49 States Order COVID Injections for Kids Under 5

by [Jordan Schachtel](#), *The Dossier*

June 17, 2022

49 states have decided to follow the federal government's lead in ordering COVID injections for children under 5, despite glaring evidence of a failed pharmaceutical product that doesn't serve any benefit to them whatsoever, and has the potential to cause serious side effects.

MOMENTS AGO: [#Florida](#) Gov. [#DeSantis](#) on [#Covid](#) vaccines for children: "Our Dept. of Health has been very clear. The risks outweigh the benefits, and we recommend against." Blames media for "misinformation." <https://t.co/3IjxuB9XPM> pic.twitter.com/RZgN90BRu5

On Friday, the [FDA authorized](#) mRNA COVID shots (both Pfizer and Moderna) under emergency use for children under 5 down to 6 months of age. The approval made its way through the halls of the federal bureaucracy, regardless of any studies showing a positive benefit for injecting young children with mRNA

shots, which, even in adults, do not effectively prevent coronavirus infection.
