May 18, 2018

Another GeoengineeringWatch.org billboard goes up in our ongoing and rapidly intensifying [effort to expose the climate engineering](#) insanity to the public. This billboard, [the latest of many](#), is on the Long Island Expressway in New York City, New York. It is visible to eastbound traffic that is exiting Manhattan, just across the river from the United Nations headquarters and the Trump World Tower.

Every day climate catastrophes continue to increase around the globe. Though there are countless forms of anthropogenic damage to the planet which are greatly affecting the climate system, the ongoing global geoengineering programs are the greatest assault of all against our biosphere.

From the constant toxic aerosol spraying to the constant bombardment of radio frequencies (that are part of the climate engineering assault), the onslaught of decimation related to climate engineering is incalculable and relentless. GeoengineeringWatch.org wishes to express our most sincere gratitude to all those that are [helping to support our ongoing efforts](#) in this battle.
