

Evidence That They KNEW the Covid Jab Would Kill Thousands

[Evidence That They KNEW the Covid Jab Would Kill Thousands](#)

by [Dr. Vernon Coleman](#)

November 29, 2021

It's the 29th November 2021 and the extent of the conspiracy to suppress the truth and to promote a deadly covid jab is becoming clearer by the day. In February 2021, Pfizer and the FDA knew the covid-19 jab was going to kill or maim thousands of healthy people.

They have the gall to call us conspiracy theorists but what we've talked about is no theory. Everything the truth-tellers and the Resistance Movement have said has been accurate.

The governments, the advisors, the drug companies and the medical establishment are not conspiracy theorists of course – they are conspiracy practitioners, and their evil plot to kill people, to promote their great reset and to introduce the new normal is now so blatant that it is difficult to believe that the majority still believe the lies they are being told.

This morning, Darren Smith, editor of the magnificent The Light Paper – the only honest newspaper in the UK – sent me what looks to me to be yet more serious evidence that both Pfizer and the FDA knew how many thousands were going to be killed by their vaccine.

According to what I've seen, Pfizer prepared a report for the

FDA dealing with the worldwide safety of their 'vaccine' until 28th February 2021. If you want to read the report for yourself I'll put the details and this transcript on my website within 24 hours. This information was kept secret and only released after a group of professionals in the USA used the FOIA to obtain the information from the FDA. So far just 91 pages have been released. There are around another 300,000 pages to be released, I'm told.

In February 2021, Pfizer reported that, after just weeks of jabbing, there were already 42,086 adverse reaction case reports of which 25,379 had been medically confirmed. Most of these came from the US and the UK but there were also reports from 61 other countries. Remember, it is believed that only 1% of adverse reactions are officially recorded.

Of these patients, 1,223 had a fatal outcome. Which, for those journalists and fact checkers who like to hide from the truth, means death.

And 11,361 people had not recovered from the adverse events they had suffered. There were 9,400 individuals for whom the outcome was not known.

What were the adverse events?

Well, you might as well just look up the index in a medical dictionary. There were respiratory problems, nervous system problems, eye problems, immune system problems, cardiac problems and vascular problems. There were 1,403 cardiovascular problems, 932 haematological problems, 70 liver related problems, 449 cases of facial paralysis, 1,050 immune system problems and 275 stroke problems. At the bottom of the report there is an appendix – a list of adverse events of special interest. Just about every disease you can think of, with the possible omission of flat feet, is listed there. Pages and pages of it. There were spontaneous abortions, heart attacks, myocarditis, brain haemorrhage – they knew all this

was happening. Every Health Minister and medical advisor in the world should have known of this.

Oh, and there were 1,833 cases of anaphylactic reaction.

There were 270 pregnant women reported and of these 23 had spontaneous abortions. There is a list of adverse events occurring among women who were breast feeding their babies.

Among those under 12 who had already been jabbed there were 24 serious problems recorded.

None of this is a complete surprise, of course.

In December 2020, I made a video listing the adverse events known to be associated with Pfizer's covid-19 jab. The list included myocarditis, heart attacks, strokes and blood clots. None of these problems was a surprise. And what we have now is evidence.

It now seems clear that Pfizer and the FDA in America were well aware that the jab they were promoting could eventually result in vast numbers of deaths and serious injuries. I cannot begin to estimate the size of the future problems among the jabbed.

We should not be surprised by any of this.

We are dealing with bad, bad people.

This is an experiment and way back – 10 months ago – I made a video headlined 'Doctors and nurses giving the covid-19 vaccine will be tried as war criminals'.

I pointed out that doctors or nurses who did not tell their patients all the potential problems would be guilty of a crime. Patients are entitled to know the risks of a medication – it's called informed consent. And this is especially true when they are taking part in an experiment – which the covid jabs are. Doctors are ignoring the age old principle of

ensuring the benefit exceeds the risk.

The information so far revealed is just a tiny part of the information still kept secret. It's estimated that all the documents the FDA used to approve the Pfizer jab won't be made public before 2076 – over half a century away.

All this information should be released and published immediately. Why should anyone be expected to trust Pfizer or the people pushing these jabs?

The British Medical Journal has reported that a Pfizer subcontractor, used when their jab was being tested, is accused of falsifying data, hiring inadequately trained jabbers, un-blinding patients and failing to follow up on reported adverse reactions. The title of that paper is 'Covid-19: researcher blows the whistle on data integrity issues in Pfizer's vaccine trial.'

Meanwhile, the drug companies are making a fortune.

Pfizer, one of the world's most fined companies in history, expects its 2021 covid jab sales to reach \$36 billion and in 2022 they're expecting \$29 billion, though they admit they are hoping for much better than that. And they also expect the 'market for covid-19 vaccines to be durable and to continue generating sales for years to come'.

Pfizer, like other big drug companies has a bad record for honesty.

In the UK, Pfizer was fined £84.2 million for overcharging the NHS by 2,600% and in the US Pfizer was hit with a \$2.3 billion fine for mis-promoting medicines, making false claims and paying kickbacks to doctors to prescribe their drugs. At the time that was the largest health care fraud settlement in American history.

The CEO of Pfizer is quoted as saying that people who spread

misinformation about vaccines are criminals.

For once I agree with a drug company employee. He's right. The police should arrest all politicians, all medical advisors, thousands of doctors and journalists, the staff of Facebook, Twitter, YouTube and the entire staff of the BBC and the so-called fact checkers.

Governments have deliberately and systematically created fear to terrify and manipulate and virtually force people to accept a jab that doesn't do what most people think it does – it doesn't stop people catching or spreading covid-19.

And now governments and advisors and journalists are demanding that the jabs be mandatory.

When will people realize what is happening to them? I've been making videos about this assault, this coup, since March 2020, nearly 300 of them, and find it difficult to understand how people still can't understand what is happening to them.

The word 'genocide' can no longer be considered hyperbole. Medical advisors everywhere must now comment on these Pfizer figures.
