The Germ and Virus Theory We “Believe” Is a Lie, Dr.s Andrew Kaufman and Thomas Cowan, Mar 17, '21

by [Patrick Timpone](#), [One Radio Network](#)

*Video available at [Patrick Timpone BitChute](#) channel.*

Dr. Tom Cowan is an innovative Health Coach who gave up his California medical license after becoming disenchanted with his former profession’s small-mindedness and harmful disinformation. He has served as vice president of the Physicians Association for Anthroposophical Medicine and is a founding board member of the Weston A. Price Foundation. He is the author of “Human Heart, Cosmic Heart”, “Cancer and the New Biology of Water”, and co-author of “Vaccines, Autoimmunity, and the Changing Nature of Childhood Illness”.

Dr. Andrew Kaufman is a New York psychiatrist and a prominent

voice in exposing the Covid-19 hoax. He has received thousands of views on online video-sharing platforms for exposing the “global agenda” and the “manufactured crisis” of the Great Reset. The American public knew virtually nothing about “exosomes” and extracellular vesicles until Dr. Kaufman gained an ever-growing audience of truth-seekers.

Patrick interviews Dr. Tom Cowan and Dr. Andrew Kaufman, two medical doctors well-versed in terrain theory. Both have been interviewed on One Radio Network on separate occasions. (Use the “Search” function to listen to them.)

Has every policy enacted the past year been based on germ theory, i.e., germs invade us and spread from one person to another?

What part did Nobel laureate John Enders play in the dissemination of “modern germ theory?” How was his virology research flawed? What was the outcome of his controlled experiment “mixing snot with measles”?

Is there any evidence or research to support the theory that viruses cause illness?

What do poisoning, toxicity, EMF, malnutrition, trauma, and stress have to do with illness? Why invent virus theory to explain something easily explainable by these concrete and provable factors?

Dr. Ray Peat believes a virus doesn’t have to be isolated to prove it exists. Isn’t this just a judgement call? What’s the flaw in this reasoning?

What is Dr. Cowan’s “ping pong ball hitting the wall” analogy, and how does it pertain to viral theory over-simplification?

Why is it impossible to isolate a virus? Is it a thing, a feeling, or a thought?

How do they explain women menstruating when they’re all

together at the same time? Is menstruation spread by a virus?

Is laughter “contagious” because of a virus? “Show me the virus!”

Exosomes can be isolated. Why not viruses?

How is it possible that people in the same household all get the flu? Patrick says he often gets e-mails with this question.

Are flu and cold symptoms just the body’s way of getting rid of toxins?

Rose asks about Antoine Béchamp’s theory of microzymas. Are they living organisms?

Can microzymas be observed with dark-field microscopes? What did Dr. Royal Rife observe with his time-lapse microscope? Was he observing dead or live tissue?

What helps the body heal from symptomatic forms of illnesses? Is clean water involved?

Patrick describes how his mother wrapped him up in blankets whenever he had a fever, and the next day he was off to school.

People used sweat lodges and saunas to get well until the radical theory of modern medicine took over with vaccines.

Michelle asks about measles. Is it a maturation process all children go through?

Do bacteria purify people? What is their role in health and disease?

Do people with cholera die of the bacterium or of dehydration?

Do we share bacteria? How do we explain diarrhea and food poisoning? How do we explain rabies virus?

“Show us the isolated rabies virus,” challenge both doctors. A primary isolate is required for proof of existence.

George asks about pneumonia treated with antibiotics.

Why is pneumonia a pathway to death? Does an antibiotic only suppress the symptoms but not the outcome?

What about leprosy? Can a “pure heart” keep you from getting sick?

Patrick asks a question about root canals. What is Dr. Stuart Nunnally finding in them?

Casey asks, “Is coronavirus being found in autopsies?”

Can a virus be injected to make people sick?

Can robot mosquitoes spray a virus on people that can make them sick?

How does our stomach acid help us eliminate toxins?

Do vaccines contain aluminum? Can we excrete aluminum from our body?

Do vaccines cause dementia and autism?

Patrick and Drs. Cowan and Kaufman discuss Dr. Geert Vanden Bossche, Are his statements valid or is he “a master at playing chess”?

Is there a California variant of COVID-19?

How many other virus deniers are there? Is the number growing? Are people “waking up?”

Patrick recommends sharing the video of this interview with friends and relatives who are afraid of COVID and so-called “infectious diseases.”
