

Here We Go Again: Bill Gates, Johns Hopkins, and WHO Simulate Another Deadly Pandemic

[Here We Go Again: Bill Gates, Johns Hopkins, and WHO Simulate Another Deadly Pandemic](#)

by [Amy Mek](#), [RAIR Foundation](#)

December 13, 2022

Marxist-tied WHO boss announced this week that WHO member states have agreed on the development of a legally binding pandemic treaty that will allow them to take over governmental power in the event of a pandemic.

The Johns Hopkins Center for Health Security and the World Health Organization (WHO), and the Bill & Melinda Gates Foundation [simulated another](#) deadly pandemic, [this time](#) in Brussels, Belgium, on October 23, 2022. Catastrophic Contagion is the ominous title of the project, [reports](#) Nine For News.

The guest list included ten current and former health ministers and officials from Senegal, Rwanda, Nigeria, Angola, Liberia, Singapore, India, and Germany. Billionaire and self-proclaimed 'pandemic expert' Bill Gates participated in the simulation of a 'fictitious' pandemic that would break out in the near future. One which, in the simulation, would be much more deadly than Covid, especially for children.

Participants discussed how to deal with an epidemic that emerges in a certain part of the world and then quickly spreads to become a pandemic, with a higher mortality rate

than Covid. In this case, children and young people were particularly affected.

The Globalists completed a desktop simulation for a new enterovirus originating near Brazil. Every choice the participants made had far-reaching consequences.

Pandemic treaty

The WHO boss, [Marxist revolutionary](#) Tedros Adhanom Ghebreyesu, [announced this week](#) that WHO member states have agreed to develop a legally binding [pandemic treaty](#). This treaty is supposed to 'protect' the world against future pandemics.

There is a lot of resistance to this pandemic treaty. MEP Christine Anderson (AfD) [warned](#) the treaty aims to give WHO de facto governing power over its member states in the event of a pandemic without involvement or consultation with national governments or national parliaments. The WHO can then restrict fundamental rights as it sees fit "almost like a world government," explained the MEP.

According to WHO whistleblower [Dr. Astrid Stuckelberger](#), it is extremely dangerous. It will be a kind of global constitution, she [said in the podcast Jerm Warfare](#). Individual countries can no longer determine how they fight the next 'pandemic.' She spoke of a centralization of power. "This is terrible."

World Governance

The whistleblower pointed out that billionaire Bill Gates has been working on a global vaccination plan since 2012. The WHO has handed over leadership to GAVI (an international vaccine alliance), says Stuckelberger, who himself worked for the World Health Organization for many years. She pointed out that GAVI, is the second largest donor to WHO.

And now there is talk of global governance. "It's organized

tyranny in a golden cage,” she said. “We didn’t know how they were going to do it. They use health policies to create this global governance.”

Pandemic Simulation Games

These are not the first [pandemic simulation games](#). They have already been carried out regularly over the past few years by various groups ranging from politicians, scientists, financiers, and oligarchs. However, until recently, they have gone relatively unnoticed by the public.

Below are some of the previous “games” that have taken place (listed from oldest to most recent):

- [DarkWinter \(2001\)](#) – The Dark Winter exercise, held at Andrews AFB, Washington, DC, June 22-23, 2001, portrayed a fictional scenario depicting a covert smallpox attack on U.S. citizens.
- [Global Mercury \(2003\)](#) – The Department of State participated with the U.S. Department of Health and Human Services and the Health Ministries of seven other member nations of the Global Health Security Action Group in a tabletop Bioterrorism Exercise from September 8 – 10, 2003. The exercise, known as Global Mercury, simulated a smallpox bioterrorism attack on member countries.
- [Atlantic Storm \(2005\)](#) – was a ministerial exercise simulating the top-level response to a bioterror incident. The simulation operated on January 14, 2005, in Washington, D.C. It was created to reveal the current international state of preparedness and possible political and public health issues that might evolve from such a crisis.
- [Clade X \(2018\)](#) – The Johns Hopkins Center for Health

Security hosted the Clade X pandemic tabletop exercise on May 15, 2018, in Washington, DC. The exercise aimed to illustrate high-level strategic decisions and policies that the United States and the world will need to pursue to prevent a pandemic or diminish its consequences should prevention fail.

- The decisive [event 201 \(October 2019\)](#), based on the events of the past two years
- The [SPARS Pandemic 2025-2028](#) (May 2020)
- Monkeypox: March 2021: The World Health Organization and Bill & Melinda Gates Foundation [simulated](#) the outbreak of a monkeypox pandemic. Also taking part in the exercise was the American, and Chinese RIVM, along with [pharmaceutical giants](#) Janssen and Merck
- [Leopard Pox – \(May 2022\)](#) The World Health Organization and the health ministers of the G7 countries held pandemic simulation games based on a smallpox outbreak in 2023. The meeting featured a pandemic simulation, with the concept being that a new smallpox-like epidemic had suddenly emerged after someone was infected with the disease via a leopard bite.
