Dr. Bruce Lipton: Back to the Quantum Future | The Field of Consciousness

In recent times, civilization has been on a wild ride ... and it's about to get wilder! As I have described in recent communications, human behavior has undermined the Web of Life and has precipitated the Earth's 6th Mass Extinction event. Crisis precipitates evolution ... to survive, civilization must radically change its destructive behavior.

It is not a coincidence that Astrology has fully predicted this period of intense planetary chaos. Unfortunately, the influence of Astrology on human behavior has been dismissed by conflicting beliefs provided in conventional Newtonian physics, wherein matter and energy are defined as separate, non-interacting realms. Simply, a body made out of matter cannot be influenced by energy "fields," and this would be especially true for those fields generated by distant planets and stars.

However, this notion of a dual-realm Universe comprised of both matter and energy is a total misperception. The most valid and truthful science, quantum physics, emphasizes that the Universe is a "singularity" comprised of only energy, with the notion of matter as a separate realm being an illusion.

Time for a good Einstein quote: "Reality is merely an illusion, albeit a persistent one."

The simple fact is every "thing" in the Universe is made out of energy and all energies are entangled and interconnected. In this regard it is relevant to again cite Einstein: "The field is the soul governing agency of the particle." Nano-energy fields comprise the structure of protons, neutrons and electrons and these energy fields provide the physical character of atoms, the elemental particles we perceive as matter.

Astrological energy fields have a predictive character in influencing the behavior of large populations of organisms. However, it is important to note that these fields do not predict the behavior of all individuals within a community, this is especially true in regard to individuals within human communities. Esoteric astrologers and learned academic astrologers recognize that as individuals become more conscious, more self-empowered, they become less influenced and more independent of these energy fields.

The following regards the imminent astrological influences that are radically altering the behavior of human civilization.

Behold the Great Chronocrator

On December 21st, the winter solstice in the Northern hemisphere and summer solstice in the Southern Hemisphere, Earth will be profoundly influenced by a Grand Conjunction when the planets Jupiter and Saturn are in straight alignment with the Earth. Together, these aligned planets are known as the Great Chronocrator, which means the "Markers of Time," for their alignment has always been associated with epochal social change.

The chaos the planet is now experiencing will be supercharged as we head toward the solstice. I am sure you can feel it in

the air (actually, the field). Civilization is facing a date with Destiny. To get a little insight into what is unfolding, checkout the current predictions offered by my favorite, right-on astrologer, Linda S. Masterson's column [Soul Solutions](#).

The following excerpt is an important insight offered by Linda, "REMEMBER: The wilder the ride, and the faster the energies move, the greater the opportunity to transform energies and to shape one's own reality."

NOW ... the good news: Quantum physics emphasizes that "consciousness creates our reality." The new technology of magnetoencephalography (MEG), as apposed to EEG (electroencephalograph), demonstrates that our brain, acting like a tuning fork, broadcasts our thoughts into the environment as "personal" energy fields.

In the midst of all this chaos and upheaval, it is personally important to consciously set your intentions, your personal goals, purpose or aim, for the fields they produce profoundly influence our unfolding future. It helps to visualize a desired future, seeing where you are and what you want to be doing in that future. To support this intention, write it out in full detail as if you are currently living that experience, this effort reinforces the conscious vision.

However, we must heed the maxim, "The road to hell is paved with good intentions." The fact is that good intention alone is meaningless. Intentions must be followed by good actions. Remember that the intentions we desire or wish for are created by conscious mind. However, the actions to manifest those desires are derived from the subconscious mind, which controls our behavior and our actions, 95% of the time.

Since many of the subconscious programs acquired before age 7 are disempowering, self-sabotaging and limiting, our good intentions unconsciously end up being the road to hell. So,

“Part 2,” in addition to setting conscious intentions, we must also rewrite subconscious limiting beliefs and replace them with the positive visions generated by the creative conscious mind. The book, [The Biology of Belief](#), offers empowering knowledge to assess and change limiting subconscious beliefs that opens the door for a healthy, happy and harmonious future.

With Love, Light, and Deepest Appreciation for all of you!

Bruce
