April 5, 2022

Dr. Naomi Wolf discusses the war on children and on Western values. Forcing children to wear masks is abusive because new studies show that this prevents them from developing normal facial recognition and the practice has a now-measurable effect on their IQ levels.

With all the new information surfacing from the WarRoom/DailyClout volunteers regarding the formerly secret Pfizer documents, and with attorney Stevan Looney's new essay on the redacted documents in the secret Pfizer tranche now published on DailyClout.io, it is becoming clear that informed consent before receiving the vaccine was never even possible.

Bombshell: in order to process just the paperwork from the “large number of adverse events” – Pfizer’s own words – Pfizer had to hire 2,400 new, full-time employees and the company proudly informed the FDA of these thousands of new hires to grapple with the flood of adverse events they saw as early as February 28, 2021. Yet they did not disclose these adverse events to the public and neither did the FDA.
