

How the Age of AIDS Mirrors the Covidian Age, With a Twist

[How the Age of AIDS Mirrors the Covidian Age, With a Twist](#)

by [Rosanne Lindsay](#), Naturopath, [Nature of Healing](#)
February 7, 2022

The Coronavirus/COVID experience is a replay of the HIV/AIDS, with a twist.

As planned events, they show how history repeats itself when people are oblivious to the cyclical [patterns of deception](#).

Note how [NIAID's Anthony Fauci](#) is a common denominator between the antiretroviral drug treatment for HIV/AIDS and the antiretroviral drug treatment [for Coronavirus/COVID19](#).

The AGE OF AIDS

Dr Robert Gallo made his famous announcement at a press conference on [23 April 1984 that "his" HIV virus](#) was the probable cause of Acquired Immune Deficiency Syndrome (AIDS). From that moment on, the race was on to find a pharmaceutical weapon against it.

At the height of AIDS epidemic in 2005, the rhetoric about HIV danger and death penetrated every corner of the world. The rapid test for HIV was accepted as the test for AIDS, which divided people into *positive and negative* camps.

Flashback to [June 2015](#), ten years after the height of the AIDS epidemic:

AIDS-related deaths have fallen by 35 percent since the peak of the epidemic in 2005 and the number of new infections continues to decline annually. That's the good news. Nonetheless there are thought to be around 35 million people living with HIV globally; 19 million don't currently know their HIV-positive status. Of those people who need antiretroviral drugs, only just over a third have access. That's the bad news.

We have the scientific know-how to end AIDS and every month seems to bring news of another biomedical advance that could change the trajectory of the epidemic once and for all.

Last week the preliminary findings of the Strategic Timing of AntiRetroviral Treatment trial confirmed that early treatment is best for HIV.

No one thought that HIV might be lab-created. No one knew that just before Gallo's April 1984 announcement, someone had filed a [United States Patent number: 9499480](#) for HIV/AIDS Virus invention, a designer bi-product of the U.S. Special Virus program.

No one knew that Gallo, himself, was 'Project Officer' for the federal Special Virus Program that ran from 1962-1978. See [complete list of HIV patents](#). No one knows that engineered evidence is found from the 'multiply-spliced' nature of the HIV 'tat' sequence in Dr. Gallo's 1971 Special Virus paper, "[Reverse Transcriptase of Type-C virus Particles of Human Origin](#)."

Post HIV/AIDS Anomalies:

- HIV [blamed on a chimpanzee](#)
- Rapid HIV tests shown to produce up to 40% false positive results in patients, and was later [proven to be scientifically invalid](#).
- The HIV virus has never been isolated or proven to

exist. [CDC admits no record of any virus.](#)

- HIV and sex do [not cause AIDs](#)
- Evidence shows that AIDS in Africa is [caused by starvation and medications](#), not a virus.
- The World Health Organization is [criticized for inflating AIDS figures](#)
- Anthony Fauci is [accused of genocide](#).
- Scientists declare HIV does not cause AIDs. [BMJ 2002](#)
- The drug of choice, [AZT, is called a poison](#).
- [Patents for HIV/AIDS](#) discovered (for profit).

From 1985 to 1992 there were 12,000 deaths each year from AIDS. In 1992 the number increased suddenly to 15,000. Why? Because they added 5 new diseases to the AIDS definition! The actual number of cases of AIDS was on the decline until they added more diseases to the list, and still the number of new cases grew very slowly. – Dr. [Robert Wilner, Deadly Deception](#), 1994.

HIV – it has never been found in sufficient numbers to cause disease.” –[Peter Duesberg, 1991](#)

The HIV/AIDS hypothesis is one hell of a mistake. – [Kary Mullins](#), inventor of the PCR test.

Today, the official narrative still claims that no cure exists for AIDS, and that only toxic FDA antiretroviral drugs, [including A.Z.T., D.D.I., and D.D.C.](#), will slow down the progression of the disease.

“Why condemn a continent to death because of HIV, when you have other explanations for why people are falling sick?” – Dr John Papadimitriou, professor of pathology at the University of Western Australia in Perth and a [co-author of the Journal of Nature Biotechnology study](#) that found HIV tests to be inadequate.

Comparison of HIV and Coronavirus Tests. September 2020:

Sometimes testing can give you a false sense of security. That happened in the HIV epidemic, when people got a negative test and they presented it to their sex partners and spread disease, nonetheless. – Cue Mark Schlissel, M.D., Ph.D., [President of University of Michigan](#),

The U of M president knew of the flaws of the rapid HIV test. He knew the patterns of history. And for that he received pushback for equating the COVID-19 pandemic with the AIDS epidemic to justify the University's decision not to widely test students. He was made to apologize for unrelated reasons, but added to his response:

My comments were intended only as a critique of the effectiveness of massive testing of asymptomatic students for the virus that causes COVID-19 in an effort to prevent its spread. – Cue Mark Schlissel, M.D., Ph.D, [President, U of M 2020](#)

The COVIDIAN Age

In the COVIDIAN Age, it is accepted that Coronavirus is a virus. However, *Coronavirus* is a family name that includes *MERS-Cov*, *SARS-Cov*, *HCoV-229E*, *HCoV-NL63*, *HCoV-OC43*, *HCoV-HKU1*, and many others. Coronavirus is not Corona virus. It is also accepted that people with underlying diseases are more susceptible to COVID19. This is likely due to a weakened innate immune system. Immunosuppressed people no longer have a functional defense system and are more likely to suffer from any infection, whether it be called a cold, a flu, toxic overload, or 'COVID.'

The Twist:

Ironically, new research shows the opposite; that **patients**

with advanced stages of AIDS show less severe COVID symptoms and recover faster than others.

A July 2021 study in the [Journal Immun Inflamm Dis](#), titled “The clinical outcomes of COVID-19 in HIV-positive patients: A systematic review of current evidence” shows evidence that *the majority of HIV patients show no severe symptoms and completely recovered from COVID19 infection.*

Similar to The Age of AIDS, COVID patients will soon be offered antiretroviral drugs. On December 14, 2021, [Merck](#) and [Pfizer](#) pharmaceutical companies announced the development of COVID antiretroviral drugs. The companies claimed their drugs attack different parts of the virus. Ten days later, on December 24, 2021, the FDA authorized “emergency use” of [Merck’s antiviral drug](#) to treat COVID19.

FDA had previously “authorized” the first antiretroviral Molnupiravir in late November. Note: authorization does not equal approval.

When Pfizer introduced its antiretroviral red and blue pill for COVID19, it warned that the pills [may be risky when taken with other medications](#). They did not mention vaccines.

Post Coronavirus/COVIDIAN Anomalies:

- Coronavirus [blamed on escaped lab-infected monkey, bats, and snakes.](#)
- CDC Admits there is [no proof for Sars-Cov-2 virus.](#) Could it be because [viruses are exosomes?](#)
- CDC withdraws [PCR test as invalid; “too many false positives.” Other scientists agree.](#)
- CDC admits [COVID deaths are inflated.](#)
- Anthony [Fauci charged with genocide](#) and [crimes against humanity.](#)
- 3800 [Patents for Coronavirus/COVID](#) analyzed

Just as the FDA authorized the first [AIDS antiretroviral treatment, AZT](#), on March 19, 1987, in a record 20 months, the

FDA authorizes the [new COVID antiretrovirals](#).

Today, the FDA claims that the antiretroviral pill “should be initiated as soon as possible after diagnosis of Covid-19 and within five days of symptom onset,” – [FDA Statement, December 22, 2021](#)

In 1994, [Dr. Robert Wilner wrote](#): “Any antiviral therapy that is immune-suppressive and aimed at treating HIV is unnecessary, dangerous, unethical and bad medicine – you are already immune to HIV!”

Be FEAR Aware

Be aware that FEAR is a program. FEAR equals **False Evidence Appearing Real**. Each epidemic serves to elevate the same fear in a different year. Each time the CDC declares a pandemic, scientists also admit they have [no record of any isolated infectious virus](#), including [CoV – 2](#) and 19, [MERS](#), [Influenza](#), [SARS](#), [Polio](#), [Measles](#), [HIV](#), [XMRV](#), [HTLV-1](#), [HTLV-III/LAV](#), [HPV](#), [Ebola](#), [Zika](#), just to name a few. Via FOIA requests, the [CDC admits](#) that there is **no purification or isolation of any virus**. The only way to isolate a virus is to [isolate the human host](#) in a hospital, or to [culture/engineer it in a lab](#).

There is no test to find out a person’s “HPV status.” Also, there is no approved HPV test to find HPV in the mouth or throat. – [CDC HPV Fact Sheet, 2022](#)

*We aimed to develop and deploy robust diagnostic methodology for use in public health laboratory settings **without having virus material available**. – [Journal of Euro Surveillance, 2020](#)*

The current fallacious approach to therapy will only continue to result in millions of unnecessary and brutal deaths. – [Dr. Robert Wilner, Deadly Deception, 1994](#)

Buyer beware! The [rhetoric about HIV/AIDS](#) has returned. Then, as now, officials seek to distract and divide people to remove freedoms. In the process, officials make people [fearful of touching each other](#). They will claim that [COVID deaths have surpassed AIDS deaths](#). They will claim to find a [more infectious HIV variant](#). They will claim that “[HIV can be stopped by blocking cell to cell contact](#).”

Will they also separate cells by 6 feet and mandate tiny masks?

Question Everything ...

If HIV does not cause AIDS, then does Coronavirus cause COVID19?

If there is [no isolated virus, are virologists](#) legitimate? Is Anthony [Fauci an actor](#)? Why does he claim that [wearing a mask after vaccination is “theatre”](#)? Why does he [hold 4 patents on an HIV component](#) used to create COVID19?

Why blame a pandemic on innocent animals? It sounds like this: “[ANIMAL X](#)” [could be hiding a deadly virus](#) that could trigger a pandemic worse than the Black Death and kill more than 75million people. They tried to blame Ebola on [a bunny](#).

Did the Species Barrier disappear to allow for [animal research](#) to develop profitable drug models?

After mRNA injectables, why are AIDS patients successfully fending off the worst COVID symptoms and recovering faster without an immune system?

Do HIV patients somehow recognize the lab-created Coronavirus as similar? Does the mRNA nanotech somehow protect people without an immune system? Is that why antiretroviral will be required for COVID patients?

Who to trust?

Trust your innate immune system.
