In what is perhaps one of the most in-depth public interviews ever recorded with Dr. Brian Hooker (over 90 minutes), who is featured in the recent film *VAXXED* which is creating major controversies in film festivals all across the U.S. as powerful vaccine special interest groups try to censor the film, Dr. Hooker reveals on the *National Safe Child Show* how his 10 year fight with the Centers for Disease Control (CDC) resulted in one of the top vaccine scientists at the CDC contacting him to become a whistleblower regarding vaccine research fraud.

Dr. William Thompson of the CDC was a co-author of a landmark vaccine research paper published in 2004 that supposedly proved that there was no correlation between the Measles, Mumps, and Rubella 3-combo vaccine (MMR) and autism. However, in phone calls between Dr. Thompson and Dr. Hooker in 2014 that were secretly recorded, Dr. Thompson revealed that the CDC deliberately hid and destroyed data that showed there was in fact a link between the MMR vaccine and autism among certain groups of children.

Since that study was published in 2004, justifying retaining the MMR vaccine in the CDC schedule of childhood vaccines, autism rates have sky-rocketed, with over 1 million children being diagnosed with autism during this period.

After the [phone conversations between Dr. Hooker and Dr. Thompson went public](#), Dr. Thompson hired a whistleblower attorney, and sent all of the data that he had retained showing the fraud to U.S. Representative Bill Posey. According to Dr. Hooker, Dr. Thompson was also deposed and filed an affidavit that Congressman Posey retains in his possession.

Yet in spite of these revelations, not one Congressional committee chair has called a hearing to subpoena Dr. Thompson and investigate fraud at the CDC.

In this interview with Dr. Hooker on the [National Safe Child Show](#) and Tammi Stefano, Dr. Hooker explains how he was harassed and opposed by the CDC as [he spent over 10 years filing over 100 freedom of information acts](#) (FOIAs) to recover raw data sets used to publish research on vaccines by the CDC. After 10 years, and with the help of Congressman Bill Posey, Dr. Hooker finally got the raw data he had been seeking, and performed his own analysis on the data. He found that [the CDC had deliberately hid data that opposed their own public statements on vaccine safety and autism](#). His press release announcing this CDC fraud quickly went viral in social media and in the Alternative Media, while the mainstream media used the usual analysts to defend the vaccine industry and attack Dr. Hooker.

That would all change a few months later, as Dr. Thompson from the CDC began telephone conversations with Dr. Hooker leading him to even more data that had been hidden by the CDC. The news never received mainstream media attention, and nothing was done in Congress. In this interview with Tammi Stefano, Dr. Hooker will reveal why this information continues to be censored. It became the subject of the film *VAXXED* produced by Del Bigtree (see: [Producer of VAXXED Speaks Out: "This is Bigger than Watergate"](#)) and directed by Dr. Andrew Wakefield.

Every citizen of the United States, whether [pro-vaccine or anti-vaccine or anywhere in the middle](#), should be outraged at this fraud, and the ongoing censorship of this CDC fraud.

Watch this comprehensive interview with the man who uncovered this fraud, and then urge your elected officials to also watch it, and to immediately call Congressional hearings on CDC vaccine fraud, and subpoena Dr. William Thompson.
