January 1, 2018

Climate engineering and weather warfare are ultimately one in the same. The [ongoing atmospheric experiments](#) taking place in our skies have a long history with many [objectives and agendas being carried out](#), the equation is [complex](#). If we are to have any chance of exposing and halting [catastrophic global climate engineering operations](#), we must first have a clear understanding of the issue itself. The video below is by far the most complete and comprehensive presentation ever produced by [GeoengineeringWatch.org](#). The presentation was given live at [Northern California public awareness raising event](#). It is our hope that this video will provide a useful tool for increasing desperately needed public awareness and understanding of the critically important climate engineering issue.

It is imperative to reach a critical mass of public awareness as quickly as possible. The effort to expose and halt geoengineering operations can only be waged with an [awakened population](#), time is not on our side. Sharing [credible data](#) from a credible source is the most effective and efficient way to wake others who are not yet aware of the issue. [Make your voice heard](#), make every day count.
