Excerpt from YouTube generated transcript:

Dr. Andrew Kaufman: You know even more compelling than that is – you know Fauci wrote that editorial to the New England Journal of Medicine where he said estimated the death rate from COVID-19 to be like a seasonal flu. And he puts 0.1%. Right? And that's substantially lower than the average death rate for the general population.

Dr. Jennifer Daniels: Actually it's now 1% – with the narcotics epidemic it's 1%.

Dr. Andrew Kaufman: Wow so it's only a tenth of that. I mean it's like you would survive longer with COVID.

Dr. Jennifer Daniels: Correct. In fact... if you're in Russia, the per capita COVID death rate is less than 1 in 1 million.

Dr. Andrew Kaufman: Wow.

Dr. Jennifer Daniels: If we had to wait for COVID to kill everyone, you'd be immortal. You would live longer than Methuselah.
