Geoengineering Watch: Comprehensive Climate Engineering Presentation

Source: <u>Geoengineering Watch</u>

by <u>Dane Wigington</u> January 1, 2018

Climate engineering and weather warfare are ultimately one in the same. The <u>ongoing atmospheric experiments</u> taking place in our skies have a long history with many <u>objectives and agendas being carried out</u>, the equation is <u>complex</u>. If we are to have any chance of exposing and halting <u>catastrophic global climate engineering operations</u>, we must first have a clear understanding of the issue itself. The video below is by far the most complete and comprehensive presentation ever produced by <u>GeoengineeringWatch.org</u>. The presentation was given live at <u>Northern California public awareness raising event</u>. It is our hope that this video will provide a useful tool for increasing desperately needed public awareness and understanding of the critically important climate engineering issue.

It is imperative to reach a critical mass of public awareness as quickly as possible. The effort to expose and halt geoengineering operations can only be waged with an <u>awakened population</u>, time is not on our side. Sharing <u>credible data</u> from a credible source is the most effective and efficient way to wake others who are not yet aware of the issue. <u>Make your voice heard</u>, make every day count.
