

GeoEngineering & Particles of Mass Destruction

[GeoEngineering & Particles of Mass Destruction](#)

Truth Comes to Light editor's note: The audio recording shared here was shared by The Liberty Brothers nine years ago. It can be found at their [YouTube](#) channel. Because YouTube randomly deletes "controversial" videos, I am embedding a version that was mirrored at [Odysee](#). It can also be found mirrored at [Rumble](#). Find the work of Clifford Carnicom [here](#). Elana Freeland's work can be found [here](#). In light of the current genocidal "weather events" and the ongoing assault on every living being on the planet, a look back at what has been shared by researchers over the past decades can be helpful, especially for those who are just now learning about all that has been going on in the arena of the globalists' push for "full spectrum dominance".

Is Geo-Engineering transforming Earth and killing its inhabitants?

Particles of Mass Destruction

One troubling fact that we can all probably agree on is that we are being bombarded with chemicals from almost every direction. Whether it be our food, our water, our vitamins, our personal hygiene products, etc.; chemicals and their derivatives have, sadly, become a part of our daily lives.

Since few of us reading this article possess a laboratory with proper equipment, determining the type and amount of chemical poison in the above mentioned items would be nearly impossible. However, one can easily just “look up” in many areas of America and quickly discern that something is being sprayed in our skies. The idea that some sort of spraying is going on is not in dispute. The question is whether the spraying is harmless, or are we all breathing particles of mass destruction?

Perhaps no other topic, amongst the many that we have covered on The Liberty Brothers Radio Show, or that I have covered on NorthWest Liberty News, has been more divisive than the idea of “Chemtrails,” or the more accurately applied term, Geo-Engineering.

Good, and not-so-good, friends of mine seem to be evenly divided on the idea that our so-called leaders are spraying harmful particles into our atmosphere. One of my not so good friends even put a link on their respective website with the sole purpose of lampooning yours truly... C'est la vie.

One fact that is not in dispute is the pedigrees of our panel of guests who were invited on The Liberty Brothers Radio Show to discuss everything Geo-Engineering. Joining Jason and myself for the entire 2-hour broadcast was a virtual “all-star” cast, as we welcomed:

Clifford Carnicom – Clifford Carnicom is a self-employed professional computer consultant in Santa Fe, New Mexico for the past thirteen years. He provides unique on-site personal services to small businesses and individuals including system

analysis, networking, software development, and website consultation design, and implementation services.

Clifford Carnicom is also the founder and President of the Carnicom Institute, a non-profit research and educational organization that is devoted to environmental and health issues. Clifford also worked as a technical research scientist acting in a professional capacity supporting analysis and development of major Department of Defense physical and weapons modeling systems, with extensive computer programming and system application development experience. He has held a Top Secret/SCI clearance. He was appointed for and completed two years of intensive graduate level studies in mathematics, statistics, computer science, and geodesy under the auspices of the Department of Defense.

Elana Freeland – Elana Freeland came of political age during the COINTELPRO decade of Vietnam, street riots, political assassinations, and all-night rap sessions about the downfall of the Establishment. Researching Sub Rosa America included discovering how deeply her US Navy father was enmeshed with the very military-industrial complex she was writing about, and like the characters in the book, learning how every major event and personality in the United States political establishment over the past forty years is tied in one way or another to the assassination of John F. Kennedy in Dallas.

She has a BA in creative writing and wrote her Master's thesis on historiography. Besides ghostwriting books on a variety of subjects, she has just finished a book on chemtrails and HAARP for Feral House Press

Billy Hayes- Billy Hayes, a good friend of the show, is known in Geo-Engineering circles as the "HAARP Man," as Billy helped design, engineer and implement the well-known, HAARP Project.
