

Flu Vaccines: What Are the Facts?

[Children's Health Defense](#)

<https://youtu.be/wq55ctylvTA>

The Bottom Line: –Flu shots are big business—a market to be worth \$7.5 Billion in the next 5 years. –Vaccine injuries aren't rare. –Vaccine injuries from flu shots at the most commonly reported and compensated. –Influenza Product inserts state, “Available data on influenza vaccines administered to pregnant women are insufficient to inform vaccine-associated risks in pregnant women.” –Many states are mandating flu shots for children and adults. The shots come with risk, especially for those most susceptible. Everyone should retain the right to say NO to what enters their body.

Even more, influenza vaccine package inserts state:

"Available data on influenza vaccines administered to pregnant women are **insufficient to inform vaccine-associated risks in pregnant women."**

But, is there government data showing flu vaccines cause injury?

Children's
Health Defense

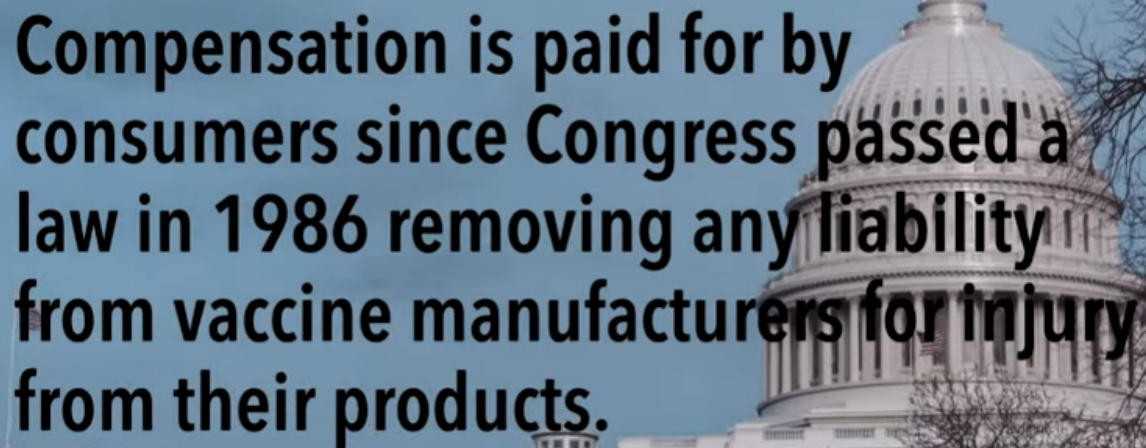

Yes, nearly half of all claims compensated by the National Vaccine Injury Compensation Program have been for flu vaccine injuries.

Children's
Health Defense

To date, more than
\$4.2 billion
have been paid out to
vaccine-injured people.

Children's
Health Defense

Compensation is paid for by consumers since Congress passed a law in 1986 removing any liability from vaccine manufacturers for injury from their products.

However, according to government data, only 1% of vaccine injuries are reported.

BOTTOM LINE

- ✓ Flu shots are big business.
- ✓ Vaccine injuries aren't rare.
- ✓ Vaccine injuries from flu shots are the most commonly reported and compensated.
