

If I Were an Atheist Materialist Biological Machine

[If I Were an Atheist Materialist Biological Machine](#)

November 1, 2021

If I were an atheist materialist who believed all humans were nothing more than biological machines, the practice of delivering an infant whole and alive, through Caesarean Section, and then cutting out his heart and removing tissue for medical research would still make me turn away and want to forget I had ever heard this was happening in the world. (My series on medical infanticide, [here](#) [1])

Because a click would go off inside me.

I wouldn't know what the click was, or why it happened, but I would feel something. And if I were a creature living in Huxley's *Brave New World*, I would know the feeling was a signal I should go to the medical dispensary and obtain the drug Soma, which would put me in a pleasant forgetful state...

And yet in our world, there are doctors and nurses and technicians and researchers who don't even experience the click. They participate in the murders of the infants. [They do the work](#). [2]

They are backed up by bureaucrats and elected officials and ethicists and pharmaceutical executives and medical school teachers and deans and medical journal editors and medical journalists and even religious leaders.

How is it that people of faith, billions of them, are not standing up together against this establishment?

Obviously, something has gone wrong with religion. That is the only conclusion.

In organizing itself, it has become concerned with perpetuating itself. It has built a wall between its people and what faith means.

Jesus threw the money changers out of the Temple, but what happens when the money changers ARE the Temple?

What happens when pastors fail to inspire their congregations to take action in the world and stand up against their oppressors?

Vaccine companies used fetal cell line HEK 293 to test their COVID vaccines. That cell line was surely obtained through the medical murder of an infant, in 1972, in the Netherlands. Her kidneys were removed for the tissue, killing her.

Religious people can say that's none of their business. They can say anything that will close them off from action.

But ABIDING FAITH is supposed to triumph over society and government, the "things of this world." That's one of the sacred points of faith. It's supposed to allow a person to go to the wall for his beliefs.

A Pope carrying all the accoutrement of the Roman Church can issue a statement supporting the COVID vaccine. This tells you how much of the material world the Pope pays homage to. How much he has sold of himself. He is not an illustration of the test of faith.

If I were an atheist materialist who believed all humans were biological machines, there are churches and temples I could walk into; and feel at home.

The Sound Choice Pharmaceutical Institute “is a 501 (c)3 non-profit organization with a mission to end human trafficking and exploitation for the purposes of biomedical research and commercial products. Our President and Founder, Theresa Deisher Ph.D., has over 30 years of pharmaceutical research and leadership experience. She discovered adult cardiac derived stem cells, has worked on their therapeutic uses as an alternative to human fetal DNA, and leads a team of scientists at AVM Biotechnology dedicated to changing what a diagnosis of cancer, autoimmunity, or chronic infectious disease means to patients and their loved ones. As a result of this work, Dr. Deisher is named as an inventor on over 47 patents.” [3]

I’m going to give you a few important quotes from their published material. Wherever “fetal cells” and “cell line” are mentioned, this indicates material obtained from an aborted fetus. Were these infants removed from their mothers’ wombs, alive, and then murdered? Except in one instance, this is not covered. However, Sound Choice founder, Dr. Deisher, in a devastating interview with Robert Kennedy [4], makes it clear that the practice of removing infants, alive, from the womb, extracting their tissue to make cell lines, and killing them is a widespread practice.

In the first 15 minutes of the interview [4], Deisher discusses infants in the womb for 20 weeks, even 32 weeks, being taken out alive, with their blood supply functioning (essential) and then killed by cutting out their hearts or their brains. This is what is done in order to obtain tissue that will be turned into fetal cell lines.

At the top of the interview, Kennedy said he didn’t want to get into the moral aspect of fetal cell lines. But after listening to Deisher, he was shaken. He said so. He said they would have to cover the moral aspect.

Here are Sound Choice Institute statements: [5]

“Today, more than 23 vaccines are contaminated by the use of aborted fetal cells. There is no law that requires that consumers be informed that some vaccines are made using aborted fetal cells and contain residual aborted fetal DNA. While newer vaccines produced using aborted fetal cells do inform consumers, in their package inserts, that the vaccines contain contaminating DNA from the cell used to produce the vaccine, they do not identify the cells as being derived from electively aborted human fetuses.”

“The United States government has known about the dangers of human DNA from aborted fetal cell-lines since at least 2005. They set guidelines which are supposed to keep the DNA at a specific limit, which they hypothesize will not cause cancer. There is no monitoring of vaccines by our government agencies to ensure those limits are adhered to. Vaccines (MMR, Varicella, and Hepatitis A) sent for independent analysis have consistently shown levels of human fetal DNA that are far beyond the ‘established safety limits’.”

“Instead of conducting safety studies the FDA regulated the amount of human DNA that could be present in a vaccine to no greater than 10ng.”

“Unfortunately, the Sound Choice team discovered that the fetal DNA levels ranged anywhere from 142ng – 2000ng per dose, way beyond the so-called ‘safe’ level.”

“Human fetal cell lines are used to culture some vaccines. They are listed on the CDCs Vaccine Excipient list as [cell lines] WI-38, MRC-5, HEK293, PERC.6.

* WI-38 is a diploid human cell culture line composed of fibroblasts derived from lung tissue of an aborted female fetus.

* MRC-5 (Medical Research Council cell strain 5) is a diploid human cell culture line composed of fibroblasts derived from lung tissue of a 14-week-old aborted male fetus.

* Human embryonic kidney cells 293, also often referred to as HEK 293, HEK-293, 293 cells, or less precisely as HEK cells, are a specific cell line originally derived from human embryonic kidney cells grown in a tissue culture.

* PERC.6 cell line was derived from human embryonic retinal cells taken from an elective abortion.

* The newest cell line created in 2015 for vaccines: WALVAX 2 is taken from the lung tissue of a 3-month gestation female who was ultimately selected from among 9 aborted babies. The scientists noted how they followed specific guidelines to mimic WI-38 and MRC-5 in selecting the aborted babies, ranging from 2-4 months gestation. They further noted how they induced labor using a 'water bag' abortion to shorten the delivery time and prevent the death of the fetus to ensure live intact organs which were immediately sent to the labs for cell preparation." [6]

"Human Diploid Cells (aborted fetal material) provide the 'cell culture' in which vaccine formulas are often grown or nurtured. Current vaccines in circulation which were manufactured using aborted fetal material include:

* Polio vaccine (inactivated/IPV) & Oral Polio (live virus) drops : Sanofi Pasteur recently announced they are discontinuing the use of aborted fetal cells in the manufacturing of Poliovax, Pentacel, and Quadracel polio vaccines. Ask before receiving these vaccines as it will take some time for the ethically available options to be widely available.

* Measles, Mumps, Rubella vaccine/MMR (Rubella component)

* Diphtheria, Tetanus, Pertussis, Poliomyelitis vaccine (DTaP/TdP)

* Varicella (Chickenpox) vaccine & Shingles (zoster) vaccine

- * Hepatitis A and Hepatitis A & B vaccines
- * Rabies vaccine
- * Shingles
- * Some Coronavirus vaccines”

VACCINE REFUSAL AND RESISTANCE ARE ACTS OF CONSCIENCE,
SCIENCE, AND FAITH.
