

Dr. David Martin w/ Stew Peters: There Is No Virus. This Is Organized Crime.

[Dr. David Martin w/ Stew Peters: There Is No Virus. This Is Organized Crime.](#)

by [Stew Peters](#) w/ [Dr. David Martin](#)

July 19, 2021

Stew Peters describes his interview with Dr. David Martin as “an historical interview with inarguable fact-based exposure that should be seen by the entire world as an absolute end to the COVID narrative.”

David Martin:

When you inject a known toxin into person, you are actually injecting an agent of death. That’s what you’re doing.

###

David Martin:

And we have, without question, the architect of this scam, on record, in 2015 stating that “a key driver is the media and economics will follow the hype”.

“Daszak reiterated that, until an infectious disease crisis is very real, present, and at an emergency threshold, it is often largely ignored. To sustain the funding base beyond the crisis, he said, we need to increase public understanding of the need for MCMs such as a pan-influenza or pan-coronavirus vaccine. A key driver is the media, and the economics follow the hype. We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of process, Daszak stated.”^[1]

That is collusion. That is racketeering. And that is, under the Patriot Act – Section 802 of the Patriot Act – that is domestic terrorism....

Stew Peters:

Violation of U.S. law, the injection of a bio-weapon according to U.S. code...

So what is keeping Anthony Fauci... what is keeping these people free?

David Martin:

The U.S. Department of Justice. The U.S. Department of Justice has failed the American people and has had this information since April of 2020. All of the information I’m sharing with you. And they have sat on it and done nothing.

This has gone to U.S. attorneys. This has gone to the Department of Justice. I sent this in April of 2020. I sent this to the office of the inspector general of the Department of Health and Human Services. And not a single law enforcement entity in the United States has taken this seriously. Not one.

Stew Peters:

Can you speculate why that might be?

David Martin:

Well, it's not a speculation. It's very clearly the situation – where they have been ordered not to...

...

But the fact of the matter is, the Department of Justice has abjectly failed every U.S. attorney in this country. Every part of the DOJ's antitrust division has been focused singularly on the social media price-fixing, search engine optimization, restraint of trade – those kinds of things. They've been singularly focused on that as the fig leaf to hide behind what is, in fact, a much larger crime.

The crime is that we have collusion between what is called interlocking directorates, inside of antitrust law. We have Anthony Fauci at NIAID. We have the director of the Center for Disease Control in China. And we have Dr. Elias from the Bill and Melinda Gates Foundation. All sitting on a board. All colluding to actually create, price fix and market direct this pandemic.

Stew Peters:

So there really is no virus.

###

David Martin:

What Ralph Baric's team did is – in 2002 they patented a whole bunch of variations of coronavirus which would make it more infectious to humans. And this is where that biological and chemical weapons thing becomes important. Because if you're building a thing to be more infectious to

humans...

Let's say Ralph was just this innocent, bumbling scientist at UNC Chapel Hill doing his damndest to figure out a way to help humanity. Well, guess what? **When you make an infectious, replication, defective virus that is meant to target human lungs so that it's more toxic** – I don't care how Oppenheimerish you want to go on this story – **you built a Frankenstein.**

And in 2002 we knew that that Frankenstein was what it was. And remember that was the year before SARS number one in China. Right? So we didn't have SARS until we made the weapon.

###

David Martin:

I'm the first to suggest to you that the same mainstream media that made it illegal to talk about the Wuhan leak, you know, six months ago and then suddenly made it fair game to talk about again, is using distraction about a leak.

This is not about a virus.

And the story of 'where did it come from?' is actually a total misdirect...

...

The problem is nothing started in Wuhan. Nothing. As a matter of fact, if you look at that first two weeks of January you see gene sequences that are seemingly uploaded from multiple locations.

And it turns out, that if you go back and you look at the first four sequences that were up loaded, the first upload which happened on the 20th of December 2019, predates,

allegedly, the first patient...

...

If you are trying desperately, as Anthony Fauci has been – and these are in public records of the NIAID Advisory Council minutes, so if anybody wants to go back and look fact check those away – he has been promoting a universal influenza vaccine for years, to no effect. You know why? Because the influenza vaccine doesn't work that well and most people don't take it.

###

Stew Peters:

How do we widely disseminate this to the world? I mean there are billions of lives at stake here.

David Martin:

It turns out that when you have adopted a dogma – and this is what it is, it's a belief system – when you adopted a dogma that says that industrial pharmaceutical management of the human population is the answer, which is what NIAID and Anthony Fauci have done since he took over in 1984. Which is 'I'm going to frame the world through the lens that health is going to be delivered through an injectable'.

If that's the 191 billion dollar enterprise you've run since 1984. And at the near end of your professional career... But after \$191,000,000,000 of public expenditures, you know what, he still hasn't gotten his way.

He is desperate. And he is desperate to leave the legacy of 'he's the guy that took us into the CRISPR gene therapy future of humanity, where we are all a series of computer codes managed by a corporate industrial pharmaceutical complex.

He's desperate to get that happening. And it turns out to do that requires the acts of desperation.

But I want to read you something which is really quite problematic for his own story because this comes out of the Chinese publication that CDC references when they talk about, allegedly, a novel virus. But listen to this.

In the clinical features of patients infected with 2019 novel coronavirus in Wuhan China, the official paper that is 'the article' that was published in the Lancet that gave rise to the whole nonsense story. And remember that this paper was published January 24 but it was submitted for publication in the beginning of January.

Let me read you an alarming first paragraph.

By January 2, 2020, 41 admitted hospital patients have been identified as having laboratory-confirmed 2019 covid infection.

So, we have 41 patients on January 2nd with laboratory-confirmed cases of the thing that wasn't isolated until the following week.

How do you have a laboratory confirmation of a thing that doesn't yet exist?...

Stew Peters:

It's all a lie. The whole thing is a lie. And there are so many people that are in on it. I mean, we're talking about a plan where a few ruling elite control an entire world.

###

David Martin:

I really care about staying in the fact pattern but it's worth going out on a little limb here... this is Dave's

hypothesis... I'm admitting to this, is not my usual chapter and verse reference thing...

But if you are going to soften the battlefield, if you are going to weaken an opponent, wouldn't it be great if you could get the military in your opponent country to be the front line of injecting soldiers? So that they become incapacitated?

Wouldn't it be would be a great idea to use our own laws, which turn our men and women in uniform into guinea pigs for industrial pharmaceutical abuse?

Wouldn't it be great to use them as the front line of forced injections – so that, God forbid, if there was any if ever in need to defend this country – wouldn't it be great to know that you've actually injected a primer into the entirety of the military complex so that they cannot respond to a new threat.

Stew Peters:

The goal here is to inoculate every global citizen, is it not?

David Martin:

Oh yeah. But where does it start? it's always started with our military. And if I'm a hostile foreign actor, whether that is a foreign entity or whether that is a industrial complex, I don't even care, if I know that the first place I'm going to force injections is in every member of the Armed Services it would make great sense to upload a toxin, gene sequence, into the injection.

###

David Martin:

The reason for my obsession with having conversations like the one I'm having with you, is at some point I know enough of the public will hear this, where someone is golfing with a U.S. attorney – you know, somebody on your show knows a U.S. attorney. Somebody on, I don't know, Reiner Fuellmich's video feed knows a U.S. attorney, knows somebody.

...at some point somebody is actually gonna land this in front of a person who goes 'I'm drawing a line under this and I'm not going to tolerate it anymore'.

The problem we've had is that we have a public that is incensed. Because this information is tantamount to the serial killer who leaves a talisman behind every murder scene. Right? These these perpetrators are actually admitting to their crimes. And laughing full in the face of a public who cannot do anything because the courts refuse, and the Justice Department refuse, to take the action that is required when a crime is being committed.

Stew Peters:

The suicide rate is going to be outrageous.

David Martin:

Once people understand that countless physicians have been willfully participating in the homicide of humanity, I cannot imagine what it would be like to live with that.

Stew Peters:

What about the people who have been inoculated as well? I mean, what future do they have?...

David Martin:

...If you look at the history of the mRNA technology, the history isn't good. The the pathogenic priming that happens with mRNA technology in previous experiments has suggested that the prognosis is, in fact, quite dire. Ironically, there are a number of treatments that can be considered. But what we do not know, and this is where it becomes problematic to have a manipulated chimeric, synthetic mRNA strand which, we know is not derived from a pathogen – it is derived from a computer simulation. We do not know the long effect of where this thing is going to go.

###

Stew Peters:

It boggles my mind that people are tripping over themselves, have been for months, to go get a needle stuck into them for something where the inserts are left intentionally blank. We know nothing about this thing whatsoever.

###

David Martin:

When you commit a big enough crime and it's egregious enough that the public institutions that are supposed to prosecute those crimes are, in fact, themselves co-opted, what then you have is a world in which crime can run

unchecked. Which is exactly what is happening right now.

There is no question that the assertions I've made on antitrust, felony violations are, in fact, evidence – clear, no discretion required, compelling arguments...

When Anthony Fauci said Moderna is going to be a front-runner in manufacturing a vaccine in the spring of 2020, that statement had no basis in fact. Moderna had never produced a successful vaccine before. They had never produced anything that was safely administered to humans before. And suddenly they are the front runner? Because Anthony Fauci says so? You dial that one back and say well, guess what, the reason why he said so is because back in November of 2019 – and you heard me right, a month before there was ever a pathogen to talk about, he actually was getting the spike protein transferred from UNC Chapel Hill to Moderna. And, by the way, that sounds like a pretty reckless accusation except for the tiny problem of, I actually have Ralph Baric's email right here... the response that Ralph Baric sent to a major media outlet that states very clearly that he was, in fact, sending samples in November to Moderna.

###

David Martin:

Now why would you sit on evidence of that?

Stew Peters:

Well, because you're scared for your life. You're scared for your job. You're scared for your livelihood. Your kids.

David Martin:

...we're having this conversation because it would not be worth our lives if we sat on information that allowed for the genocide of our fellow human beings.

Stew Peters:

That's right.

David Martin:

We wouldn't do it.

Stew Peters:

But I'm not owned by one of these major corporation that is a piece of the whole puzzle. And every single one of the major broadcast and cable news networks are. Very much so. And so when you look at somebody like Tucker Carlson – he seems to be asking the right questions. Well, he's asking what he's allowed to and I think he's pushing the needle.

David Martin:

You know, he reminds me, in part, of Rand Paul, when Rand Paul had Anthony Fauci in front of him. And the fact of the matter is, Anthony Fauci lied in Congress – which is a violation of the law, just to be clear, I mean, lying to Congress is, in fact, illegal. When he lied about the gain

of function research at the University of North Carolina Chapel Hill, Rand Paul has in his own public records – because I know because I’ve actually published these public records and delivered them to Rand Paul’s office this – I know that he had the ability to deliver the knockout blow. Because the knockout blow was – Dr. Fauci, you just said you didn’t fund gain-of-function research, so why is it that the University of North Carolina Chapel Hill received a letter from NIH saying that there was a moratorium on the gain-of-function research that you just said you weren’t funding? Because I have that letter. I have the letter UNC Chapel Hill got. And I know that it came from NIH and NIAID. So how is it possible, Dr. Fauci, that you can actually tell me that you weren’t funding gain-of-function research when your own letterhead says that you were. And why was it that Rand Paul did not deliver that knockout blow when he had Anthony Fauci witness in front of them capable of delivering that blow?

My problem is, that even the people who are allegedly pushing the needle are not delivering the punch.

Stew Peters:

Let’s get to the motivations of somebody like Rand Paul. Can you speculate? Why didn’t he?

David Martin:

I don’t have to speculate. I can see exactly what he did on everyone of his social media platforms. He turned it into a sound bite for a fundraising campaign for his reelection.

...while they ask for information regarding communication and regarding funding and regarding a number of other things, what they do is stop short, again, of actually getting to the crime. Because the crime includes information about the actual collusion that took place between Moderna, Pfizer, NIAID, CDC and NIH. And, you know, obviously their henchmen

like UNC Chapel Hill.

###

Stew Peters:

I want to summarize kind of what we have said to this point.

The crime is being committed right out in the wide open.

All of the law enforcement agencies that could do something about it are compromised and have been ordered not to do something about it.

The judiciary is acting with this in the same way that they acted with massive, obvious election fraud in 2020. They're just refusing to hear it altogether.

The elected representatives... who they say are supposed to be out here acting on behalf of their constituents are, in fact, just out here grifting and raising money. They know exactly what's going on but refuse to say something.

The media, we know about them. They're compromised and owned by these globalists.

Leaving only we, the people, to do anything about this.

###

David Martin:

I remind people all the time of the fact that in 1774... it took about 13 people to actually realize that we, as a people, had to take action because people in leadership were incapable of acting. And they are incapable of acting, Stew, because they're beholden to fundraisers. If you are sold you cannot buy your soul back. You can't. No matter what you do, no matter how you do it, you are, in fact, always at the behest of whoever your benefactor was. And,

the fact of the matter is that, we now have a public system that has absolutely failed the public.

Stew Peters:

Globally. The world is being subjected – these are David Martin's words – the world is being subjected to a bio-weapon that has already killed thousands and will likely impact the morbidity of hundreds of millions. This is organized crime and here we are debating masks.

...I admire your bravery and I don't know what it's going to take. We never really did get there. To what it's gonna take.

David Martin:

Well, Stew, it takes this. **It takes us standing together and making sure that the public record is filled with the fact that we were not silent.**
