

Hold the Presses: Pfizer mRNA Shot Not Approved!

[Hold the Presses: Pfizer mRNA Shot Not Approved!](#)

by [Rosanne Lindsay](#), Naturopath, [The Nature of Healing](#)
August 27, 2021

With a silent nod by government, the mainstream media is now reporting that the U.S. Food and Drug Administration (USFDA) [has approved the Pfizer COVID19 injection](#). This message is part of a new phase to spark more mandates in order to participate in society.

However, there is no official approval by the FDA, or any other agency, for use of any COVID19 vaccine.

No rubber stamp. No assurance. No joke.

The COVID19 vaccine has NOT been approved, only [BioNTech's COMIRNATY shot](#), which requires years of additional safety studies through 2025.

Smoke And Mirrors

If you read the fine print, the [FDA is extending its Emergency Use Authorization:](#)

FDA is reissuing the August 12, 2021 letter of authorization in its entirety with revisions incorporated to **clarify that the EUA will remain in place for the Pfizer-BioNTech COVID-19 vaccine for the previously-authorized indication and uses, and to authorize use of COMIRNATY (COVID-19 Vaccine, mRNA) under this EUA for certain uses that are not included in the approved BLA.**

Is that COMIRNATY or CRIMINALITY?

Vague By Design

Under the law, government legitimizes the media to spread propaganda.

Propagandize – promote or publicize a particular cause, organization, or view, especially in a biased or misleading way.

HR-5736, [The Smith-Mundt Modernization Act of 2012](#) allows government to prepare and disseminate misleading information through film, video, and other materials to influence a domestic audience. This law previously applied abroad, to foreign audiences, as part of a media war machine.

If you read carefully, there is truth within all lies.. For there you will find that in this “FDA approval,” [no authority is presenting any assurance](#) that this change impacts safety or effectiveness of this experimental injection.

*8 The licensed vaccine has the same formulation as the EUA-authorized vaccine and the products can be used interchangeably to provide the vaccination series **without presenting any safety or effectiveness concerns**. The products are **legally distinct with certain differences** that do not impact safety or effectiveness.*

While much of the world believes in the lie that the Pfizer mRNA injections are now FDA-approved, when they are not, governments are coercing companies to mandate the injections to their employees, or face heavy fines. Whether something is approved, or not, does not equate to a mandate. Mandates continue to be illegal under the law. If you accept a mandate, you are volunteering for that order through your consent.

But what does “illegal” mean in a lawless society? – Larry H.

Six Feet Under

Why does masking and social distancing at 6 feet remain in effect? Where does the number '6 ft' come from?

[Six feet under](#) refers to the depth of a grave, but pay no attention to details.

With the false stamp of approval for an experimental injection, the propaganda has shifted to "get the jab or lose your job." This mantra first began in the medical healthcare setting with employees who have been coerced to [take the annual flu vaccine or lose their job](#). Even with evidence that [repeated flu shots are less effective](#).

Normalizing medical tyranny in the healthcare system was published in a 2009 study titled, [Mandatory Vaccination of Healthcare Workers, Whose Rights Should Come First?](#) Using fear of the H1N1 flu virus, hospitals began coercing its frontline staff to get the annual jab to increase vaccination rates. At the same time, the World Health Organization issued dire predictions of a pandemic that could cause fatalities throughout the world.

Federal government officials will not force people to get the COVID injection. That is not the role of government. They do, however, strongly encourage your employer, the restaurant where you want to eat, the concert venue you want to visit, or the country where you want to travel, to do it for them, with [mobile vaccination units coming to restaurants](#).

News headlines send the message that there are now two classes of people: Approved and Unvaccinated.

[The military will mandate the injection for all service members.](#) The [Veterans Affairs became the first federal agency to mandate](#) COVID injections before the falsely reported FDA

approval.

[Delta Air Lines will impose a monthly \\$200 surcharge](#) on unvaccinated employees

[Google, Netflix, Morgan Stanley and The Washington Post announced vaccine requirements](#) for their employees. Other businesses are using incentives like time off, lotteries and reduction in health care insurance.

Past government mandates did nothing but empower officials. So why are people still listening to government officials? Want to stay home to work? Not allowed. Rather wear a mask, *social distance*, and get tested instead of getting the shot? Not allowed. Want to use a religious or medical exemption letter to decline a shot? It may not be accepted. Read between the lines.

The Plandemic has the goal of mass vaccination during a live experiment to accumulate study data. See portions of the August 23, 2021 [FDA approval letter to BioTech Manufacturing GmbH](#):

Study C4591009, entitled "A Non-Interventional Post-Approval Safety Study of the Pfizer-BioNTech COVID-19 mRNA Vaccine in the United States," to evaluate the occurrence of myocarditis and pericarditis following administration of COMIRNATY.

We acknowledge the timetable you submitted on August 21, 2021, which states that you will conduct this study according to the following schedule:

Final Protocol Submission: August 31, 2021

Monitoring Report Submission: October 31, 2022

Interim Report Submission: October 31, 2023

Study Completion: June 30, 2025

Final Report Submission: October 31, 2025

5. Study C4591021, entitled “Post Conditional Approval Active Surveillance Study Among Individuals in Europe Receiving the Pfizer-BioNTech Coronavirus Disease 2019 (COVID-19) Vaccine,” to evaluate the occurrence of myocarditis and pericarditis following administration of COMIRNATY.

Agenda: PLANDEMIC

Erwin Chemerinsky, dean and professor of law at the UC Berkeley School of Law is a social engineer and top propagandist. He is often quoted in the media to promote the official agenda. In 2015, Chemerinsky called for [all children to be vaccinated for measles](#) unless there is a medical reason for not doing so. Today, [he suggests that](#) “freedom does not include the right to endanger others, and COVID vaccines should be mandatory.”

[Not widely reported](#), nine states have enacted 11 laws with bans on vaccine mandates (Arizona and Arkansas have each enacted two), and [vaccine passports](#). However, some of these laws are tied only to vaccinations that have emergency use authorization (EUA), so the prohibition will no longer apply once all vaccines get “full approval” from the FDA. Also these laws apply to state and local governments only, so employers and private schools can still pass mandates.

Be prepared for [passports](#) to be part of the next phase, with stamps needed for annual boosters. Then [get ready for the microchip and the chip scanners](#).

Each of these devices that are injection have the capacity to also have a small chip. What that chip does is it has the unique serial number for each dose.”..the RFID chip gives “officials information on who has and has not been vaccinated” and “tracks the location of the patient so that officials can know where the vaccinated officials are. – Jay Walker, then-CEO of ApiJect Systems America Inc., December 19, 2020.

Know Your Limits

With the mass contradictions and outright lies being spread faster than you can say “virus,” there is a simple solution.

Know who you are.

Are you a slave to the system or do you have freedom of choice?

Know where you live.

Do you live at an address or do you live in your body?

Know your limits.

You can always reserve your rights, and freedom to choose, with or without mandates. [You Are Law offers a template letter of Conditional Acceptance](#). There is also this Letter of Declination, written by an RN called Agent J. to make your own. Read it. Know it. Use it if you like. Also know that under lawless governments, it may not work. So you will need to know when and where to stand your ground and draw your line in the sand.

Statement of Declination for Offer of Influenza Vaccine Product

I, YOUR NAME, a living woman/man retain and reserve all of my God-given rights including sole possession and sole use of all my biological materials which are granted to me by my Creator.

My employer and location of employment have offered an influenza vaccination product to me pursuant to and satisfying the requirements of YOUR STATE Health & Safety Code COPY AND PASTE INFLUENZA HEALTH AND SAFETY CODE HERE.

I retain the right to decline all attempts to access, influence and or otherwise alter any and all of my God- given biological material and or biological systems which are

unique, flawless and original design and craftsmanship of my Creator and of which my Creator has granted me sole possession, proprietorship and use of.

I require that any and all product offered to me by my employer or workplace be both entirely retrievable from and also removable in its entirety from my body, person, and womanhood at the conclusion of each and every work period and or work shift and also and again at the completion of my contractual obligations with my location or employment, and or employer.

Pursuant to my above statement, I decline the offer for influenza vaccination product.
