From the [book's website](#),

"Dissolving Illusions details facts and figures from long-overlooked medical journals, books, newspapers, and other sources. Using myth-shattering graphs, this book shows that vaccines, antibiotics, and other medical interventions are not responsible for the increase in lifespan and the decline in mortality from infectious diseases. If the medical profession could systematically misinterpret and ignore key historical information, the question must be asked, "What else is ignored and misinterpreted today?"

The word "[vaccine](#)" is like a swearword. It triggers all sorts of emotions for reasons I don't understand. In fact, the [vaccine industry](#) is akin to a [religious cult](#).

Before this [pandemic](#) I didn't ask the questions [that I do now](#).

Thankfully, I'm not alone.

Many people have begun thinking critically [about what's going on](#).

Enter [Dissolving Illusions](#) co-author Roman Bystrianyk, who joined me for a conversation about the history of vaccines and the fake claims made about them.
