporate *everyone*, everywhere. They have our consent through silent acquiescence.

The concept of 'vaccine status,' along with related [vaccine science](#) and [laws](#) are mere propaganda and distraction. These are symptoms of *past* strategies that lead to future 'connectivity.' Unfortunately, focus on vaccines is exactly where architects want people to be.

Foresight might be fuzzy, but without it, we are left scrambling in the past.
