Board-certified pathologist, Dr. Ryan N. Cole MD spoke at the White Coat Summit about the catastrophic damage COVID vaccines are doing on humans and the toxic spike protein, potential long-term effects of vaccines.

[Video available at [TJ45 Rumble](#) channel.]

“You want to give a 2, 5 or 12 year old a shot? And we see a 200% increase of myocarditis. That’s a good idea. Let’s give a kid a toxine that ruins his health for life. (.../...) We need to stop insanity immediately”

“This is not science. This is poison attack on our population.”

“In the Pfizer paperworks and applications, it clearly states that in the rats, there is a 16% decrease in fertility, one of the most fertile mammals on the planet. (.../...) So what they’re doing on humanity? The answer is: We don’t know. Guess what? We don’t have long term safety data yet. That’s

the tragedy and the crime in all of this. It's an experiment. It's an emergency authorisation, not approved. Humanity is the phase 3 trial."

"What is the risk for cancer after the shot? We don't know. What is the risk of autoimmune disease after the shot? We don't know."

"What is the risk of impairing fertility for a life time? We don't know."

"So why in the world are we really pushing forward at the path rate we're going without knowing these things? Complete attack on science and a complete attack on us."

"No more mandatory forcing of employees. (.../...) 'How in the world these hospitals and these employers saying: 'You can not work for me if you don't sign up to be a subject for an experiment on humanity' "

"Where are the billions to do the autopsies? Where are the billions to prove the science?"
