With the Taliban back in charge in Afghanistan there is, so we're told, a risk of more terrorism.

You could see it coming, couldn't you?

A greater terrorism risk means more controls, more laws, more restrictions and less travel.

And it may lead to Biden being forced to resign.

And guess who will take over the US?

Kamala Devi Harris, the Vice President.

Global Warming cultists will become ecstatic.

Remember, nothing happens by accident.

Conspiracy theory?

Phooey.

This is conspiracy in action.
