"...This is why it's so important to understand that [there's no virus](#) because, if there's no virus, how could you transmit anything from person to person? You don't need to do a study because you know you can't – because there's nothing to transmit." ~ Dr. Andrew Kaufman

Topics discussed:

- What it means to isolate a virus or anything else
- What it means to satisfy Koch postulates in medical science
- Global manipulation via controlled narrative
- Germ Theory vs Terrain Theory
- The real role of bacteria
- Understanding the microbiome
- A general overview of the entire COVID narrative
- How the elite avoid western medicine (big pharma, vaccines, etc.) for their own families
- A vision for the future of medicine and health care
