"...This is why it's so important to understand that there's no virus because, if there's no virus, how could you transmit anything from person to person? You don't need to do a study because you know you can't – because there's nothing to transmit." ~ Dr. Andrew Kaufman

Topics discussed:

- What it means to isolate a virus or anything else
- What it means to satisfy Koch postulates in medical science
- Global manipulation via controlled narrative
- Germ Theory vs Terrain Theory
- The real role of bacteria
- Understanding the microbiome
- A general overview of the entire COVID narrative
- How the elite avoid western medicine (big pharma, vaccines, etc.) for their own families
- A vision for the future of medicine and health care
