

French Farmers Sue the State Over Mystery Cow Deaths They Blame on Electromagnetic Fields

French Farmers Sue The State Over Mystery Cow Deaths They Blame On Electromagnetic Fields

by 5GFree.org

June 22, 2020

The UK Telegraph is reporting that farmers in France have launched suit over the unexplained deaths of hundreds of cattle in areas they believe are being affected by Electro Magnetic Fields.

Story Here: [French farmers sue the state over mystery cow deaths they blame on electromagnetic fields](#)

According to [this story](#) in Electrosensitivity.Co, the susceptibility of various animals to electromagnetic exposure has been long known.

[Science: Plant and Animal Electromagnetic Sensitivity](#)

What is not known is just how much various animals are dependent upon built-in sophisticated sensing tools humans can neither understand nor explain. Subsequently, they are powerless to prevent damage to the biosphere and, some scientists warn, are doing damage – and potentially destroying – an ecosystem infrastructure they are incapable of rebuilding or even repairing.

The evidence is clear:

[Animals are Affected](#)
[Humans are Affected](#)
[Plants are Affected](#)
[Biosphere is Affected](#)

Nothing – and no one – is safe from the even increasing electromagnetic fields surrounding us, bathing humanity in a sea of invisible yet toxic soup.
